Report of the Minister of Education

1951

To the Honourable L. O. Breithaupt, LL.D.,
Lieutenant-Governor of the Province of Ontario.

Your Honour,

I beg leave to present to your Honour the Report of the Department of Education for the year 1951.

For the first nine months of the year the Department of Education was administered by the Honourable Dana Porter, who combined the offices of Minister of Education and Attorney-General. My association with the Department as Minister began on October 1, 1951.

Grants paid to local authorities for educational purposes in 1951 exceeded \$46,000,000. In the allotment of these grants, as in 1950, provision was made for more generous assistance to Boards faced with large capital or debenture charges for building projects and for greater assistance to communities with smaller financial resources.

In 1951 two hundred and forty-one school building projects were completed, with an estimated cost of \$32,500,000. Accommodation was provided in these completed buildings or additions for 40,000 pupils. School Boards were required for the first time to provide free text-books chosen from an approved list for all pupils in Grades I to VIII. A repayment grant of \$3.00 per pupil was provided to assist Boards in meeting the cost of free books.

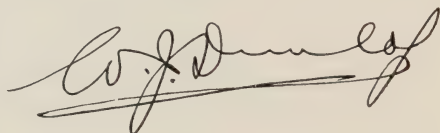

An X-ray survey of all School Board employees in the Province, including caretakers and bus drivers, was completed, and provision made for the testing of new employees. Pupils will thus be safeguarded as far as possible from contact with active cases of tuberculosis.

The Royal Commission on Education which was appointed in 1945 to "report upon the Provincial education system" presented its findings in December, 1950, and these were tabled in the Legislature and printed in 1951. In some of the conclusions of the Report there was unanimity, but in other directions issues were raised in which there were sharp differences of opinion. It was apparent that these differences of opinion among the Commissioners were reflected in the different points of view to be found among the people of this Province. There is no simple way in which some of these differences can be resolved.

The Report of the Royal Commission is a survey which contains excellent summaries of the historical development and present practices in our system of public education. It also contains suggestions for many important reforms. Some of these have already been implemented and others are being or will be put into effect. The labours of the members of the Royal Commission in the cause for which they were appointed have therefore already had a far-reaching effect on our educational system, and the Report will continue to serve as a source of information and an inspiration for future improvements.

Developments in a number of special fields of education are dealt with in this, the annual Report of the Department of Education for 1951, and statistical summaries covering all aspects and phases of the school system will be found in the pages following the general statements. The school system of Ontario, as these individual summaries show, is an exceedingly complex structure. In any system so large and complicated it becomes increasingly important to make sure that fundamental purposes and values are not lost to sight. It is more than ever necessary, in these circumstances, to scrutinize expenditures carefully to see that they are necessary and that full value will be obtained in return. Similarly, before drastic changes are made in organization or curriculum, one must be sure that the primary purposes of the school will be fully served by the proposed changes. I trust that these considerations will serve as a guide to all those concerned with educational policy and practice in our school system.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "W. J. D. D. D.", with a long horizontal flourish extending to the right.

Minister of Education.

Toronto, October 1, 1952.

PART I
GENERAL

Elementary Education

LEGISLATIVE GRANTS

In 1951 the calculation of legislative grants for elementary schools in urban municipalities having a population greater than 2,500 was based on population. These grants ranged from 16% to 44% of certain approved costs of operation. For all other Boards, excepting those designated under section 66 of The Public Schools Act, the calculation was based on assessment per classroom. These grants ranged from 40% to 92% of certain approved costs. In addition, there was paid a grant of \$16.00 for each pupil in average daily attendance for the calendar year 1950.

All Boards were reimbursed for amounts expended in 1951 for text-books, permissive use of which had been approved, up to a maximum of \$3.00 per pupil of average attendance for 1950 of pupils in Grades I to VIII. Boards in urban municipalities with populations under 2,500 and Boards in rural municipalities with populations under 20,000 were reimbursed for the amount expended in 1951, with the Inspector's approval, for library books up to a maximum of \$1.00 per pupil of average attendance for 1950 of pupils in Grades I to VIII.

LARGER UNITS OF ADMINISTRATION

In 1951 there were 12 new township school areas formed and 15 additions to former areas. In recent years 9 school sections have been re-established, and one township school area which included 14 school sections, has been dissolved. At present there are 547 township school areas in operation in place of 3,488 former school sections; 463 of these areas were formed between 1940 and 1950, inclusive. Township school areas now include 60.67% of the former school sections in the Province.

In 1951 one Board of Education was established for the Towns of Mimico (pop. 11,503) and New Toronto (pop. 11,072), and the Village of Long Branch (pop. 8,520). This Board operates 7 Public Schools, one High School, and a Vocational School. It employs approximately 170 teachers. A similar unit was established in Welland County by enlarging Stamford Township School Area to include Willoughby Township and the Village of Chippawa. The school sections in the High School District of Etobicoke Township were united into a Township School Area with a Board of Education. In 1951 this Board employed 248 Public School Teachers and 38 High School Teachers.

In 1951, 29 Separate Schools were formed into 10 Union Separate Schools. One addition was made to another union. This brought the total of Union Separate Schools to 46. These included 133 former schools. This change has taken place between 1939 and 1951.¹

THE TEMPORARY CLOSING OF SMALL SCHOOLS

During 1951, 37 schools were closed. There were 10 schools re-opened which had formerly been closed. At present there are 721 closed schools in the Province.²

TRANSPORTATION OF PUPILS

Public and Separate School Boards have authority, under certain conditions, to provide transportation for pupils to elementary or secondary schools. Where larger High School Districts have been established the High School Boards have

¹ For tables see p. 67

² For tables see p. 68

assumed that responsibility for High School pupils. Seven thousand secondary school pupils were provided with transportation in 1950-51 by elementary school Boards, at a cost of \$638,000.00.

Elementary School Boards have increased the number of pupils transported to elementary schools from 16,000 at a cost of \$824,000.00 in 1949-50 to 19,000 at a cost of \$996,000.00 in 1950-51. This increase is due to the growth of central elementary schools and the closing of very small schools in sections where the school population has decreased. Most Boards do not consider that it is necessary to transport pupils who reside less than two miles from school.³

THE SUPPLY OF TEACHERS

Rapidly-increasing enrolment in the elementary grades is responsible for the continued shortage of teachers for Public and Separate Schools. As the increase in enrolment in the elementary schools of the Province in September, 1951, was 38,675, it was necessary to grant letters of permission for Boards to engage 469 persons who had no teacher-training experience. During the same period 521 letters of permission were issued for Boards to engage teachers who had at some time completed a teacher-training course.⁴

RAILWAY SCHOOL CARS

Six school cars are now in operation, three on the C.N.R., two on the C.P.R., and one on the O.N.R. The number of stops varies from three to five, with an average attendance of six pupils at each stop. The circuit is completed in approximately five weeks.

The teachers are chosen because of their understanding of and adaptability to pioneer life. In addition to teaching in the classroom, they do much to enrich the home life of pupils and parents, many of whom are not familiar with Canadian habits and customs. The school car is open in the evening to parents and children, thereby providing an opportunity for cultural growth in the community.

SCHOOL HEALTH SERVICES

The school has two responsibilities with respect to health—the education of the pupils in health matters and the provision of a healthful school environment. Certain aspects of the former are dealt with in this report under the heading “Physical and Health Education”. Instruction in health matters is an emphasized part of the Ontario Programme of Studies.

Standards of healthful school environment have been raised markedly in recent years through the improvement of school accommodations, made possible by generous legislative grants. Factors important in pupil's health which are thus being improved are lighting, heating and ventilation, modern sanitary arrangements, hand-washing facilities, and approved and tested drinking water supply.

The contribution of school health services, under the administration of the Ontario Department of Health, is well known and appreciated; these services have helped to cut down absenteeism by keeping the children healthy. Marked progress has been made in recent years in combating the common ailments of childhood through immunization against communicable diseases, so that many of these ailments are prevented and all of them made less dangerous, thus reducing the loss of school time. Chest X-ray examination is now required not only for teachers but for all employees of School Boards, such as caretakers and school-bus drivers.

The Department of Health holds statutory powers of supervision and control over general conditions affecting health throughout the Province, including those pertaining to schools. One aspect of this supervision and control has to do with

³ See also p. 7

⁴ For tables see p. 163

the school plant, that is, the accommodations provided by the School Board from its revenues, which are derived partly from legislative grants distributed by the Department of Education. Examples came to light which made imperative more co-operative control by the two Departments over new school construction, in order to ensure healthful conditions therein. An arrangement was accordingly worked out whereby, in all cases of new school sites lacking municipal water supply and sewage disposal, final approval for grant purposes of the building plans is withheld by the Department of Education until the Department of Health has given approval of the water supply and the provision which is made for the disposal of sewage.

NEW CONSTRUCTION

Each year since 1945 the total cost of school construction has increased over the preceding year. In 1951 additional accommodation was provided for 30,000 pupils. During the seven years 1945 to 1951 inclusive 1,058 new schools and additions were completed at a total cost of approximately \$76,000,000.00. These buildings have made provision for 106,000 additional pupils.

ADMINISTRATION

In recent years there has been an increasing trend for Boards of Education, including Township Boards of Education, to engage their own supervisory officers. A supervisory officer may be a director of education with supervisory powers over both the Board's elementary and secondary schools, or a superintendent of Public Schools, or a superintendent of Secondary Schools. The qualifications required for each of these three officers are specified in the regulations. In addition, several Boards of Education engage assistant Inspectors who hold full qualifications as such. Because of this trend we find that an increasing number of persons who perform the duties of elementary School Inspectors are employees of Boards; the majority of such persons, however, continue to be civil servants employed directly by the Department of Education.

Curriculum

COURSES

Experimental classes using the proposed organization for the new **Primary Division** which were established in September, 1950, have been continued and are now in the second year of operation. Additional experimental classes were established in other centres in September, 1951. As this is a three-year experiment, it is not possible to evaluate the results at this time, although some trends are apparent. For example, the learning of the fundamental skills, particularly reading and handwriting, is improved where young children remain with a good teacher for a second year.

A number of experimental classes have been established also in the **Junior Division**.

The **Intermediate Division**, made up of Grades VII, VIII, IX and X, bridges a gap between the elementary and secondary school, a gap which the old High School Entrance examination did much to accentuate. Efforts are continuing to co-ordinate the work of the last two elementary and the first two secondary school grades. An experimental curriculum, first issued in 1950, was revised and re-issued in 1951. This pamphlet, Curriculum I:1, was intended to help in preparing local adaptations of courses, or to be adopted in schools which had not completed their own revisions. During the past few years a liaison has been developed between elementary and secondary School Inspectors, resulting in desirable co-

operative effort. Local curriculum committees have been functioning for over a year. Many of these have modified the experimental courses outlined in Curriculum I:1 to meet local needs, and these modified courses are now being used in many classrooms. This work has provided valuable experience and training for teachers.

Terminal Trade Courses and Terminal Commercial Courses in Grades IX and X, and special classes for Slow Learners in Grade IX have been established in a number of centres.

The experiments begun in 27 schools in 1950 in order to bring about a more equitable distribution of the prescribed work over Grades XI, XII and XIII of the **Senior Division** have been continued. It is expected that revised courses will be ready for trial in all secondary schools in September, 1952.

TEXT-BOOKS

Authorization of text-books was discontinued to the end of Grade X and the policy of approved lists adopted. The practice of paying subventions to publishers of authorized text-books was also discontinued. In February, 1951, an additional list of books approved for permissive use in Grades II to VIII in Social Studies, English, Arithmetic, Reading and Spelling was issued. In May, 1951, a new list was issued showing all books approved for permissive use in Grades I to VIII. It was then announced that all books were to be supplied to pupils in elementary schools and that Boards would be reimbursed up to an amount of \$3.00 per pupil of average attendance on expenditures for approved books. Committees have been established for the purpose of examining new publications for inclusion in the approved list.

The policy of requiring, wherever possible, that text-books for inclusion in lists for permissive use be of Canadian authorship and that all books for such lists be printed and published in Canada has been justified by the number and quality of the books which have been and are being published. Where an American book has had to be listed because no suitable Canadian book was available, the publisher has been required to make a revision for Canadian schools. The publishers have been co-operative in support of this policy.

CURRICULUM-PLANNING

Workshops dealing with curriculum-building were held at London and Guelph in July, 1951, for elementary and secondary school teachers. A course in Curriculum-Development was given at each of the three summer school sessions in Education at London, Toronto and Ottawa. Approximately 1,076 teachers were in attendance at these courses.

A workshop in Conservation was held for the second year in co-operation with the Department of Lands and Forests at Dorset in August, 1951. Two workshops in the Social Studies were held, one at Geneva Park and one at Lakefield, in August, 1951.

The curriculum conference at Toronto in October, 1951, which was sponsored by the Ontario Teachers' Federation, indicated the widespread interest in curriculum-development throughout the Province. A second conference is planned for 1952.

A meeting of Superintendents of Education for Toronto, Ottawa, London, Hamilton and Windsor was held in the Department during the year to discuss experimental work in progress in those centres. Meetings of all Normal School Principals and representatives of the College of Education were held to discuss the problem of adapting the teacher-training programme to the revised curriculum. During the year officials of the Department met with groups of teachers, parents and trustees to discuss curricular and other problems.

PUBLICATIONS

The following pamphlets were issued during 1951:

- Curriculum: 5** MEMORANDUM RE TEXT-BOOKS, PRIMARY, JUNIOR AND INTER-MEDIATE DIVISIONS, Arithmetic, Reading, Spelling, Social Studies, English.
- Curriculum: 6** MEMORANDUM RE LEGISLATIVE GRANTS ON EXPENDITURES FOR TEXT-BOOKS AND LIBRARY BOOKS, 1951.
- Curriculum: 1:1** OUTLINES OF COURSES FOR EXPERIMENTAL USE IN GRADES VII to X.
Revised 1951
- Curriculum: 1:1 (a)** OUTLINE OF COURSES IN FRENCH COMPOSITION FOR EXPERIMENTAL USE IN GRADES VII to X.

Secondary Education

1. COLLEGIATE INSTITUTES, HIGH SCHOOLS AND CONTINUATION SCHOOLS

HIGH SCHOOL DISTRICTS

During the past year 17 new High School Districts have been established. In order to meet local needs adequately, some adjustments have been found desirable in the existing Districts. Boundary alterations have been made in 21 Districts and 4 High School Districts were dissolved. Two of the latter have amalgamated with their nearest cities (St. Thomas and Belleville) to form larger secondary school administrative units.

During the year 1951-52, 1,026 transportation routes were operating, carrying 31,320 pupils 56,000 miles per day at a daily cost of \$14,955.00. Of this daily amount \$12,825.00 was approved for grant purposes. (See also page 4).

ENROLMENT

The total enrolment of pupils in academic secondary schools for the school year 1950-51 was 100,871. These pupils were enrolled in 75 Collegiate Institutes, 218 High Schools, and 73 Continuation Schools. The number of full-time teachers was 4,577, an increase of 254 over that of the previous year. The growth of the secondary school population may be attributed to the number of rural boys and girls who are encouraged through modern transportation, better schools, and wider choice of courses to take advantage of the broader opportunities now offered by the new District High Schools.

BUILDING PROGRAMME

The large enrolment in the elementary schools at the present time indicates that the secondary schools will continue to need additional accommodation for some time to come. Twelve new secondary schools have been completed during 1951, furnishing accommodation for 3,710 pupils at an estimated cost of \$4,462,000. Additions and alterations to existing school buildings have also provided for 5,110 pupils at an estimated cost of \$6,831,000. New schools have been built at Alliston, Burk's Falls, Centre Hastings (Marmora), Dryden, Espanola, Glencoe, Hearst, Markdale, New Toronto, Orangeville, Pickering and Walkerton.

INSPECTION OF SCHOOLS

In preparation for the school year 1951-52 the Province was divided into 15 High School Inspectoral Areas, to each of which a member of the High School Inspection staff was assigned. The main part of the work of four of the Inspectors has been allocated to the counties adjacent to their places of residence. Other Inspectors have been assigned compact areas so that, at a later date, it might be convenient for Inspectors to reside at points within these areas. Each Inspector is responsible for the schools in his area and may invite other general Inspectors to assist him. The increased personal attention which the Inspector will be able to devote to his schools should result in a marked improvement in the service which he is able to render through closer co-operation with Boards, Principals, staffs and communities. Inspectors of special subjects will not necessarily visit the schools each year but will give special assistance whenever requested to do so. The policy of selecting a number of composite secondary schools for joint inspection by members of the High School and Vocational School Branches has been continued, with inspections of this type being held at Hamilton Central Secondary School, Hamilton Delta Secondary School, Kingston, Oshawa, Ottawa Fisher Park, and Port Arthur.

HIGH SCHOOL PRINCIPAL'S CERTIFICATE

A summer course for the High School Principal's certificate was given from July 4 to August 7, 1951. In the following year a course will be conducted for Vocational School Principals. Successful completion of a Principal's course will be required of applicants for a Principal's certificate after September, 1952.

2. VOCATIONAL SCHOOLS

GRANTS AND COSTS

Legislative grants to Vocational Schools in the fiscal year 1950-51 amounted to \$3,603,456.85.⁵ Building and equipment costs continue to increase along with operating costs.

Under the Vocational Schools Assistance Agreement the Government of Canada pays a grant equal to Provincial expenditures in grants for maintenance up to a fixed maximum (\$589,000) and also makes an allowance toward capital expenditures for buildings and equipment equal to fifty percent of the Provincial allowance for these purposes. Under this arrangement a payment of \$369,675.23 was received on account of capital expenditures, while the Provincial expenditures were far in excess of the amount required to qualify for the maximum grant under the maintenance clause.

ATTENDANCE

The day school enrolment for 1950-51 was 30,511, a figure differing by 179 from that of the previous year. The enrolment in evening classes was 57,766, a decrease of nearly 1,300 from that of the preceding year.⁶

TEACHER SUPPLY AND TRAINING

The one-year courses for teacher-training at the Ontario College of Education are the main source of teacher-supply to fill the vacancies created by retirements, promotions, and the opening of new schools. To some extent, however, summer courses providing special training programmes permit a re-adjustment of teaching personnel which assists in meeting the demands for teachers of special subjects. During the current year, one hundred and seven teachers of Home Econo-

⁵ For tables see p. 141

⁶ For tables see p. 140

mics were enrolled in regular summer courses. Twenty-five new centres offered Home Economics instruction and the Home Economics programme enrolled forty-seven additional teachers.

For Commercial classes the teacher-supply, although it has increased steadily, has not kept pace with the demand. As a result, some centres have had to delay the commencement of their programmes.

Industrial departments teaching pre-trade courses have been meeting their shortages by employing a number of well-qualified and carefully selected tradesmen with some natural aptitudes for teaching. These men were granted temporary permission to teach until a satisfactory plan for their teacher-training could be developed. In the field of Industrial Arts eleven full-time centres operated during the year under teachers not in possession of their proper qualifications.

In general, it appears that the supply of Vocational teachers is not at present keeping up with the rapidly-growing demand.

CURRICULUM-DEVELOPMENT

The plan for curriculum revision in Grades VII to X, inclusive, has been well supported by the teachers of the "practical" subjects. In the sphere of Home Economics, such problems are studied by some thirteen regional groups. For Commercial Education development, the Province has been divided into districts, each of which is assigned responsibility for one subject of the curriculum. The teachers of Industrial Arts, under their research organization, have concentrated on a study of the aims of Industrial Arts as related to general education. In the field of Industrial Education, curriculum studies continue to be directed effectively by the Technical Research Council.

Terminal (two-year) trade courses are continuing to develop satisfactorily on the original basic pattern. Other two-year courses of various types have been the subject of experimentation during the past year.

CO-OPERATION WITH INDUSTRY AND BUSINESS

In the field of Commercial Education increased co-operation with business is being effected by closer association with the National Office Management Association, which now has organizations in several of the larger cities of the Province. This co-operation finds expression in the development of co-operative training plans, the extension of the guidance function, advice in planning school accommodation and equipment, and better placement for pupils on leaving school.

Vocational School programmes in Industrial Education are being developed and improved in close association with industry through the medium of Industrial Education Councils. The central Council of this organization is known as the Ontario Chapter, and many local Chapters have been organized throughout the Province. These chapters may enrol representation from all organizations interested in the work of the Vocational Schools as a service to the community. Their recommendations are sent to the local administrative bodies for official consideration, so that, without trespassing on the duties of established authority, the local chapters can contribute, from their practical experience, to the improvement of industrial education.

VOCATIONAL EVENING CLASSES

A study is now being made by a committee of the Technical Research Council to determine ways of improving the services of evening school classes. Some of the problems being considered are (a) the development of smaller instruction units, (b) the establishment of credits for these classes on the day school diploma, and (c) the development of senior technological instruction which will compare favourably with the higher National Certificate of the English Technical School system.

DEFENCE TRAINING

The Vocational Branch of the Department of Education, in co-operation with the Federal government, has again been assigned responsibility for certain aspects of Defence Training.

During the summer of 1951, in co-operation with the Weston Board of Education, who provided the accommodation, a very successful eight-weeks' course in Basic English was established for one hundred and twenty French-speaking Royal Canadian Air Force trade recruits.

3. PROVINCIAL TECHNICAL INSTITUTES

LAKEHEAD TECHNICAL INSTITUTE

The Lakehead Technical Institute at Port Arthur has two divisions—a technical division and an advanced academic division. Two courses are available in the technical division, Technical Forestry and Technical Mining. Both courses are of two years' duration. The demand for graduates in these courses considerably exceeds the supply of graduates available. Twenty students are registered in the technical division.

The advanced academic division offers the first year of the following courses: Arts, Applied Science, Commerce, Forestry, Forest Engineering, Household Science. Students have gone on to complete their courses at the following Canadian Universities: British Columbia, Manitoba, Western Ontario, McMaster, Toronto, Queen's, New Brunswick. Students have also gone on to the University of Minnesota, the Colorado School of Mines, and the Houghton School of Mines in the United States. Thirty-one full-time and twenty-two part-time students are registered in the advanced academic division.

PROVINCIAL INSTITUTE OF MINING

The year 1951 opened with an enrolment of forty-six students at the Provincial Institute of Mining in Haileybury and in May a class of twenty-three students graduated. Seventeen of these had completed the two-year course and six the three-year course. In September the Institute re-opened with an enrolment of twenty-two students in the two-year course and twenty in the three-year course, a total of forty-two students.

As in past years, good employment opportunities continued, and all graduates obtained suitable positions. The majority entered the survey and engineering departments of various mines. Some of them joined exploration companies and a few entered mine assay laboratories. Since its opening in 1945, the Institute has graduated more than two hundred men. By providing this large number of trained mining technicians for an industry in which there is a shortage of technical personnel, it has made an important contribution to mining in Ontario.

PROVINCIAL INSTITUTE OF TEXTILES

In June, 1951, the Provincial Institute of Textiles in Hamilton graduated its second class of eleven, all of whom found immediate employment in the industry. In September the Institute re-opened with a full-time enrolment of forty-two students, sixteen in the First Year, seventeen in the Second Year, and nine in the Third Year. In October the Evening School re-opened with an enrolment of one hundred and twenty representing thirty-one textile firms located in Brantford, Dunnville, Galt, Guelph, Hamilton, Hespeler, Paris, Preston, St. Catharines and Toronto. A depression in the industry was probably responsible for the drop in evening school attendance this year.

The textile industry continues to support the Institute through contributions of raw materials and machinery as well as sponsorships, bursaries, and scholarships for students.

The Institute offers courses in the technical aspects of the cotton, woollen and worsted systems of spinning, knitting, weaving, and textile dyeing and finishing and, through the medium of thesis assignments to Third Year students, is doing some original investigation in problems affecting the mills.

RYERSON INSTITUTE OF TECHNOLOGY

Since its establishment in 1948 the Ryerson Institute of Technology has shown a steady and healthy expansion, developing into an unique institution providing tuition in a number of occupations requiring instruction beyond the secondary school level. The school opened in 1948 with a registration of 200; in 1951 there were 1,125 students enrolled. Almost 75% of these are from centres outside Toronto and approximately 5% come from outside Ontario. Nearly every Canadian Province is represented. The night school enrolment has increased year by year until it has now passed the 2,000 mark. The Institute has provided instruction from time to time for students registered in the University of Toronto in the Physical and Occupational Therapy Course, the Institutional Management Course, and the School of Hygiene.

Some of the original courses have been discontinued; new courses have been added; and all the courses are subject to yearly assessment to determine their suitability in the light of changing conditions in industry and commerce, and new methods of instruction. There are now twenty-seven courses offered at Ryerson, most of them requiring attendance of two or three years for completion.

Professional Training

NORMAL SCHOOL ENROLMENT

A decrease occurred in the number of students enrolling in the teacher-training institutions in the Province in the school year 1951-52.⁷ The eight Normal Schools had a total enrolment of 1,628, a reduction of 76 from the figure for 1950-51. The number of women increased by eight, but the enrolment of men showed a decrease of 84. The Ontario College of Education had an enrolment of 525 in the courses for High School Assistants', Library, Home economics, Vocational Training, and Industrial Arts certificates. The total enrolment of the College was 23 below that of the previous year.

While standing in five Grade XIII papers, including one English paper, was the academic requirement for admission to the course leading to the Interim First Class certificate in the Provincial Normal Schools in September, 1951, a survey revealed that 64% of the students in attendance held standing in eight or more Grade XIII papers, or possessed academic qualifications equivalent or superior to such standing. Included in this group were 63 University graduates.

REVISION OF COURSES

A revision of the Calendar of the Normal Schools was undertaken in the year under review. In the revised programme the courses of study were outlined in general terms only; the determination of the detailed treatment of these outlines became the responsibility of each Normal School. Principals and staffs thus assumed a greater share in the planning and presentation of their courses.

Emphasis in practice-teaching shifted from the single lesson to more extended periods of observation and practice. The course in Educational Psychology, which in the revised programme replaced the former course in Science of Education, gave attention to three fields: Child Study, Mental Health, and General Metho-

⁷ See tables on p. 44

dology. The allotment of time for this phase of the programme was approximately doubled. Provision was made in the calendar for the discontinuance of uniform departmental examinations for the Normal Schools, and for final examinations to be set by the staff of each school.

Underlying the changes outlined is a policy whereby each Normal School is encouraged to do, in its own way, the best work of which it is capable.

RECRUITMENT

Candidates for admission to the Ontario College of Education were interviewed by a Committee of Selection, as has been the case for some years.

The policy of organizing a Committee of Selection at each Normal School, begun in the previous year, was continued in 1951. The Principal of the Normal School acted as Chairman and other members were Normal School masters and representatives of the Inspectoral staff and the Ontario Teachers' Federation. Of the 2,469 candidates interviewed by the Normal School committees, 1,628 or 66% enrolled.

TEACHER-SUPPLY

For the school year 1951-52 the supply of teachers for secondary schools was adequate except in the field of girls' Physical Education and in the field of Home Economics.

The supply of teachers for elementary schools was, however, still below requirements. Normal School Summer Sessions for the training of teachers employed on Letters of Permission were again held at the Normal Schools in Toronto and North Bay. Applicants for these courses were required to hold at least Grade XII standing and to have taught in the Province for at least five months. A total of 220 candidates qualified for Deferred Interim Second Class certificates at the first year course and 263 candidates qualified for Interim Second Class certificates at the second year course of the Summer Sessions.

MEDICAL EXAMINATIONS

As a result of the medical examinations of applicants for admission to the Normal Schools and of those attending the Ontario College of Education during the year, seven applicants were rejected and 39 were required to waive disability privileges under the Teachers' Superannuation Act. The cost of these medical examinations is met partly by fees paid by the students and partly by the Department of Education and the Teachers' Superannuation Commission.

Schools Attended by French-speaking Pupils

TEACHER-SUPPLY

In 1950-51 there were 155 teachers-in-training at the University of Ottawa Normal School, 13 of whom were enrolled in the First Class course and 142 in the Second Class course. As a result of the term and final examinations 12 students were awarded First Class certificates, and 127 obtained Second Class certificates.

There were in this school year 1,835 French-speaking teachers employed in the elementary schools. Of this number 1,580 or 85.25% held First or Second Class certificates.

SECONDARY SCHOOL CLASSES

The total enrolment of French-speaking students taking advanced French courses in secondary schools was 2,475.⁸

To give a more complete picture of the secondary school enrolment it should be added that besides the 2,475 students reported above there were 1,601 French-speaking pupils enrolled in Grade IX and Grade X classes of elementary schools and 1,903 French-speaking students attending inspected private secondary schools in Ontario. Inspected private schools may, on the recommendation of the Inspector, qualify for certain privileges in reporting the standing of their pupils.

ELEMENTARY SCHOOLS

There were 54,545 French-speaking pupils enrolled in June, 1951, in Separate and Public Schools, an increase of 1,958 over the preceding year.⁹ The total of 54,545 includes 1,601 students in Grade IX and Grade X classes in elementary schools, and 214 pupils in auxiliary classes.

CORRESPONDENCE COURSES

In June, 1951, ended the ninth school year in which correspondence courses for French-speaking children of Ontario were given by the Department of Education. All the courses for pupils of Grade I to Grade VIII have been available since September, 1946.¹⁰

A complete revision of the courses for the Primary and Junior Divisions (Grades I to VI) was undertaken during the year. Enrolment figures are shown in Part II of this report.¹¹

Agriculture

The regulations of the Department of Education provide for instruction in Agriculture in elementary and secondary schools as an optional subject, and for the payment of special grants where such instruction is offered. Emphasis is placed upon the importance of agriculture and the interdependence of urban and rural communities.

ELEMENTARY SCHOOLS

In elementary schools Agriculture as an optional subject may be taken in Grades VII and VIII. Reports were received from 1,299 schools of which 700 were eligible for grants. It is worthy of note that the remaining 599 schools taught Agriculture, though not eligible for grants as the teacher held no special certificate in Agriculture.¹² Practical activities are required in all schools where Agriculture is a regular subject of instruction. Present courses also provide that Agricultural topics may be studied with the Natural Science courses of Grades IV, V and VI and in General Science of Grades VII and VIII.

Interest in activities under the Inter-Departmental Committee of the Departments of Agriculture, Education, and Lands and Forests was well maintained. These activities include School Fairs, Forestry Clubs, and participation in contests for the improvement of school grounds.

⁸ For tables see p. 90

⁹ For tables see p. 81

¹⁰ See also p. 24

¹¹ For tables see p. 81

¹² For tables see p. 161

SECONDARY SCHOOLS

Instruction in Agriculture is provided in the secondary schools in two ways. There are courses in Agricultural Science which are optional with General Science; in these Agricultural topics are taken in Grades IX to XII with the topics of the Science courses. These courses are taken in Grades IX to XII in 149 schools and in Grades IX and X in 36 schools. These courses have met with general approval and are largely taken in schools serving rural areas. The Boards have provided reference books, magazines and equipment relating to agricultural topics. Many of the smaller schools cannot provide any other form of agricultural instruction.

The other type of organization is found in schools taking Agricultural Science that have adopted the programme under Regulations for Departments of Agriculture. This programme includes essentially a two-year general course through Grades IX and X and provides for instruction in Agriculture and Shop Work for boys and Home Economics for girls. Commercial Work is optional with the languages in Grade X. In addition provision is made for visits to homes of pupils during the summer months by the principal and teacher, for the serving of a hot dish at noon hour, and for the use of the school as a community centre. The revised programme was initiated in the summer of 1944 and the number of schools now in operation has increased from 12 to 77.¹³ Departments of Agriculture are in operation in 75 of these schools under General Regulations and in two schools under Vocational Regulations, making a total of 77. The number of these schools has shown a regular increase each year since 1943-44 when 12 schools were taking work beyond Agricultural Science.

TEACHER-SUPPLY

As indicated by the number of teachers granted permission there is still a shortage of teachers, mainly in smaller schools. All schools with Departments of Agriculture have qualified teachers. The need for additional teachers is being met by Ontario Agricultural College graduates who attend the College of Education (21 this year) and through Summer Courses in Agriculture at the Ontario Agricultural College. The number of teachers granted permission is four fewer than last year.¹⁴

PRACTICAL WORK

There are now fifty-two schools with special Agricultural classrooms. Practice in Agriculture is provided in gardening and experimental plots in 141 schools, in the care of poultry during the winter and raising chicks in the spring in 75 schools, in beekeeping at 60 schools, in greenhouse practice at 3 schools. Buildings for agricultural purposes have been built at twelve schools. These buildings provide storage space for implements, a poultry pen, a vegetable storage room. In some cases provision is made for housing a beef animal or a pig for a few weeks. In addition, provision is made for supervising home projects by the teacher during the summer months. These projects include activities in calf clubs, poultry clubs, home garden clubs, swine clubs, grain clubs and practical farm operations, which in several areas are supervised jointly by the teacher of Agriculture and the Agricultural representative. Several thousand pupils attended the Royal Winter Fair in November by special arrangement.

TEACHER-TRAINING

Instruction in Agriculture is a part of the regular course at Normal Schools. The instructors are capable and a good course is given as far as the time allot-

¹³ For tables see p. 161

¹⁴ For tables see p. 162

ment on the Normal School programmes will allow. Normal School students who have taken four years of Agricultural Science during the High School course are eligible for the Interim Elementary certificate on completion of the Normal School course. Others must attend summer courses to secure the certificate. The enrolment in the Summer School for 1951 was as follows: Elementary, 16; Intermediate I, 12; Intermediate II, 18; Inspectors, 3; total 49.

GRANTS

Grants for 1951 for Agriculture in elementary schools totalled \$19,123.50, and grants for Agricultural Science and Departments of Agriculture totalled \$136,511.14.

Art

PUBLICATIONS

Following a research project in the kindergartens of Ontario in which 9,000 children were studied, the booklet **ART EDUCATION IN THE KINDERGARTEN** was published in 1951. This illustrated publication outlines the normal progress made by young children in their art expression. It also outlines recommended teaching procedures which have proved to be successful in kindergartens.

The handbook **ART AND CRAFTS IN THE SCHOOLS OF ONTARIO** and the pamphlet **CHILDREN AND THEIR PICTURES** have been issued in second editions and distributed to new teachers.

CHILDREN'S WORK

An exhibit of work by children living in many countries throughout the world was collected for display at the 18th International Red Cross Conference in Toronto. Travelling exhibitions of similar work have also been arranged by the committee for showing in the schools of Ontario and later in the rest of Canada. Collections of work of Ontario children have also been supplied to Unesco.

SPECIAL RESEARCH PROJECT

Saturday Morning Classes conducted for the purpose of studying brilliant children who are engaged in art work were held in the Ryerson Institute of Technology from October to March, inclusive.

SUPERVISION AND TRAINING

Meetings of teachers have been held in some fifteen Inspectorates with illustrated lectures in which particular emphasis was placed upon picture-making. The Summer Courses in Art had again to be limited to an enrolment of 500. Some thirty community programme workers were included in this number.

Audio-visual Education

SCHOOL BROADCASTS

A programme of ninety-eight school broadcasts covering fifteen different school subjects was prepared for use in the elementary and secondary schools of the Province. These broadcasts were presented in co-operation with the Canadian Broadcasting Corporation over a network of twenty-three radio stations. A teacher's manual outlining the programmes was distributed to all Ontario teachers in September.

Two surveys of the educational value of these broadcasts were made during the year. Helpful comments and criticisms were received and some changes in planning were made as a result of suggestions.

The steady improvement in the quality of programmes offered to schools is reflected in the increased number of schools receiving free radio licenses from the Department of Transport. Four hundred and eighty-one additional schools applied for these licenses in the year, and 45.8% of Ontario schools are now making some use of school broadcasts.

Exchange broadcast series from other Provinces and the British Broadcasting Corporation continue to receive favourable comments, and indicate that this policy has proved its value in planning the school broadcast schedule.

FILMS AND FILMSTRIPS

Approximately one hundred and twenty additional schools registered with the Visual Education Branch for film service during this year. A new Visual Education catalogue was prepared and distributed to all Ontario schools using the film services of the Visual Education Branch. This catalogue contained descriptions of 730 sound films, with a correlation section planned to guide teachers in their most effective utilization in the Programme of Studies. A separate listing of films considered suitable for teaching Conservation was included, as well as a section recommended for use by Home and School Associations.

Revision of the recommended filmstrip lists for elementary and secondary schools served to stimulate further interest in this visual aid. Many schools are now making good progress towards building up their own local libraries of filmstrips.

TEACHER-TRAINING

A summer course in Audio-Visual Aids was held in Toronto during July and August. Demonstration lessons illustrating the approved techniques for classroom utilization of all types of Audio-Visual Aids were given by experienced teachers. Training and practice were provided in the operation of all types of Audio-Visual equipment.

Auxiliary Education

A periodic review of progress is sometimes helpful. The last twelve years, 1939-1951, have seen many changes in attitudes toward Auxiliary Education as well as improvement in organization.

ORGANIZATION OF CLASSES

An increase of over 50% in the number of special classes has occurred during the twelve-year period. The greatest increases are shown in the Handicraft, Health (Open Air), Orthopaedic, Oral, Speech Correction and Lip Reading and Sanatorium Classes.¹⁵

The cumulative effect of repeating a grade or grades or of being promoted on trial or of failing to reach the grade standards in Reading, Spelling, Arithmetic and Language appears among slow normal pupils registered in Grades IV, V, VI and VII. This situation has been met by the organization of 59 Handicraft Classes for pupils who are thirteen years of age.

Open Air (Health) Classes have almost doubled in numbers but are still found only in Toronto, where there are 24 of these classes for mal-nourished and nervous children. The children enrolled in these classes have extended rest periods and a

¹⁵ For tables see p. 73

shortened period of instruction. The results indicate that, with additional rest, food and care, the children become more robust, emotionally more secure and able to earn regular promotions.

The Oral Classes for the deaf have increased threefold. All classes are now equipped with group hearing-aids and auditory training units, and the result is the development of superior speech and language habits among deaf pupils. The Nursery School for the Deaf at King Edward School, Toronto, has demonstrated the effectiveness of beginning training two years earlier than the normal age for school entrance.

The Orthopaedic Classes for the crippled are now more than three times the number in operation in 1939. Most of these classes have been organized under Section 66 of The Public Schools Act to provide special educational facilities for cerebral palsied children, such as the Red Cross School in Windsor, the Chatham C. P. Centre, Woodedden Hospital School, the Ottawa C. P. Centre, and St. Paul's C. P. Centre (Toronto). The Toronto General Hospital School and Variety Village Schools provide respectively for secondary education and vocational training of cripples.

The Sanatorium Classes for juvenile and adult patients suffering from tuberculosis have changed in character. Before 1939 the teacher enrolled only elementary school pupils, but since that date adults have been regularly enrolled. Education in a Sanatorium School has developed to the point where it has become rehabilitation training designed to provide the patient with new skills by which he can secure employment without endangering his health.

Speech Correction and Lip Reading Classes have increased in number from 10 in 1939 to 30 in 1952. These serve pupils with defective hearing and also those who have impediments or other defects of speech.

PROBLEMS

The difficulty in trying to provide individual educational plans for one thousand or fifteen hundred pupils annually is obvious. Some general plans are required which can be varied to meet the requirements of special cases. Twenty-two pamphlets have been prepared for circulation among the school inspection staff and the special class teachers, to enable them to formulate individual plans.

The infant blind who are emotionally insecure and socially unacceptable cannot be admitted to the Ontario School for the Blind. Home training by officers of the Canadian National Institute for the Blind or by teachers employed by local Boards of Education has helped a number of these cases in the past two years to the point where they can profit by instruction either in the School for the Blind or in special classes.

Special classes have been provided in some localities for children who are inadmissible to an Auxiliary Class. In Toronto, York Township, and Kirkland Lake these classes have demonstrated that social training can be done effectively and that some of the children can develop to the level at which they can be accepted in a Handicraft Class.

At the secondary school level the education of the physically handicapped, particularly the home-bound, presents special problems. Some may profit by correspondence courses but visiting teachers are necessary in many cases. Secondary units have been provided by the Department of Education since 1941 and habilitation units since 1944 to meet the needs of crippled adolescents and adults.

Experiments in Brockville, Toronto, and Fort Erie secondary schools have shown that special classes can do much to help slow learners to make the adjustments needed during adolescence if a trained teacher of the right temperament is in charge. Other experiments have been carried on in two Toronto Collegiates with pupils experiencing reading difficulties. An intensive remedial programme carried on daily for a few weeks or months, with specially trained teachers, has been found effective.

Correspondence Courses

HISTORICAL SUMMARY

Until 1926 there was no place in the educational system of the Province of Ontario for the boys and girls who lived in isolated districts nor for many unfortunate children who, because of illness or physical disability, had to forego the advantages of school life. It was to meet the needs of these children and with the belief that it was in the best interests of the Province to see that every child had access to some means of education that the Ontario Department of Education instituted Correspondence Courses.

From the beginning the instruction offered through correspondence courses in this Province has been free. At first pupils from 6 to 21 years of age were enrolled and also a few parents who wished to keep ahead of their children in their work. Later more adults were allowed to enrol until at the present time there is no age limitation. In fact, some courses in Elementary English, Arithmetic, and Social studies have been written especially for adults. Lessons find their way to homes in all parts of the Province, to patients in hospitals and sanatoria and to inmates of penitentiaries and reformatories. Children of Ontario business men resident abroad, of government officials overseas, and of missionaries, depend on the Correspondence Courses for their schooling.

The courses began with a bare minimum of the eight elementary school grades; subjects of Grades IX and X were added in 1935; bilingual lessons for French-speaking pupils in the elementary section were introduced in 1942; and in 1950 a programme of expansion was begun to provide a complete academic course to the end of Grade XIII and a programme of revision to bring up to date all the courses in Grades I to X. Since the beginning of this extension in 1950 other subjects of Grades IX and X, subjects of Grades XI, XII and XIII, and the special elementary school subjects for adults have been prepared and are in use. Additional subjects are at present being prepared in Grade XIII.

Revision has proceeded to the end of Grade VI. The revised courses in Grades I to VI are completely new—in appearance, in organization, and in the manner of presentation of material. They have been written by outstanding classroom teachers, are modern in method and content, and are cleverly illustrated by professional illustrators. Art and Natural Science, now included as subjects of importance, help to increase the effectiveness of the courses as a substitute for school life and activities. The Art is designed to guide pupils, even in the earliest grades, to find satisfaction in telling their experiences through pictures as well as through words, and the Natural Science to encourage habits of observation of the world around them. The interest roused and the splendid results received seem to justify the special care put into the preparation of these new courses. An equal improvement is planned for the bilingual courses of the corresponding grades (being prepared now) and for the courses in Grades VII to X.

COURSES AVAILABLE

In 1951 the work of the Correspondence Courses was transferred from the Public and Separate Schools Branch to become a separate branch. Courses were made available to any person who could not attend school. At the elementary school level there are courses for children in all subjects of Grades I to VII (English and English-French), and courses for adults in Arithmetic and English covering the work of Grades IV to VIII approximately. At the secondary school level the following subjects are available: Grade IX English Composition, English Literature, British History, Geography, General Mathematics, General Science, French, Typewriting, Home Economics; Grade X English Composition, English Literature, Canadian History, Geography, General Mathematics, General Science, French; Grade XI English Composition, English Literature, Ancient and Mediaeval History, Algebra,

Physics, French, Latin; Grade XII English Composition, English Literature, Modern History, Chemistry, French, Latin; Grade VIII English Composition, English Literature, History, Algebra, Geometry. Courses in Grade IX Woodworking, Grade X Latin, and Grade XII Geometry are in preparation. Under an agreement with the Government of Canada, the Provinces are making available outside their own bounds certain trades courses intended for people actively engaged in related fields. As its contribution to the plan, Ontario is preparing first, second and third-year courses in Carpentry, Automotive Mechanics, Machine Shop Practice, and Radio Theory and Practice.

ENROLMENT

In December, 1951, the enrolment in the courses for English elementary grades was 933 and in the courses for French-speaking pupils 181. There were 178 pupils in courses for Grades IX and X and 187 in those of Grades XI, XII and XIII.¹⁶ It will be seen that, as regular schooling becomes more accessible, enrolment in the Correspondence Courses is decreasing in Grades I to X. However, even though enrolment in these grades falls, there will always be the need of assisting the physically handicapped and those in remote parts of the Province and indications are that the decrease will be balanced by a rapid increase in the enrolment in Grades XI, XII and XIII and in the Trades courses. No publicity has been used to bring about enrolments shown for these senior grades. Interesting facts in this connection are that requests for Grade XIII are now more numerous than for Grades XI and XII and that more than 25% or those enrolled in Grade XIII are teachers wishing to improve their qualifications.

The peak enrolment for 1950-51 was 1,659 on April 6, 1951. During the year there were 1,348 new enrolments. While 75% of the children enrolled in the elementary grades were from the Districts of Ontario, the remainder came from over 50 County Inspectorates.

The Correspondence Courses library, set up in 1949 to supply supplementary reading to those students in Grade VIII who would otherwise have no access to suitable reading material, is gradually being enlarged and at present lends books in Grades IV to VIII and to those studying English in Grades IX to XIII.

The inside staff of the Branch was composed of 30 teachers, 9 clerks, 6 part-time typists, 3 machine operators. In addition, the services of 2 illustrators, 50 authors, 29 part-time secondary school teachers and one part-time Art teacher were engaged. The policy of having courses written and marked by teachers actively and successfully engaged in teaching in schools is an innovation. These teachers have a valuable contribution to make in establishing new courses and maintaining a high standard in the Branch.

Examinations and Scholarships

DEPARTMENTAL EXAMINATIONS

Statistics showing the results of the Grade XIII and the Normal School examinations, as well as the number of Intermediate Certificates, Secondary School Graduation Diplomas, and Secondary School Honour Graduation Diplomas, will be found in Part II of this Report.¹⁷

Commencing with the school year 1950-51, the issuance of Departmental certificates of Grade XII standing was discontinued. The Secondary School Graduation Diploma of the General Course, indicating the four or five optional subjects taken, is the only official document held by those candidates who in 1951 completed the work of Grades XI and XII of the General Course.

¹⁶ For tables see p. 163

¹⁷ For tables see p. 114

STUDENT-AID

(a) Dominion-Provincial Student-Aid Bursaries

The purpose of these bursaries is to assist students of adequate ability who are financially unable to continue their education. In 1943-44 when the first scholarships were established, 192 applicants were awarded a total of \$45,950. In 1950-51 a total of 1,253 students received bursaries totalling \$259,767. The contribution of the Government of Canada to the bursary programme has increased from \$31,974 in 1944-45 to \$60,000 in 1950-51.¹⁸ In the same period the Provincial contribution has increased from \$100,000 to \$199,767.

(b) Transportation Assistance

The transportation subsidies provided by the Department of Education for persons who reside in the territorial districts and are enrolled at an eligible institution of university rank have now been in operation for five years. In 1951 the sum of \$12,183.95 was paid in transportation assistance to 602 students. Of these 174 reside west, and 428 east, of Sault Ste. Marie.¹⁹

(c) Scholarships for Post-Graduate Study in France

The Department of Education Act provides for the payment out of the Consolidated Revenue Fund annually the sum of \$6,000 to be awarded by the Minister of Education in scholarships to residents of Ontario for the purpose of enabling them to pursue courses of study in France. For the school year 1951-52 the holders of these scholarships were Miss Rhea M. Hancock of Hon. J. C. Patterson Collegiate Institute, Windsor, Miss Sadie Miller of Fort William Collegiate Institute, and Mr. Lucien Seguin of Russell Separate School.

INTERCHANGE OF TEACHERS

The Department of Education encourages interchange of teachers as a means of maintaining Commonwealth unity, of promoting national and international goodwill and understanding, and of broadening teachers' interests and their knowledge of educational methods.

For the school year 1951-52 twenty-seven exchanges were arranged, nineteen with the British Isles, six with other Provinces of Canada, and two with the United States.

Guidance

Guidance has become an important part of the educational service provided by the schools. The improvement of the efficiency of this service is the constant concern of the Department.

INFORMATION

The provision of precise and up-to-date occupational and educational information remains a major objective. The monthly Mailing Service, provided by the Vocational Guidance Centre, provides the basis for active files of information in the schools. The universities and other training schools, as well as business, professional and industrial organizations have provided much additional material for distribution through the Mailing Service. The Research and Statistics Branch of the Federal Department of Labour has provided information on a national scale. By December, 1951, fifteen occupational monographs, fifteen pamphlets, and a

¹⁸ For tables see p. 116

¹⁹ For tables see p. 116

booklet entitled "Careers in Natural Science and Engineering" were distributed to schools.

McMaster University, Queen's University, the University of Western Ontario, and the Ontario Agricultural College have called conferences with Principals and counsellors to discuss problems common to the secondary school and the university. These have proved helpful in fostering mutual understanding and in emphasizing the continuity of guidance service.

A series of five radio broadcasts along with lesson aids was again presented. Careers Days, plant visits, films, and conferences provide additional sources of information on the local level. A recent innovation is the Educational Conference. Similar in organization to Careers Day, it brings to the school representatives from the University, Normal School, Technical Institutes and other training centres to discuss with students their plans for further education.

RECORDS

An adequate system of record-keeping within the school is of great importance both to the principal and to the teacher of guidance. If records can be kept in such a form that they are readily transferable between schools their value is increased. A new form of cumulative record was distributed in September, 1950 by the Vocational Guidance Centre of the Ontario College of Education for the consideration of administrative officials and Principals. It has been adopted in many schools.

TRAINING

One hundred and twenty-seven teachers were enrolled in the three summer courses leading to Elementary, Intermediate, and Specialist certificates in guidance in the summer of 1951. The total number of teachers now holding recognized Ontario Guidance certificates is approximately one thousand. Nevertheless, there are still some fairly large schools without any teachers who have had guidance training.²⁰ Lack of trained leadership continues to be a major defect in guidance; the untrained or inadequately trained enthusiast is a liability rather than an asset.

Music

MUSIC INSTRUCTION

In more than eighty-six per cent of the classrooms in elementary schools in Ontario qualified Music teachers provided regular courses in Music in 1951.²¹

There were 385 secondary schools in which a course in Music was offered, either vocal or instrumental, or both.²² Schools choir were found in 204 schools, orchestras in 62, and bands in 48.

TEACHERS AND TRAINING

Certificated teachers and supervisors of Music numbered 732 in the elementary schools and 337 in secondary schools. A few of these teach in both. The enrolment in the summer school in Music in 1951 was 395. Nine different courses in vocal and instrumental music were offered. Music is a regular subject of instruction in all the Normal Schools.

²⁰ For tables see p. 163

²¹ For tables see p. 162

²² For tables see p. 162

MUSIC OPTION

Music is an optional subject in Grades X to XIII. Standing may be obtained either by taking a course in the school or by submitting certain certificates of the Royal Conservatory of Music in Toronto or of other accredited examining bodies. In 1951 Grade XII standing was secured by 703 pupils. Grade XIII standing was obtained by means of Conservatory certificates by 283 pupils in 107 schools and through the departmental examinations by 114 pupils.

MUSIC FESTIVALS

Music festivals have been encouraged as a means of motivating classroom work, establishing standards of performance and stimulating public interest. The number of festivals held during 1951 in which more than one school participated was approximately 125. Nearly every part of the Province was represented.

RADIO

During January, February and March the Department, in co-operation with the Canadian Broadcasting Corporation, presented twenty-five Music broadcasts in four series, i.e., "Primary School Music", five fifteen-minute programmes for Grades I - III; "Junior School Music", five fifteen-minute programmes for Grades IV - VI; "Music for Young Folk", ten thirty-minute programmes for Grades VII - X; "Ontario Sings", five thirty-minute programmes for Grades V - VIII. For all these broadcasts the commentary was prepared and given by the Provincial Director of Music.

CONCERTS

To bring live music of high quality to secondary school pupils in smaller communities, and to encourage young artists who are for the most part graduates of the Ontario schools, the Department has arranged during six years 627 concerts by 184 artists. In 1950-51, seventy-five artists have given 153 concerts in 43 towns.

MUSIC SCHOLARSHIPS

Music scholarships, formerly awarded by the Junior Leagues of Hamilton and Toronto, were discontinued in 1949-50. In the year 1950-51 the Department of Education awarded scholarships amounting to a total of \$1,000.00 to pupils in Grades IX and X of Ontario schools. The scholarships were for performance on any recognized instrument. One hundred and twelve young school musicians were nominated for these awards.

School Attendance

ENROLMENT

The total enrolment of all schools of the Provincial system, exclusive of night school classes, for the school year 1950-51 was 768,307, an increase of 23,031 over the previous year. The elementary schools showed an increase of 19,398 and the secondary schools an increase of 3,633. The attendance at Continuation Schools showed a decrease of approximately 20 per cent. This decrease has been brought about by the transfer of pupils from these schools to the better equipped schools of new High School Districts.²³

²³ For tables see p. 93, 103, 119, 137, 141

SCHOOLS AND TEACHERS

During the school year 1950-51 there were 5,863 Public Schools and 965 Separate Schools in operation. The staffs of these schools numbered 17,321 and 3,928 respectively, a total increase of 1,203 over the previous year.²⁴

ATTENDANCE

The percentage attendance for elementary schools was 92.8 and for secondary schools 94.9. Illness was responsible for 73 per cent of the absence, an increase of almost 3 per cent over 1949-50.²⁵

EMPLOYMENT

The number of school children's employment certificates issued during the calendar year was 833. These certificates, valid for not more than six weeks in a term, are issued only to children under fourteen years of age. The number of home permits issued to pupils from fourteen to sixteen years of age was 1,300, and the number of employment certificates issued to pupils from fourteen to sixteen totalled 4,784, an increase of 319 over the previous year. As a pupil must obtain a certificate for every change of employment the number of certificates issued is always greater than the number of pupils requiring them.²⁶

Physical and Health Education

PROGRAMME-PLANNING

Many teachers of Physical and Health Education are now using the growth and development needs of children as a basis for planning a health programme for Grades I to XIII. Programmes planned to meet the growth needs of children usually result in a better use of instructional equipment and facilities. The content and sequence of the following programmes have been found satisfactory and well adapted to the changing needs of children. In the Primary Division, singing games, play gymnastics to music, basic body movements of running, jumping and throwing, and games of low organization are included. The Junior Division includes elementary dance movements, general activities, and introductory activities in ball-handling skills. In the Intermediate Division, stress is placed on lead-up games as an introduction to the more advanced major games, suitable group games, gymnastics and the dance. In the Senior Division, attention is directed to the social dance, advanced team games, inter-class and inter-school competition and games such as badminton, golf and tennis which have recreational value for the individual.

Three members of the staff and sixteen Ontario teachers conducted a workshop for the purpose of reviewing and evaluating present courses in Health Education. This Branch co-operated with a graduate of the Yale School of Alcohol Studies in preparing an alcohol manual for teachers.

TEACHER-TRAINING

Last year there was a small surplus of qualified men teachers of Physical Education. There is still a definite shortage of qualified secondary school women teachers of Physical Education. The rapid growth of Physical and Health Education in elementary schools has opened up many opportunities for qualified teachers.

²⁴ For tables see p. 38

²⁵ For tables see p. 55

²⁶ For tables see p. 55

Nine teacher-training services were provided and were used by 237 rural school teachers. One hundred and sixty-five elementary and secondary school teachers were visited as a result of requests for Permanent Certificates. Five area instructional schools were operated for the purpose of improving officiating. Many teaching aids were prepared and issued to teachers in the field. Summer school courses attracted one hundred and twenty-seven elementary school teachers, forty-six secondary school women and twenty-five secondary school men teachers.

CAMPS

Four youth-leadership courses were conducted at Lake Couchiching. These courses were of two weeks' duration. Each secondary school in the Province was permitted to select one boy and one girl on the basis of a suitable academic record, athletic ability and an interest in extracurricular activities. There were in attendance at these courses 233 secondary school girls and 222 secondary school boys. These students are providing leadership in the extracurricular activities of the school and are making available a reservoir of leaders in community service.

This camp site was chosen for the first Home and School Association camp leadership course. This was held for a week during the month of June.

The Department of Education through this Branch offers a Counsellor-in-Training Course to non-profit camps. The camps are responsible for selecting the boys and girls who have a desire to give service in this field. Belwood Lake Camp, situated at Fergus, operated two three-week courses with an attendance of 134, while Bark Lake Camp, situated at Irondale, operated two three-week courses with an attendance of 127 boys. On completion of the course each camper is required to spend two weeks giving his services to a non-profit camping organization. Reports show that graduates of these courses are giving an excellent account of themselves, considering the short training period.

Subsidies amounting to approximately thirty-five thousand dollars were paid to 230 non-profit camps. The camps receiving this assistance provided camping experience from six to fourteen days for more than thirty thousand boys and girls.

Community Programmes

Provincial services in the fields of community recreation and adult education are administered through the Community Programmes Branch. These services are designed to encourage the development of programmes of cultural, social, physical and educational activities sponsored by public and private agencies in communities throughout the Province. In the main, these services consist of annual grants to municipal councils which establish and maintain public recreation programmes, technical advisory services to municipal and community organizations, training courses for activity or group leaders, the preparation and circulation of bulletins, manuals and materials for training courses, and providing training for immigrants in Citizenship and Basic English.

ANNUAL GRANTS

Annual grants are paid to municipalities which appoint Municipal Recreation Committees under the regulations of the Department of Education, and which establish and maintain recreation services. One hundred and sixty-eight municipalities have organized public recreation programmes, and of these approximately 60 municipalities employ full-time Directors of Recreation. In 1945 eighteen municipalities received grants totalling \$10,213.90. It is estimated that in 1952 one hundred and forty municipalities will receive \$250,000.

Grants are also made to provincial organizations conducting programmes of recreation.

In 1951 amendments were made to the regulations, making it possible for school boards in unorganized territories to be assisted in conducting community programmes of recreation, and enabling financial assistance to be given to municipalities which own, operate and maintain museums as a service to the community.

ADVISORY SERVICES

The Branch provides advisory services to community groups and interested citizens through a headquarters staff of technically trained advisers and through a staff of fourteen field representatives operating from six district offices located in Fort William, North Bay, Ottawa, London and Hamilton. During 1951 over 3,700 advisory or consultation visits were made to Ontario communities by the field and advisory staff. The volume and variety of the requests from community groups has made it necessary to offer assistance in the following fields: Municipal Organization for Recreation, Planning and Operation of Parks and Recreation Facilities, Social Recreation, Physical Recreation and Sports, Drama, Films and Radio, Family Relations, Citizenship Training, Employee Recreation Programmes, Art and Crafts.

LEADERSHIP TRAINING

Since the scope and extent of adult education and recreation programmes are largely dependent upon the availability of trained leaders, the policies and resources of the Community Programmes Branch are primarily directed toward leadership training.

In 1951 a three-year course of training for Municipal Recreation Directors was established leading to Provincial certification. This course, which is partially taken by correspondence and partially by attendance at lectures, seminars and workshops held in various regions throughout the Province, has an enrolment of seventy.

Community group leaders were provided with courses in Art, the use of Audio-Visual Aids, Parent Education and Family Relations, Leadership Techniques, Hand-crafts, Physical Recreation and Sports Coaching, Social Recreation, and Theatre. Altogether 222 courses with a total enrolment of 9,203 were held in centres throughout the Province.

Rural group leaders attended night schools operated jointly by the Community Programmes Branch and the Department of Agriculture. In 1951 twenty of these schools offering instruction in from five to ten of the following subjects were conducted: Woodworking, Public Speaking, Sewing, Motor Mechanics, Folk Dancing and Singing, Hobby Crafts, Welding and Metalcraft, French, Farm Engineering, Drama, Weaving, Farm Science, Farm Machinery, Music, Wood Refinishing, Leathercraft, Home Decorating, Home Building and Repairs, Radio, Electricity, Shop Work, Art, Plastics and Art Metal Work, Oil Painting, Design, Home Nursing, Food and Nutrition, Rural Planning, Bookkeeping, Typing and Shorthand.

Advanced summer courses in Art, Crafts, and Theatre are given to teachers and community leaders by the staff of the Branch at the regular summer schools of the Department.

PUBLICATIONS

There has been a marked increase during the past year in the demand for publications and instructional material on recreation and adult education which are prepared and issued by the Branch. These include the Community Courier, a monthly magazine of general interest; literature and instructional aids in Citizenship, Parent Education, Theatre, Hockey, Baseball, and Puppetry; and playground manuals on Art and Crafts, Quiet Periods, Sports and Active Games. Over 94,000 copies of these publications were distributed on request during 1951.

CITIZENSHIP-TRAINING

A training programme is conducted in Basic English and Citizenship for both newcomers to Canada and Canadian-born adults. Many of these classes are operated by local school boards, but in outlying districts classes are organized and teachers are paid directly by the Branch. Teaching aids and literature issued by the Federal Government or by the Branch itself are supplied to these classes and examinations are held and certificates of proficiency awarded which are accepted by the judges before whom these newcomers appear when applying for Canadian Citizenship certificates. In 1951-52 there were altogether 24,354 students enrolled in 846 Citizenship training classes. One hundred and thirteen of these classes were specially organized in places where school classes were not available.

Public Libraries

SERVICE

At the end of 1951 there were 540 agencies for public library service operating under the Public Libraries Act. Of these 217 were public libraries, 47 were branches of public libraries, 13 were county libraries and 263 were library associations. As will be seen in the statistics given on page 152 the contribution of the associations to the reading requirements of the Province is limited. One new county library, Victoria County, which was established in 1950, began operations in 1951 and is rapidly developing its service to rural schools, to small libraries within the county and to communities in which there has previously been no public book service.

BOOKMOBILES

The three full-service bookmobiles of York and Etobicoke Townships and the city of London continue to bear what might be termed a successful overload. The St. Thomas Public Library now operates a smaller vehicle which carries service to the city schools. Nine county vehicles are in constant use for the service of rural schools, local libraries and book deposit stations. In some counties service of a limited nature is also offered to individual borrowers.

GRANTS

Legislative grants paid to the libraries in 1951 totalled \$500,000. These were paid as follows: to public libraries, \$407,158; to library associations, \$33,496; to county libraries, \$53,800; special grants and adjustments, \$5,546.

USE OF BOOKS

A total circulation of books amounting to 14,850,000 was provided through the public libraries and library associations of the Province in 1950. Of these 951,000 were accounted for by county library books that do not remain permanently in any one library but circulate through all the schools and various other agencies within a county. The total circulation for the year is somewhat greater than that reported in 1949, but more important is the fact that the demand for better and more significant books, a demand long fostered by librarians throughout the Province, continues to grow.

NEW LIBRARIES

During 1951 one new public library, that of Virginiatown, was established. One new association was formed at Creighton Mine and two associations, those of

Stoney Creek and Terrace Bay, became public libraries. At the same time four associations, having failed to comply with the provisions of the Act, were removed from the list. They are Glamis, Jarvis, Mount Brydges and Sheguandah.

COST OF SERVICE

The total expenditures of the libraries in 1950 amounted to \$3,172,447, of which the public libraries spent \$2,948,689, the associations \$107,547 and the county libraries \$116,211. The total expenditure was \$201,000 greater than that of the previous year.

TRAVELLING LIBRARIES

A complete reorganization of the Teachers' Professional Library, a service designed for the assistance of the rural teachers, was begun in 1951 and will be completed in 1952. The response thus far has been encouraging. The whole use of travelling library books amounted to 63,382 carried chiefly in 1,400 box libraries. Of this number 50,804 children's books were used; 3,687 were read in secondary schools, 8,276 by adults, 559 by teachers and 56 were sent on other individual loans. The rural elementary schools thus continue to make by far the greatest demands upon the travelling library service.

Public Records and Archives

The outstanding event during the past year has been the removal of all the accumulated records and historical collections from the main Parliament Buildings to the new Archives Building. Parts of three floors in the Archives Building are now occupied by the Department of Public Records and Archives.

On the second floor a large room has been set apart as a Reading Room where students may work in comfort. The shelving in this room holds approximately 1,000 volumes. All filing cabinets of card indexes to the manuscript, pamphlet, book, and map collections, as well as calendars, inventories, and other finding aids, are located in the Reading Room, easily accessible to students. A microfilm reader is available, and a staff member is always present at the desk to supervise and assist students.

During the year a summary of the holdings of the Department was published in manuscript form.

MANUSCRIPT DIVISION

On one side of the Reading Room is the Manuscript Room, in which are housed many of the government records and the historical manuscript collections. New collections, of both government and historical manuscript material, have been added to the holdings; inventories of all new collections have been made for the benefit of officials and students engaged in research.

During the year the members of the staff have been engaged in examining records of the Departments of Education, Travel and Publicity, and Labour. By purchase or gift various private collections dealing with the history of the Province have been acquired:

Government Records

- (1) Department of Travel and Publicity. Various records of the Deputy Minister's office and of the branches of Publicity, Information and Development.
- (2) Department of Labour. Various records of the Deputy Minister's office, Chief Investigator's office, and the Employment Service Bureau.

(3) Department of Education. Miscellaneous letter books of the Department of Education (including letters from Egerton Ryerson and J. G. Hodgins), and minutes of the Council of Public Instruction.

Non-Government Collections

- (1) The papers of James David Edgar, Speaker of the Canadian House of Commons.
- (2) The diary of John Fairbanks, a pioneer in the Ontario oil industry.
- (3) The papers of Colonel C. L. L. Foster, at one time Assistant Adjutant-General of Upper Canada.
- (4) The papers of Samuel Bealy Harrison, private secretary to Sir George Arthur, and Provincial Secretary in the First Administration after the Union of 1841.
- (5) Correspondence of the Honourable George Henry, former Prime Minister of Ontario.
- (6) The papers of the late William Kirby, Canadian historical novelist.
- (7) Depositions regarding the activities of suspected persons concerned in the Rebellion of 1837.
- (8) Patents and other documents concerning the ownership of land in Ontario prior to 1812, from the files of the Upper Canada Land Company.

LIBRARY AND MAP DIVISION

Adjoining the Reading Room is the Library Stack Room housing a collection of periodicals, reference works, and 3,000 volumes on Ontario's history. During the year the task of cataloguing and classifying the books in the library was begun by a trained librarian. The periodicals have also been listed for the first time in the **Joint Catalogues of Periodicals and Serials in the Libraries of the City of Toronto**.

The pamphlet collection of some 7,000 items is now housed on the third floor of the building, along with the greater part of the collection of both printed and manuscript government records.

An intensive review of the map collection was carried out during the year and certain revisions were made.

The accessions for this period amount to 77 books, 45 pamphlets, 83 pictures, 146 maps, and 55 bound volumes and loose copies of newspapers.

INQUIRIES AND RESEARCH

In spite of the problems involved in the transfer to the new quarters, services to the public were maintained. During the year our facilities have been used by genealogists, research workers, civil servants and University students from the Departments of History and Geography.

Ontario School for the Blind

ENROLMENT

One hundred and eighty-three pupils, 90 boys and 93 girls, were enrolled at the Ontario School for the Blind in 1951. The total represents an increase of seven over the enrolment figure for the previous year. Five students left during the term. In June, 1952, the enrolment was 178, including 87 boys and 91 girls. Of these, 21 were from the Province of Manitoba, 18 from Alberta, 26 from Saskatchewan, and 113 from Ontario.²⁷

²⁷ For tables see p. 164

PROGRAMME

Continued effort was made to meet the individual needs of the pupils enrolled through a balanced programme of academic, physical and social activities. Academic instruction received the main emphasis in the school in all grades from I to XII. Of former students two have completed their third year in St. Patrick's College, Ottawa, one her first year at McMaster University, Hamilton, one his second year at McMaster, one his second year at the University of Western Ontario, London, and the sixth is continuing his study in Music at the University of Toronto.

During the year the music and dramatic department presented Gilbert and Sullivan's "Mikado" in the Eaton auditorium in Toronto, at Woodstock, and at Brantford. The Brantford presentation was broadcast in part by the C.B.C. on a national basis. The audience for these three presentations totalled almost 3,000.

As in former years, group and team activities were features of a vigorous programme in Physical Education.

Ontario School for the Deaf

ENROLMENT

The enrolment of the Ontario School for the Deaf during the school year 1951-52 was 362, an increase of 17 over the total of the previous year.²⁸ Most of these children were profoundly deaf. Their hearing losses in decibels for the better ear, as determined by the use of a pure-tone audiometer, were as follows: 90-100 decibels, 175 pupils; 80-90 decibels, 63 pupils; 70-80 decibels, 59 pupils; 60-70 decibels, 35 pupils; 50-60 decibels, 23 pupils; 40-50 decibels, 4 pupils; 30-40 decibels, 3 pupils.

The seven pupils with hearing losses under 50 decibels were not only hard-of-hearing but lived in communities where special provision could not be made for their education.

PROGRAMME

During the period under review there was no significant change in the programme of instruction. Improved accommodation for the teaching of agriculture and mechanics was provided through the remodelling of an unused building, which now serves as an additional Vocational shop. School plays and pageants were presented to large audiences in the school auditorium, and the pupils participated in these activities with interest and enthusiasm. The annual visiting day and display of work from academic and Vocational classes in June was well attended.

Service Record

IN MEMORIAM

W. L. BOWDEN, B.A., was born at Vittoria in Norfolk County. He attended the Vittoria Public School, the Simcoe Model School, and the Hamilton Normal School. He taught in the public schools in S.S. No. 10 Charlotteville and S.S. No. 19 Townsend. For six years he served as principal of the Port Colborne Public School. Later he became principal of the Dresden Continuation School. Mr. Bowden graduated from Queen's University and then served as principal of the New Hamburg Continuation School and the Port Rowan High School. In 1925 he

²⁸ For tables see p. 165

was appointed Inspector of Public Schools for Essex County, and in 1940 was transferred to the Norfolk inspectorate. He retired in August, 1946. He did much to advance the cause of education as a teacher, as a principal, and as an inspector.

WILLIAM A. MARSHALL, B.A., B.Paed., was born in the Town of Lindsay where he attended the elementary and secondary schools. He was a graduate of Queen's University and the University of Toronto. He taught for two years in rural schools, and in 1915 was appointed to the staff of the Ryerson Public School, Toronto. Later he served as principal of Deer Park Public School, Toronto. In 1931 Mr. Marshall was appointed Public School Inspector for Simcoe West, with residence at Collingwood, and later was transferred to the inspectorate of Lincoln County. Mr. Marshall will long be remembered for his efficient service as a teacher, as a principal, and as an inspector.

THOMAS P. MAXWELL, B.A., former inspector for Carleton County, was born in Glasgow, Scotland. He came to Canada at an early age, attended public and high school at Sydenham, Ontario, and graduated from Queen's University. Mr. Maxwell was associated with the teaching profession for over fifty years. His teaching experience began in elementary schools in the neighbourhood of Kingston. He was principal of Victoria Public School in Kingston for a time, and in 1914 joined the public school staff in Ottawa, where he taught at Kent Street School. Mr. Maxwell was appointed Inspector of Public Schools for the County of Carleton in 1921, and held the position for twenty-three years until his retirement in 1944.

RETIREMENTS

MELVIN R. FYDELL, B.A. (Toronto), retired as Inspector of Public Schools for York No. 2 on September 30, 1951. He attended elementary schools in the Counties of Grey, Bruce and Wellington, and the secondary schools of Harriston and Smithville. Three and a half years of teaching in rural schools in Grey and Bruce were followed by further study at the Chatham Collegiate. He then enrolled for further teacher-training at the Faculty of Education in Toronto. On graduation, he taught for a short time in Port Perry High School, prior to his appointment to the teaching staff of the Toronto Public Schools. In Toronto he served as assistant in Lansdowne School and in Ryerson School, until he was appointed principal of York Street School. In 1916-17-18 he served as gunner in the First World War in Canada, England and France. On his discharge he returned to Toronto where he became principal of Strathcona Public School. In January, 1928, he was appointed Inspector of Public Schools for Peel County. In September, 1938, he was transferred to York County, No. 2, where he continued to serve until his retirement. Mr. Fydell was active in his inspectorial group and gave to his colleagues liberally of his enthusiasm, energy and good counsel.

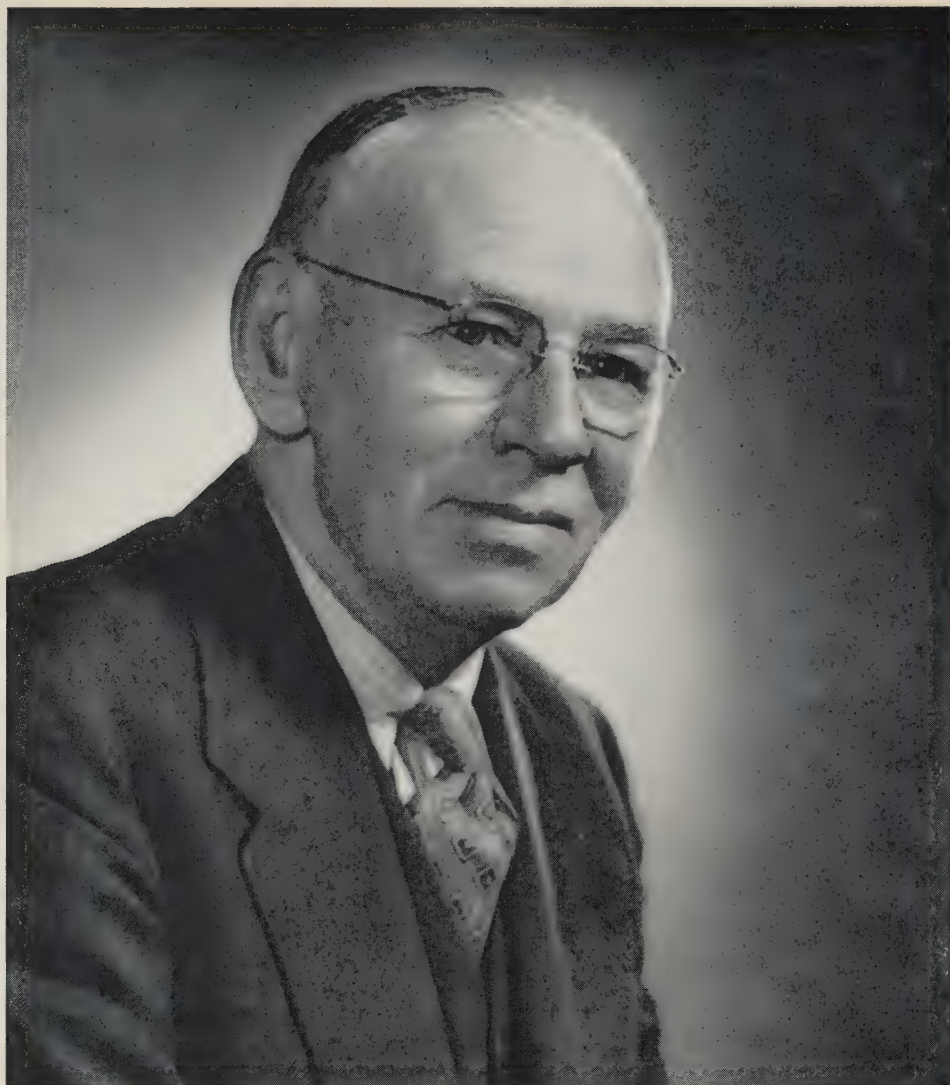

GEORGE S. JOHNSON, B.A., Inspector for District Division 17, residing at Bracebridge, retired on August 31, 1951, after serving twenty-five years as a public school inspector. Mr. Johnson was educated in the public schools of Truro and Windsor, Nova Scotia, in the high schools of Truro and Woodstock, in McMaster University, Hamilton Teachers' College, and the Ontario Agricultural College. He taught science in Meaford, Moose Jaw and Whitby. Later he became principal of Monteith Academy and of Bracebridge High School. He was appointed public school inspector in August, 1926. He was very popular with the trustees and teachers. During his term many township school areas were formed in his inspectorate.

ALBERT E. NELSON, B.A., Inspector of Public Schools for Perth North and Wellington (in part), retired on August 31, 1951. He was born in the Township of Otonabee in the County of Peterborough, and received his education in S.S. No. 1 Otonabee, Norwood High School and Model School, Peterborough Collegiate Institute, Ontario Normal College (Hamilton), and Queen's University. He taught in rural schools in Peterborough County for four years, and in prairie schools in Saskatchewan for one and one-half years. He was assistant in Bradford High School from 1905 to 1907; principal of Port Elgin High School from 1910 to 1916;

principal of Kincardine High School from 1916 to 1926; Inspector of Public Schools for Perth North and Town of St. Marys from 1926 to 1931; and Inspector of Public Schools for Perth North and Wellington (in part) from 1931 to 1951. During his period of inspection Mr. Nelson was successful in having Supervisors of Music engaged for each of the 113 classrooms in his inspectorate. He has passed on to the teachers who were in his inspectorate a sincere enthusiasm for the profession.

APPOINTMENTS

- Dr. W. J. Dunlop.....Minister of Education, effective October 1, 1951.
- Mr. H. S. Braun.....Acting Principal, Lakehead Technical Institute, effective June 1, 1951.
- Mr. H. P. Boone.....Vocational Supervisor of Correspondence Courses Branch, effective September 1, 1951.
- Mr. A. H. McKague.....Secondary School Inspector, High Schools and Collegiate Institutes Branch, effective September 1, 1951.
- Mr. A. Gamble.....Secondary School Inspector, Vocational Education Branch, effective September 1, 1951.
- Mr. W. C. Taylor.....Executive Assistant, Guidance Branch, effective September 1, 1951.
- Mr. R. S. Devereux.....Master, London Normal School, effective September 1, 1951.
- Mr. J. D. Stennett.....Master, North Bay Normal School, effective January 1, 1951.
- Mr. R. A. Oliver.....Master, Stratford Normal School, effective September 1, 1951.
- Miss M. P. Bainbridge...Master, Toronto Normal School, effective September 1, 1951.
- Mrs. A. M. Pyke.....Master, Hamilton Normal School, effective September 1, 1951.
- Mr. C. L. Emery.....Principal, Provincial Training Projects, effective August 1, 1951.
- Mr. C. S. Temple.....Bursar, Ryerson Institute of Technology, effective January 15, 1951.
- Mr. G. F. Allison.....Master, Ryerson Institute of Technology, effective September 1, 1951.
- Mr. C. L. Bird.....Master, Ryerson Institute of Technology, effective September 1, 1951.
- Mr. D. E. Bridge.....Master, Ryerson Institute of Technology, effective July 1, 1951.
- Mr. A. B. Carr.....Master, Ryerson Institute of Technology, effective May 28, 1951.
- Miss S. E. B. Cochran...Master, Ryerson Institute of Technology, effective September 1, 1951.
- Miss D. F. Duxbury.....Master, Ryerson Institute of Technology, effective July 1, 1951.
- Mr. A. G. Forsey.....Master, Ryerson Institute of Technology, effective May 28, 1951.
- Miss E. A. Grant.....Master, Ryerson Institute of Technology, effective September 1, 1951.

FRANK STEWART RUTHERFORD, B.A.Sc., LL.D.

Dr. Frank S. Rutherford retired in 1951 as Deputy Minister of Education. For more than thirty years he had served in the Department of Education, coming to it in 1920 as organizer of Vocational Education, after engineering and teaching experience, and army service with the First Canadian Contingent. In 1925 he was appointed Assistant Director of Vocational Education, and Director in 1931, serving in that capacity until 1946 when he was appointed Deputy Minister.

The period of his association with Vocational Education was a time of remarkable expansion, due largely to Dr. Rutherford's untiring energy and practical vision. He used every effort to encourage the provision of the best possible equipment and accommodation for the Vocational schools, and to develop a body of trained and efficient teachers. He was concerned always to promote a sound general education along with practical vocational training. More recently he initiated the programme for Provincial Technical Institutes and helped to frame the policy governing their organization and administration.

In recognition of his outstanding contribution to Vocational Education in Ontario, the University of Western Ontario conferred on Dr. Rutherford, in 1949, the honorary degree of Doctor of Laws, a fitting honour to a man who has served the Province of Ontario well in all his undertakings.

Mr. D. A. G. Kelly Master, Ryerson Institute of Technology, effective July 1, 1951.

a—Girls only b—This is 57.1% of all leaving student life from elementary schools.
In the above table, main totals are expressed as a percentage of the grand totals; sub-division as percentage of own class.

PUPIL-TEACHER RATIO

in Ontario Elementary and Secondary Schools

Ratios A, B and C apply to enrolment in public, high and vocational schools, respectively.

Ratios A¹, B¹ and C¹ apply to average daily attendance in the same schools.

Retrospective Tables

RETROSPECTIVE TABLES

1. PROVINCIAL POPULATION AND SCHOOL ENROLMENT

Note: Population and Exemptions apply to the calendar year, while Pupil Enrolment is based on the school year.
(For example, day school enrolment of 1940-41 is calculated as a percentage of the population of the calendar year 1940)

Year	Provincial Population	Day Enrolment in Provincial School System	Percentage of Population in Day Schools	Day School Enrolment Classified as between		Compulsory Age Enrolment (8-15 incl.)		Compulsory Adolescent Age Enrolment (14-15 incl.)		Adolescent Age Exemptions			Percentage of Compulsory Adolescent Age Enrolment
				Elementary	Secondary	Number	Percentage of Day Enrolment	Number	Percentage of Day Enrolment	By Home Permit	By Employment Certificate	Total	
1940.....	3,747,000	664,373	17.7	81.8	18.2	482,094	72.6	103,509	15.6	1,885	4,871	6,756	6.5

SCHOOL COSTS

1940-1951

a—Total bar shows actual calendar year cost.
b—Black bar shows cost adjusted to the 1939 dollar.
c—Shaded part represents inflation of the 1939 dollar.

Canada Cost-of-Living Index	
1939	100.0
1940	105.6
1941	111.7
1942	117.0
1943	118.4
1944	118.9
1945	119.5
1946	123.6
1947	135.5
1948	155.0
1949	160.8
1950	166.5
1951	184.5

The above calendar year costs cover all day school pupils in the Provincial system for the total of the following disbursements: (a) current operations; (b) capital charges; (c) capital outlays from current funds; and (d) transportation.

PUPIL TRANSPORTATION

Every parent would like to have the school located within easy walking distance of his residence, perhaps within a mile. Due to sparse population, such a wish becomes a fanciful dream. In recent years, with motor vehicles, improved roads and snow ploughs, the school bus has become established and for thousands of pupils in the Province equality of educational opportunity has now become a reality.

In the 1920's a few horse-drawn vehicles were used to transport children to consolidated schools.

In 1951, over 2,200 school buses were used to transport 59,321 children to school. It is not surprising to note that the first service to grow was for transportation to secondary schools. These are more widely scattered and more pupils reside beyond a reasonable walking distance from such schools. In recent years with the building of central schools in rural areas, and the closing of small schools, there has been a marked increase in transportation service for elementary school pupils.

In recent years School Boards have planned the routes more efficiently, and contractors have secured modern vehicles. The actual cost per pupil has remained at 39¢ per pupil in spite of rapidly rising living costs. Only 50 of the 2,267 routes are served by buses owned by School Boards.

The continued increase in the number of pupils transported is shown below.

Board Supplying the Transportation	Number of Routes	Number of Pupils	Daily Miles	ACTUAL COST				APPROVED COST

*As reported by Principals for the 12 month period from School opening in September 1950 to school opening in September, 1951.

POST-WAR SCHOOL BUILDING CONSTRUCTION

The effectiveness of the school building programme in Ontario is indicated below in school terms. New pupil places provided by the construction of new schools and additions for each year from 1945 to 1951. The total for seven years is 121,300 pupil places in elementary and 29,000 in secondary schools. This includes replacements and additional accommodation.

TABLE 40—PUBLICATIONS OF THE DEPARTMENT OF EDUCATION PROVINCE OF ONTARIO

As of September 1st, 1952

The year or years in which the latest revision was printed are shown in each case.

A. COURSES OF STUDY

Junior Kindergarten to Grade VIII

1. Programme for Junior and Senior Kindergarten and Kindergarten Primary Classes of the Public and Separate Schools, 1944, 1946, 1950.
2. Programme of Studies for Grades I to VI of the Public and Separate Schools, 1942, 1947, 1949, 1952.
3. Programme for Religious Education in the Public Schools, 1949.
4. Curriculum I. 1, Intermediate Division, Outlines of Courses for Experimental Use, 1951.
5. Circular I. 3, Guidance in the Intermediate Division, 1950.
6. Curriculum I. 4, Supplementary Reading List for Grades VII to X, 1951.
7. Curriculum I. 5, Physical Education, Outline of Courses for Experimental Use, Grades VII to X, 1952.

B. REVISION OF CURRICULUM

8. Curriculum: 1, Revision of Curriculum, December 10, 1949.
9. Curriculum: 2, Promotion from Grade VIII and Admission to Grade IX, March 30, 1950.
10. Curriculum: 3, Establishment of Local Committees on Curriculum, May 15, 1950.
11. Curriculum: 7, Memorandum re Curriculum, Progress of the Revision, 1952.

C. COURSES OF STUDY

Grades IX to XIII

12. Circular H.S. 1, Requirements for Certificates and Diplomas for 1952-53. Outlines subjects of various courses leading to Intermediate Certificates, Secondary School Graduation Diplomas and Secondary School Honour Graduation Diplomas.
13. Circ. H.S. 1B, List of Publications re Courses of Study, Grades IX to XIII, 1952-53. Lists Circular Numbers and Titles of the various Courses of Study.
14. Curriculum I. 1, Intermediate Division, Outlines of Courses for Experimental Use, 1951.
15. Circ. H.S. 2, Art, Grades IX to XII, General and Academic, 1940, 1944, 1946, and 1951.
16. Circ. H.S. 3, Commercial Courses, Grades IX to XII, 1946.
17. Circ. H.S. 4, English, Grades IX and X, 1946, 1948, 1951.
18. Curriculum S. 4, English, Grades XI and XII, 1952.
19. Circ. H.S. 5, Physical Education, Grades XI to XIII, 1950.
20. Circ. H.S. 6, Home Economics, General and Commercial Courses and Vocational Courses, Grades IX to XII, 1945, 1946.
21. Circ. H.S. 7, Social Studies, Geography, Grades IX to XII, 1943, 1945, 1950.
22. Circ. H.S., 8, Social Studies, History, Grades IX and X, 1947, 1949, 1950.
23. Curriculum S. 9, World History, Grades XI and XII, 1952.
24. Curriculum S. 9A, Suggestions for Teachers of World History, 1952.
25. Circ. H.S. 10, History, Grade XIII, 1945, 1951.
26. Curriculum S. 11, Latin and Greek, Grades X to XII, 1952.
27. Circ. H.S. 12, Mathematics, Grades IX and X, 1943, 1948.
28. Curriculum S. 12, Mathematics, Grades XI and XII, 1952.
29. Curriculum S. 12B, Suggestions for Teachers of Geometry in Grades XI and XII, 1952.
30. Circ. H.S. 13, Algebra, Geometry, Trigonometry and Statics, Grade XIII, 1940, 1943, 1946.
31. Circ. H.S. 15, Modern Languages, Grades IX to XIII, 1945, 1951.
32. Circular 1952-53: 3, Amendments to Courses in Modern Languages for Grades XI, XII, and XIII, 1952.
33. Circ. H.S. 16, Music, Grades IX to XIII, 1943, 1944.
34. Circ. H.S. 17, General Science and Agricultural Science, Grades IX and X, 1946, 1949.
35. Curriculum S. 17, General Science and Agricultural Science, Grades XI and XII, 1952.
36. Circ. H.S. 18, Chemistry, Grade XIII, 1948 and 1951.
37. Circ. H.S., 18A, Physics, Grade XIII, 1944, 1946, 1948.
38. Circ. H.S. 19, General Shop, Grades IX to XII, 1946, 1947.
39. Circ. I. 3, Guidance in The Intermediate Division, 1950.
40. Curriculum S. 5, Guidance Services in the Senior Division, 1952.
41. Circ. H.S. 22, Latin and Greek, Grade XIII, 1947, 1950.
42. Circular Tech. 17, Science for Vocational Schools and Departments, Grades XI and XII, 1939, 1943.
43. Circular Tech. 40, Shop Courses in Vocational Schools, Grades IX to XII, 1946.

48. Circular 46 (a) Prescriptions in French for French-speaking Pupils for Grade XIII Departmental Examinations, 1953.

D. TEACHING AIDS

Art

49. Art and Crafts in the Schools of Ontario, 1949.
50. Art Education in the Kindergarten, 1952.

Library

51. Teachers' Library Catalogue.

Music

52. Circular Mus. 1, Training the Voices of Children and Adolescents, 1944.
53. Circular Mus. 2, Music in Rural Schools, 1946.
54. Circular Mus. 3, School Music Festivals, 1946.
54. Circular Mus. 4, Introducing Part Singing with Adolescent Boys.
55. Circular Mus. 5, Memorandum relating to The Teaching of Music in Elementary and Secondary Schools, 1946.
56. Circular Mus. 10, Operettas, Music Plays and Cantatas.
57. Music Appreciation Through Listening, for Elementary Schools, 1950.

Radio

58. School Radio Broadcasts. October, April, 1952-53.

Religious Exercises, Religious Education and Religious Instructions

59. List of Bible Readings for Schools, 1944, 1949.
60. Programme for Religious Education in the Public Schools, 1949.

E. ADDITIONAL PAMPHLETS

61. Circular Elementary 15, The Township School Area in Ontario.
62. Visual Education Catalogue.
63. Teaching in the Elementary Schools of Ontario, 1950.
64. Teaching Try-Out Experience, 1950.
65. Calendar of the Normal Schools, 1952.
66. Calendar of the University of Ottawa Normal School, 1952.
67. Calendar of the Primary Specialist Course, 1948.

F. SCHOOL ACTS

68. Department of Education Act.
69. Public Schools Act.
70. Auxiliary Classes Act.
71. Continuation Schools Act.
72. High Schools Act.
73. Boards of Education Act.
74. Separate Schools Act.
75. School Attendance Act.
76. Vocational Educational Act.
77. School Sites Act.
78. The Teaching Profession Act.
79. The Teachers' Superannuation Act.
80. The Trade Schools Act.
81. The Public Libraries Act.
82. The Teachers' Boards of Reference Act.

G. REGULATIONS

83. Public and Separate Schools.
84. High Schools and Collegiate Institutes.
85. Continuation Schools.
86. Vocational Schools.
87. Public School Inspector's Certificates.
88. Supervisory Officers.
89. Scholarships for Post Graduate Study in France.
90. School Attendance.
91. General Legislative Grants.
92. Grants for Non-Profit Camps.

Terminology

Assessment—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

Attendance Efficiency—The percentage relationship of the actual days attended to the perfect aggregate.

Auxiliary Classes—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

Capital Charges—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

Compulsory School Age—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part-time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

Consolidated School—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyances.

Correspondence Courses—Are a substitute for regular school for those who are unable to attend because of age, health or distance. They cover Grades I to XIII in English and Grades I to VIII Bilingual and are based on the new Course of Studies. A year's active enrolment is over sixteen hundred. Lessons are marked by a Departmental staff. These courses are entirely free.

Cost per Pupil-Day—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

County Pupil—A secondary school pupil living within the County but outside any secondary school district.

District—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing.

Enrolment (Net)—The number of pupils who have attended school during the year, excluding all duplications.

Fifth Classes—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

Free School Age—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

General Maintenance—Ordinary, current expense, as opposed to capital outlays and debenture charges.

Improvement District—Shall be deemed to be for all purposes of every Act a township municipality, a village municipality, or a town municipality, as may be designated from time to time by the Municipal Board.

Inspectorate—The area under the supervision of a local Departmental representative.

Kindergarten-Primary—A class combining the work of the kindergarten and Grade I.

Non-Resident Pupil—A secondary school pupil who is neither a resident nor a County pupil.

Public School Section—A subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

Resident Pupil—A secondary school pupil living within the secondary school district.

School—Provincially controlled schools may be classified as:

- I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).
 - (a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.
 - (b) **R.C. Separate**—For the children of Roman Catholics.
 - (c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

1. **Collegiate Institutes.**
2. **High Schools.**
3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

1. **Technical High Schools.**
2. **Commercial High Schools.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

III. **Provincial Technical Institutes**

These offer courses designed to train technicians for positions in industry which are supplementary to, but not in the field of, professional engineering. The admission requirement is secondary school graduation, and the courses are of two or three years' duration. The institutes are owned and administered directly by the Department of Education under the Vocational Education Act, Part II, but close co-operation with industry is maintained through advisory committees, the members of which are appointed by the Minister.

IV. **Professional Training Schools**

- (a) Ontario College of Education (University of Toronto)—for the training of secondary school teachers.
- (b) Provincial Normal Schools—for the training of elementary school teachers.

V. **Special Schools:**

- Ontario School for the Blind, Brantford.
Ontario School for the Deaf, Belleville.

School Car—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of northern Ontario. There are six of these cars at present, and the length of route ranges from 83 to 221 miles. The route is covered in four to six weeks, and each car is "spotted" for about a week at a time. Problems are solved, work is outlined for the next period, and daily problems of life are discussed. The present enrolment approximates 150, and comprises 10 nationalities. The Department pays all operating costs.

School Year—The school year consists of two terms, September 1 to December 22, and January 3 to June 29. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remain on the calendar year basis.

Secondary School District—The area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

Township School Area—A unit of school administration comprising two or more contiguous rural school sections in the same township or in adjacent townships, or comprising such rural sections along with one or more adjacent villages or towns. See Cir. Elem. 15, "The Township School Area in Ontario."

Report of The Minister of Education 1952

To The Honourable Louis O. Breithaupt, LL.D.,
Lieutenant-Governor of the Province of Ontario.

In submitting this Report to Your Honour, with all respect, I should like to be permitted to mention a few of the phases of the work of the Department of Education which seem to merit special attention.

Two institutions, not often in the public eye, are the Ontario School for the Deaf, located in Belleville, which provides education for nearly 400 young people and the Ontario School for the Blind in Brantford which has an enrolment of 176 boys and girls whose homes are in Ontario, Manitoba, Saskatchewan and Alberta.

It is of interest to note that 581 bursaries were awarded to young men and women for the last year in high school or normal school or first year university and 818 bursaries for later years in university. Academic standing, proven need, and the efforts of the candidates to help finance themselves are the chief determining factors in making these awards. Four scholarships were awarded to university graduates for study in France. Funds for bursaries and scholarships were provided by the Province (\$220,000) and by the Federal Government (\$100,000) under the Youth Training Agreement. Never before has it been possible to provide for as many bursaries as were awarded during the year under review.

Special reference should also be made to the good work being done by the Public Records and Archives Branch where several important collections of manuscripts have recently been obtained and where the reproduction of manuscripts has been provided for by the acquisition of a photostat camera and a microfilm camera. This year, for the first time, it was possible to pay to the Public Libraries of the Province the total amount which each had earned by conforming with specific standards. A project which should mean a great deal in the absorption of new citizens has been the evening classes in which 22,456 New Canadians were given instruction in Basic English and Citizenship. Summer Camps for boys and girls received generous grants and were assisted also by means of the short courses provided for training camp counsellors; in this work, as well as in its training courses for rural teachers, the Physical and Health Education Branch has done notable work.

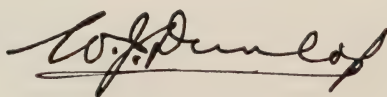

Perhaps the greatest of the problems in this Department during the year—one which will continue for many years probably—is the supply of teachers. However, it is a pleasure to be able to report that, by emergency measures, it has been possible to prepare, during the year, a sufficient number of teachers to ensure that no school in Ontario was closed for lack of a teacher. When it is noted that the enrolment in the elementary schools of the Province increased by 42,983 over the preceding year while the secondary school enrolment increased by 2,797, a general idea of the magnitude of the problem becomes apparent. It will be noted that a few small schools have been closed temporarily and the pupils have been transported to larger schools. New buildings were erected during the year at a cost of \$30,300,000.

It is only right that I should state that the Department of Education is served by faithful, industrious, conscientious, and loyal officials who work in admirable harmony for the good of the citizens of this Province. Among these are the Inspectors of Secondary and Elementary Schools whose duties have more than trebled in the past decade or two and who are properly regarded as the representatives of the Minister in the various municipalities that go to make up the Province of Ontario. Not many people know of the work of the railway school cars, of which there are six operating in northern and northwestern Ontario providing education where there can be no schools.

During the year it was decided that the term "Normal School" had outlived its significance and had become a misnomer; and that, due notice having been given, the name would be changed to "Teachers' College". In Toronto there were two Normal Schools, one meeting in the forenoon and one in the afternoon in the same building, two in Ottawa, and one each in London, Hamilton, Stratford, Peterborough and North Bay. The service rendered by the five Technical Institutes is worthy of special mention. The Ryerson Institute of Technology at Toronto offered, with remarkable success, three-year courses in a great variety of technical subjects. The Lakehead Technical Institute provided two-year courses in Forestry, in Mining, in Arts, Science, Commerce and Household Science. The Provincial Institute of Mining at Haileybury trained mining technicians while the Provincial Institute of Textiles at Hamilton provided instruction in the technical aspects of spinning, knitting and weaving. The Provincial Institute of Trades in Toronto gives training in building, electrical and mechanical trades, and is a project supported by the Federal and Provincial Departments of Labour.

The few details outlined in the previous paragraphs may serve to indicate that the educational system of this Province is a most complex and complicated structure which has its financial as well as its educational side. The objective of our work in this Department is to produce loyal, intelligent, right-thinking, religious, and freedom-loving citizens to take their places in developing, by all legitimate means at their disposal, this rapidly-expanding Province and Dominion. In the schools of Ontario the young people and the boys and girls are being trained to realize what true democracy really means and it is hoped that their loyalty to Queen and country will be such that they will be ready, when their turn comes, to render their share of public service in the communities in which they make their homes.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "W. J. Dunlop", with a horizontal line drawn underneath the name.

Minister of Education.

Toronto, October 1, 1953.

PART I
GENERAL

Elementary Education

LEGISLATIVE GRANTS

In 1952 the bases for the calculation of legislative grants for elementary schools were essentially the same as in the preceding year. In addition to the general legislative grants, amounting in the fiscal year 1951-52 to \$29,979,877, and grants on certain expenditures for text-books and library books, amounting to \$1,561,587, elementary school boards were paid a grant of 50% of the approved amount expended in December, 1951, for the purchase of milk for consumption by the pupils on school days.

LARGER UNITS OF ADMINISTRATION

Seven new township school areas were formed in 1952, and 13 additions were made to existing areas. These new larger units of administration and additions to existing units replaced 61 school sections. Since 1949, one township school area, which included 14 former school sections, has been dissolved. Two former school sections were withdrawn from township school areas in 1952, bringing the total number withdrawn to 25. At present there are 554 township school areas in operation in place of 3,547 former school sections. Township school areas now include 61.75% of the former school sections in the Province.⁽¹⁾

The South Peel Board of Education was established in 1952, uniting the administration of 9 school sections in Toronto Township. This Board employs approximately 122 teachers.

In 1952, 14 separate schools were formed into 6 Union Separate Schools, and 1 separate school was added to an existing Union Separate School. One Union Separate School made up of two former separate schools was dissolved. The total number of Union Separate Schools in operation is 51. These include 146 former separate schools.⁽²⁾

THE TEMPORARY CLOSING OF SMALL SCHOOLS

Reduced enrolments or changing local conditions from time to time necessitate the closing of small rural schools and the transfer of pupils to other centres. Sometimes these conditions are only temporary and the schools reopen. During 1952, 45 schools were closed and 12 schools were reopened. At present there are 754 closed schools in the Province.⁽³⁾

TRANSPORTATION OF PUPILS

Contracts entered into by public and separate school boards for the transportation of pupils fall into two categories. Arrangements may be made to transport their own elementary school pupils or to carry pupils from their districts to secondary schools.

In 1950-51 the number of secondary school pupils provided with transportation by elementary school boards was 7,000. In 1951-52 the number was 5,628. Where larger high school districts have been established, the responsibility for the transportation of high school pupils has been assumed by the high school boards concerned.⁽⁴⁾

In 1950-51 the number of elementary school pupils provided with transportation by public and separate school boards was 19,000. It increased to

⁽¹⁾ For tables see p. 71

⁽²⁾ For tables see page 72

⁽³⁾ For tables see page 73

⁽⁴⁾ See also p. 9

22,000 in 1951-52. These figures do not include those pupils who are provided with transportation from closed schools.

THE SUPPLY OF TEACHERS

In September, 1952 the enrolment in the elementary schools of the province was 54,443 greater than the enrolment at the opening of the schools in September, 1951. Additional classroom teachers were required. From the Pre-Teachers' College Summer Course, First Year, there graduated 467 teachers who were granted temporary certificates valid for one year. Up to December 31, 1952 Letters of Standing for the school year 1952-53 were issued to 221 teachers who were fully qualified in other provinces and countries. These Letters of Standing had the force of Interim First or Interim Second Class certificates, and were granted on the understanding that the holders would write the final annual examinations of a Normal School in the Province in 1953. In addition, from September to December, 1952, Letters of Permission were issued to boards to engage 334 persons who had no teacher-training experience. During the same period 281 Letters of Permission were issued to boards to engage persons who had at some time taken a teacher-training course. ⁽⁵⁾

RAILWAY SCHOOL CARS

During the year 1952 six railway school cars were in operation in Northern and Northwestern Ontario, three on the Canadian National Railway, two on the Canadian Pacific and one on the Ontario Northland. The total number of children enrolled was 156, making an average of 26 for each car. The total number of stops for the six cars was twenty-five. A circuit, which has a length of approximately 140 miles, is completed in five weeks.

In addition to providing instruction for children the school car serves as a community centre. Parents and other adults, many of whom are of foreign extraction, receive guidance and help in raising their standards of life and conduct.

SCHOOL HEALTH

Under existing school legislation a school board is not authorized to establish and maintain new school health services of its own. A board may, however, enter into an agreement with the local board of health to provide medical and dental inspection of pupils, and with its staff co-operate in the working out of such a programme. A school board has power, if deemed expedient, to pay for surgical treatment for children suffering from "minor physical defects".

In the case of new school accommodations the Department of Education requires for grant purposes approval by the Sanitary Engineering Branch of the Department of Health of the provision made for water supply and disposal of sewage. The technical advisers of the Department of Education supply to architects copies of a multigraphed book with suggestions for the layout and construction of schools. In these suggestions healthful school conditions are given careful attention.

The help of various voluntary health organizations, such as the Junior Red Cross, is welcomed by school staffs and school boards in dealing with some aspects of health in schools.

The time spent in school visiting by public health nurses is appreciated by school officials. In the work of nursing staffs and medical officers of health with regard to communicable diseases, exclusion and readmission, co-operation between school staffs, educational authorities and health authorities is essential, and is, happily, the general rule.

(5) For tables see p. 158

NEW CONSTRUCTION

In 1952 the volume of elementary school construction increased over the previous year, as it has in each year since 1945. Up to 1951 the additional accommodation provided by building new schools and additions exceeded the increase in the number of pupils. In 1952 new accommodation was provided for 39,400 pupils at a cost of \$30,300,000, while the increase in enrolment was 45,780. During the period 1945 to 1952, inclusive, new accommodation has been provided at a cost of \$106,300,000. This accommodation has been required for an increase in enrolment of 151,785 pupils.

ADMINISTRATION

The administrative work of school inspectors in Ontario has continued to increase in importance, and requires an ever-increasing portion of their time. This leaves a smaller portion for the supervision of instruction.

The elementary school inspectors check the annual financial reports of school boards and complete the grant forms which serve as a basis of distributing \$36,000,000 of legislative grants to 3,887 elementary school boards. Additional reports, of a special statistical nature or on local problems, are prepared by the inspector. He is responsible to the Minister for proper observance of School Acts and Regulations.

School boards look to the inspector for advice in preparing budgets, estimating grants, selecting sites, arranging for transportation contracts, improving school grounds, building new schools, interpreting Acts and Regulations, selecting teachers and arbitrating disputes on school issues among boards, parents and teachers.

The inspector serves the municipal councils by giving assistance in drafting by-laws for the establishment and alteration of school sections, by issuing warrants for the payment of school taxes and township grants, by acting as arbitrator in the case of school boundary or equalization disputes, and by acting as secretary to consultative committees.

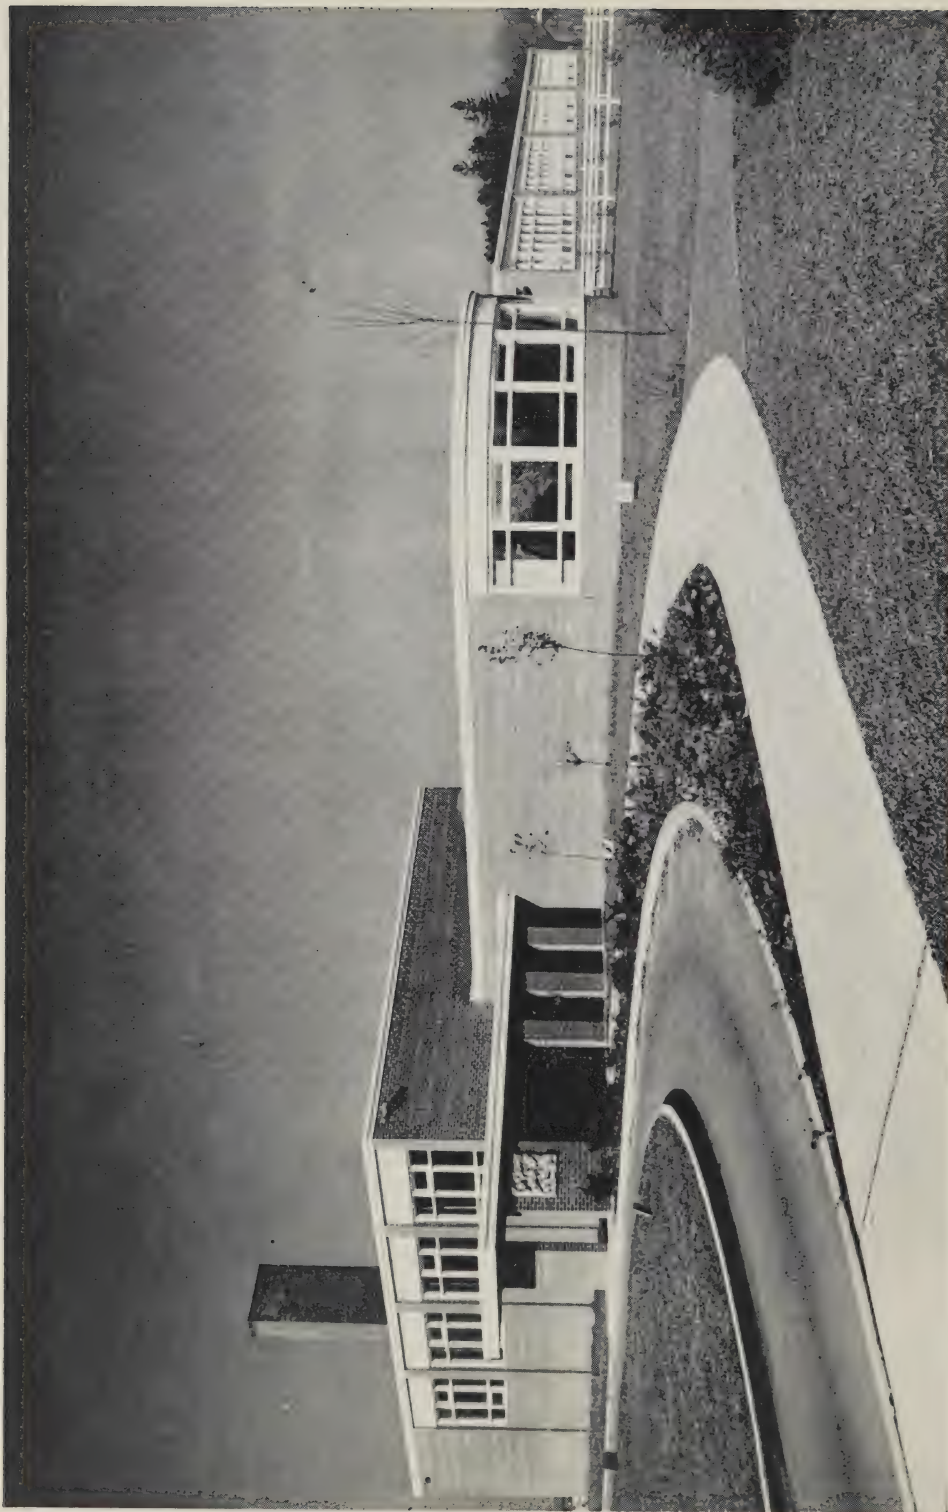

His duties with respect to teachers are numerous. He supervises their methods of instruction, assists in the selection of teachers for curriculum committees, is a member of the selection committee for entrance to normal schools, often teaches summer school, conducts an in-service training programme for his teachers, checks qualifications for permanent certificates, and frequently assists teachers in obtaining the positions for which they are best fitted.

The inspector supervises the promotion of pupils in his schools. He endeavours to make certain that classrooms are properly heated, lighted and ventilated and are adequate for the health of the pupils. He is concerned with the progress of normal, gifted and retarded pupils. He is concerned with the standards that are attained in reading, writing, English composition and arithmetic, as well as with the growth and development of children in citizenship and health, and with the social, physical and spiritual aspects of their education.

Many inspectors are active participants in community organizations. Committees of Library Boards, Boards of Health, Recreation, and Conservation, as well as Home and School Associations, trustee organizations and Children's Aid Societies seek their advice and participation.

The school inspector's position requires the minimum qualifications of five years of university education, considerable post-graduate study, and seven years of successful teaching experience, as well as considerable knowledge of law and finance. He is selected on the basis of scholarship and a high degree of diplomatic leadership in his chosen profession.

With a further increase in the number of school boards which employ at least one hundred teachers, there is a marked tendency for such boards to appoint their own superintendents, who act as public school inspectors. More than twenty-five percent of the public school inspectors are now appointed and paid by local boards.

NEW TORONTO SECONDARY SCHOOL

Secondary Education

1. SECONDARY SCHOOLS

ADMINISTRATION

A reorganization of administrative offices to permit a closer co-ordination between academic and vocational secondary education was effected in 1952. Mr. L. S. Beattie succeeded Dr. A. G. Hooper as Superintendent of Secondary Education and three Assistant Superintendents, Mr. C. W. Booth, Mr. A. M. Moon and Mr. S. D. Rendall were appointed at the same time. Inspectors formerly designated as High School Inspectors or Vocational School Inspectors will henceforth be known as Secondary School Inspectors.

ENROLMENT

The total enrolment of pupils in the 75 collegiates, 218 high schools and 73 continuation schools, for the school year 1951-52, was 103,394. During this period 4,674 full-time teachers were employed, an increase of 97 over the previous year.

Forty-one vocational schools provide secondary education in day and evening classes to pupils who are interested in careers in business and industry. Twenty-five of these schools are integrated with high schools or collegiate institutes to form composite schools. Of the remainder three are technical schools, three are high schools of commerce, and ten are technical-commercial secondary schools. The day school enrolment in the vocational schools for 1951-52 was 30,780, an increase of 269 over that of the preceding year. The enrolment in evening classes was 64,072, which was 6,306 higher than in the preceding year.

BUILDING PROGRAMME

The secondary school building programme for 1952 reached a record figure for this province. Sixteen new schools were completed at a cost of \$8,317,000 and provided accommodation for 6,230 pupils. Additions were made to 17 existing buildings at a cost of \$7,021,000 with space for 4,540 additional pupils.

New schools were built at Aurora, Carleton South, Elgin West (Dutton), Embrun, Englehart, Flesherton, Glencoe, Goderich, Lakefield, Napanee, Norwich, Norwood, Peterborough, Red Lake, Smiths Falls, and York North (Bathurst Heights).

INSPECTION OF SCHOOLS

The policy of selecting a number of larger schools for a joint or general inspection was continued in 1952. Present plans provide for the general inspection of schools having 20 or more teachers once in every four years. In the intervening years the resident or district inspector will visit the school at least once a year. An effort is being made to have the whole secondary school inspection staff, formerly classified as academic or vocational, function as a unit. This will, it is hoped, eliminate artificial distinctions between types of courses, and between individual subjects, whether these be labelled as general or academic or vocational.

GRANTS

General legislative grants paid to academic secondary schools in the fiscal year 1951-52 amounted to \$12,524,076, and to vocational schools \$3,234,302. Included in the general legislative grant there was provision for payment in 1952 of a sum of \$3.00 per pupil in average attendance in Grades IX and X in 1951. This was intended to encourage the provision of some free

text-books for these pupils. It was announced at the same time that payments in 1953 would be based on amounts expended for text-books in 1952 up to a maximum of \$3.00 per pupil in average attendance in that year.

Under the Vocational Schools Assistance Agreement the Government of Canada pays a grant equal to provincial expenditures in grants for maintenance of vocational schools up to a fixed maximum of \$589,000. The federal government also makes an allowance towards capital expenditures for buildings and equipment equal to fifty percent of the provincial allowance for these purposes. Under this arrangement a payment of \$471,970 was received on account of capital expenditures. The provincial expenditures were in excess of the amount required to qualify for the maximum grant for maintenance purposes.

HIGH SCHOOL DISTRICTS

Six new high school districts were established in 1952, and boundary alterations were made in twelve districts. Three districts were dissolved and the municipalities comprising them were joined to existing districts or established as new districts.

For the school year 1952-53, 1,403 transportation routes were operating, carrying 34,881 pupils 61,000 miles per day at a daily cost of \$17,411. Of this daily amount \$14,566 was approved for grant purposes. (See also page 3).

CURRICULUM

The curriculum in all types of school is made up of compulsory subjects, English, Social Studies, and Physical Education, and optional subjects. Within this framework schools are free to adopt for Grades IX and X suggested courses prepared by the Department of Education, or to prepare their own courses, adapted to local conditions. Many schools have developed their own programmes, academic or vocational, including terminal courses for pupils leaving school after completing Grade X. Courses for Grades XI and XII continue to be fixed by the Department of Education, but experimental revisions have been in progress for some time, and in 1952 revised courses were issued, among others for English, History, Latin, Mathematics and the Sciences.

The revision of curriculum in the vocational schools is being carried on, in the main, by provincial associations of teachers such as the Ontario Commercial Teachers' Association and the Technical Research Council. Much planning has been done at the regional level, with reports and recommendations being forwarded to the central organizations.

The vocational schools continue to enjoy a wide measure of co-operation with industry, not only with individual firms and executives, but also through associations such as branches of the National Office Management Association, the Board of Trade, the Chamber of Commerce, the Canadian Manufacturers' Association, and others. The establishment of chapters of the Industrial Education Council in several centres has been reflected in a closer liaison between the schools and industry. These co-operative efforts have resulted in a number of work experience plans, with pupils entering offices, stores and industrial plants to secure part-time experience and training. They have provided schools with valuable advice in planning courses, accommodation and equipment, and they have effected improvements in guidance, placing and induction training for the pupils.

TEACHER SUPPLY AND TRAINING

The shortage in the supply of secondary school teachers is felt chiefly in special fields, particularly for women teachers of physical education and for teachers of commercial subjects, home economics and industrial arts.

The one-year courses for teacher training at the Ontario College of Education are the main source of teachers for the secondary schools. Summer courses,

offered by the Department of Education, provide an opportunity for teachers to proceed toward certification in a number of fields. Summer courses were offered in 1952 for various grades of certificates in Home Economics and Commercial subjects, and for Principal's, Specialist's and Ordinary Vocational certificates.

Effective means of teacher collaboration and professional improvement are provided in the regional conferences, organized in many centres by associations of teachers under the direction of their central organizations. Such conferences have been particularly successful in home economics, industrial arts, and commercial education. For example, ten regional groups of industrial arts teachers have been organized throughout the province and have done much to develop improved techniques in organization, management and teaching methods.

2. TECHNICAL INSTITUTES

Since 1945 a number of Technical Institutes have been opened in different parts of the Province. In general their function is to provide post-secondary school education with specialization in a number of technological vocations. Since the period of development of the institutes has coincided with a rapid expansion of Canada's industrial and commercial potential, these schools have been an important source of required technical personnel.

An important feature of the Technical Institutes is the close relationship maintained with industry. Advisory Councils give representation to leading executives of the industries for which the students are being prepared, and the courses are related closely to the latest technological advances.

Through evening class instruction regularly-employed workers are given opportunities for improvement and advancement in their own or related fields of work.

LAKEHEAD TECHNICAL INSTITUTE

The Lakehead Technical Institute at Port Arthur offers two-year courses in Forestry and in Mining. Its advanced academic division offers a first-year university programme for students who will proceed to courses in Arts, Science, Commerce, Forestry, Forest Engineering and Household Science in many leading universities in Canada and the United States.

PROVINCIAL INSTITUTE OF MINING

The Provincial Institute of Mining at Haileybury offers two-and three-year courses for training mining technicians. The graduates enter the survey and engineering departments of various mines, engage in exploration work, or do assay work in laboratories.

PROVINCIAL INSTITUTE OF TEXTILES

The Provincial Institute of Textiles at Hamilton gives three-year courses in the technical aspects of spinning, knitting, weaving, dyeing, and finishing textiles. In the third year, students do original investigations of some mill problems.

The textile industry supports the Institute through contributions of raw materials and machinery, as well as sponsorships, bursaries, and scholarships for students.

RYERSON INSTITUTE OF TECHNOLOGY

The Ryerson Institute of Technology at Toronto offers a wide range of courses, most of them of three years' duration. Students are trained for many occupations in the fields of electronics, radio and television, printing and graphic arts, industrial design, watchmaking and jewellery design, hotel management, journalism, merchandising, and others. The students in the retail merchandising courses spend half-time gaining work experience in selected retail establishments.

PROVINCIAL INSTITUTE OF TRADES

The Provincial Institute of Trades in Toronto is operated at the request of the Federal and Provincial Ministers of Labour to provide apprenticeship training in a number of trades. Both day and evening classes are held and courses are given in various building, electrical and mechanical trades.

Professional Training

NORMAL SCHOOL ENROLMENT

An increase occurred in the number of students enrolling in the teacher training institutions in the Province in the school year 1952-53. The eight Normal Schools had a total enrolment of 1,873, representing an increase of 245, or 15 per cent, compared with the figure for 1951-52.⁽⁴⁾ The Ontario College of Education had a total enrolment of 488 in courses leading to High School Assistants', Library, Home Economics, Vocational Training and Industrial Arts certificates. This figure was 37 below that of the previous year.

CHANGES IN COURSES

Announcement was made in 1952 of a reorganization of the system of preparing teachers for the elementary schools of Ontario, to come into effect in September, 1953. Two purposes underlie the changes proposed,—first, to improve teacher education, and second, to promote an increase in the supply of teachers. Under the plan announced, the academic requirement for admission to the one-year course leading to an Interim First Class certificate is being raised from standing in five Grade XIII papers, including one English paper, to standing in eight Grade XIII papers, including one English paper. At the same time a two-year course leading to an Interim First Class certificate is being established at the Normal Schools (other than the University of Ottawa Normal School) for applicants holding the Secondary School Graduation Diploma, General Course, at the Grade XII level. When the new courses begin, the name Normal School will be changed to Teachers' College, a name more descriptive of the work and purpose of the institution.

The changes noted are to be effective in September, 1953, but, to make more teachers available for the public and separate schools, one immediate step was taken at the time of the announcement. A Pre-Teachers'-College Summer Course was offered from July 2 to August 12, 1952, to graduates from Grade XII of the secondary schools, provided that the applicants held a Secondary School Graduation Diploma, General Course. Successful graduates of the summer course received temporary certificates valid in the elementary schools of the Province for one year. Holders of these certificates are to return for a second summer course in 1953 to qualify for the renewal of their certificates for a further year. On the completion of the two summer courses and two years of teaching, they will be eligible for admission to the one-year course leading to an Interim First Class certificate at a Teachers' College.

With the introduction of the Pre-Teachers'-College Summer Courses, announcement was made that the emergency summer sessions at the North Bay and Toronto Normal Schools for uncertificated teachers employed on Letters of Permission by school boards unable to secure the services of certificated teachers would be discontinued after the summer of 1953. Such emergency summer sessions have led to an Interim Second Class certificate, and have been held since 1947.

⁽⁴⁾ For table see p. 47

The two-year course and the Pre-Teachers'-College Summer Courses are designed to recruit additional teachers from the Grade XII graduates, who are more numerous than the Grade XIII graduates. The programme of the two-year course is being planned to include academic as well as professional subjects.

TEACHER SUPPLY

For the school year 1952-53 the supply of teachers for secondary schools was adequate except for commercial subjects, girls' physical education, home economics, and vocational shop work.

The sharply increased birth-rate in the years since World War II has been chiefly responsible for the unprecedented demand for additional teachers in the public and separate schools. Immigration has also been a contributing cause. The elementary school enrolment in September, 1952, totalled 45,785 more than in September, 1951, thus creating a need for approximately 1,400 new classrooms with teachers to staff them. Statistical studies indicate that this rate of increase is likely to continue for some years. The fact that young people now entering the teaching profession were born in the 1930's when the birth-rate was low, explains why students graduating from the secondary schools are not available in greater numbers to prepare for teaching.

The demand for elementary school teachers was met in 1952 by the graduation of teachers from the regular sessions of the eight Normal Schools of the Province, from the emergency summer sessions at the Toronto and North Bay Normal Schools, and from the Pre-Teachers'-College Summer Course, first year. The total from these groups was augmented by the return of a number of married women to the teaching profession and by the qualifying of teachers from other Provinces, or from Great Britain, for certification in Ontario.⁽⁷⁾

MEDICAL EXAMINATIONS

As a result of the medical examinations of applicants for admission to the Normal Schools, to the Ontario College of Education, and to the summer courses associated with these institutions, ten applicants were rejected and 75 applicants were required to waive disability privileges under the Teachers' Superannuation Act, in the year 1952.

Schools Attended by French-speaking Pupils

TEACHER-SUPPLY

In 1951-52 there were 154 teachers-in-training at the University of Ottawa Normal School, 27 of whom were enrolled in the First Class course and 127 in the Second Class course. As a result of the term and final examinations 25 students were awarded First Class certificates, and 113 obtained Second Class certificates.

There were in this school year 1,889 French-speaking teachers employed in the elementary schools. Of this number 1,606 or 85.2 percent held First or Second Class certificates.

SECONDARY SCHOOL CLASSES

The total enrolment of French-speaking students taking advanced French courses in secondary schools was 2,684.⁽⁸⁾

(7) See also p. 4

(8) For table see p. 90

To give a more complete picture of the secondary school enrolment it should be added that besides the 2,684 students reported above there were 1,889 French-speaking pupils enrolled in Grade IX and Grade X classes of elementary schools and 1,996 French-speaking students attending inspected private secondary schools in Ontario. Inspected private schools may, on the recommendation of the Inspector, qualify for certain privileges in reporting the standing of their pupils.

ELEMENTARY SCHOOLS

There were 57,493 French-speaking pupils enrolled in June, 1952, in separate and public elementary schools, an increase of 2,808 over the preceding year. The total of 57,493 includes 1,889 students in Grade IX and Grade X classes in elementary schools, and 238 pupils in auxiliary classes.⁽⁹⁾

CORRESPONDENCE COURSES

June, 1952, completed the tenth school year in which correspondence courses for French-speaking children of Ontario were given by the Department of Education. All the courses for pupils of Grade I to Grade VIII have been available since September, 1946.

A revision of the courses for the Primary and Junior Divisions (Grades I to VI) was partly completed during the year. Enrolment figures are shown in Part II of this report.⁽¹⁰⁾

Agriculture

The study of Agriculture is permitted by the regulations as an optional subject in both elementary and secondary schools. Special grants have been paid until this year for agriculture classes, but these will be, in 1953, incorporated in the general legislative grant and not paid as a separate item.

ELEMENTARY SCHOOLS

Agriculture may be a subject of study in Grades VII and VIII, and agricultural topics are included in the Natural Science courses for Grades IV, V and VI. In 1952 reports were received from 1,069 schools teaching agriculture, 787 of them rural. Of this total 624 schools having teachers with special certificates in Agriculture qualified for grants.⁽¹¹⁾

Activities under the Interdepartmental Committee of the Departments of Agriculture, Education, and Lands and Forests include school fairs and the improvement of school grounds. Interest was well maintained, with school Inspectors and the Representatives of the Department of Agriculture co-operating in local programmes.

SECONDARY SCHOOLS

Courses of instruction in Agriculture in secondary schools are of two types. Agricultural Science is optional with General Science, and agricultural topics may be included in the science courses. There are 144 schools, chiefly smaller schools or those serving rural areas, which provide Agricultural Science in this way in Grades IX to XII, and 37 schools which teach it in Grades IX and X.

There are now 85 schools with departments of Agriculture in which a two-year general course in Grades IX and X is provided, with instruction in Agriculture

⁽⁹⁾ For tables see p. 87

⁽¹⁰⁾ For tables see p. 158

⁽¹¹⁾ For table see p. 156

and Shop Work for boys and Home Economics for girls. Twenty-two schools are also providing courses in Grades XI and XII. Schools with departments of Agriculture usually provide extra services such as contacts with pupils and parents during the summer months, school meals and after school hours the activities of a community centre.⁽¹²⁾

TEACHER SUPPLY

Teachers of Agriculture are drawn from the graduates of the Ontario Agricultural College and from teachers who qualify for certificates in Agriculture by attending summer courses. All schools with departments of Agriculture have qualified teachers, but permissions had to be granted to 39 other teachers, chiefly for the smaller schools, for teaching Agricultural Science.⁽¹³⁾

PRACTICAL WORK

Topics studied in the courses in Agriculture include farm management, livestock judging, animal nutrition, animal breeding, plant breeding, feeds, feeding and management, drainage and land surveying, rural economics, soils and fertilizers, soil conservation, bee-keeping (most schools have from one to four colonies of bees), poultry science, landscape gardening, and farm forestry.

There is excellent co-operation with the Representatives of the Department of Agriculture throughout the Province. Approximately 1,000 pupils participate annually in county livestock and seed judging contests. A large number are in tractor clubs, calf clubs, garden clubs and forestry clubs. In the last survey made, 2,500 high school pupils were enrolled in clubs sponsored by the Ontario Department of Agriculture. Approximately 10,000 secondary school pupils are conducting home projects of some type annually. Service clubs are giving valuable assistance in many areas.

There has been an increased interest in participation by pupils in ploughing matches. There were 11 entries in the International Ploughing Match, secondary school class, at Carp on October 7-10, 1952. Another school entered a team in the Junior competition.

Most of the larger schools have provided tractors for instructional purposes, for use in experimental plots, for grass cutting and for snow removal.

Art

PUBLICATIONS

A research project conducted in close co-operation with the Auxiliary Branch of this Department led to a report, **ART EDUCATION FOR SLOW LEARNERS**, which was printed and distributed to Inspectors of schools and to teachers concerned with children of this description. The report discusses art education in relation to children of retarded mental development, and a three-year study of 575 slow learners formed the basis for the information contained in the report.

The book **ART EDUCATION IN THE KINDERGARTEN** was issued in a second edition and was distributed to new teachers.

Saturday morning classes conducted for the purpose of studying children of outstanding ability in art were held in the Ryerson Institute of Technology from October to March inclusive.

SUPERVISION AND TRAINING

Meetings of teachers have been held in several inspectorates. Lectures on art education were given to students at the Normal Schools. The summer courses in Art had again to be limited to an enrolment of 500. Some fifteen community programme workers were included in this number.

⁽¹²⁾ For tables see page 156

⁽¹³⁾ For tables see page 157

Audio-visual Education

SCHOOL BROADCASTS

A programme of one hundred and fourteen Ontario school broadcasts covering seventeen different school subjects was prepared for use in the elementary and secondary schools of the Province. These broadcasts were presented in co-operation with the Canadian Broadcasting Corporation over a network of twenty-four radio stations.

Two evaluation surveys of the effectiveness of these broadcasts were made during the year. Constructive criticisms were received, and helpful comments assisted in improved planning for succeeding series.

Twenty-five British School Broadcasts were also made available to Ontario schools through the courtesy of the British Broadcasting Corporation. Two additional series, Adventures in Speech, and Agricultural Science, were received from the Departments of Education of Manitoba and the Atlantic provinces respectively. These exchange series have been favourably received in most schools, and they fill a useful place in our schedule of school broadcasts.

The Department of Transport continued to issue free radio licenses to Ontario schools, with a small increase of 136 applications reported during the year.

FILMS AND FILMSTRIPS

The use of sound films continued to show an increase, with a total recorded audience of 6,353,424 students. Fifty-nine new film titles were approved as additions to the Library in 1952, and 923 more prints of films already listed in the Visual Education catalogue were purchased. Sixty-three schools registered new film projectors with the Visual Education Branch for film service during the year.

Numerous enquiries for the recommended filmstrip lists prepared by Ontario teachers enrolled in the Audio-Visual Education summer course reflect an increasing interest in this useful visual aid.

PUBLICATIONS

A teacher's manual outlining the programmes of Ontario school broadcasts was distributed to all Ontario teachers in September.

A supplement to the Visual Education Catalogue was prepared and forwarded during the year to all Ontario schools using the film services of the Visual Education Branch.

Auxiliary Education

One important part of Auxiliary Education is that dealing with the education and training of cripples. In 1942-43 two physically handicapped persons were granted money for their rehabilitation training. In 1952-53 one hundred and twenty adolescents and adults with severe physical handicaps were provided with training. These numbers indicate the expansion which has taken place in this phase of the work of the Auxiliary Education Branch.

INSTRUCTION OF THE CRIPPLED

Arthritis, asthma and respiratory infections, cerebral palsy, diabetes, epilepsy, fractures, glandular imbalance, heart disease, nervous disorders, operations, and poliomyelitis are the chief ailments which cause children to be absent from school for months or years at a time. For thirty years the Ontario Department of Education, by providing special grants, has encouraged school boards to provide home

instruction teaching services. Approximately 600 pupils are currently in receipt of these services.

The effect on a child's education of crippling conditions which necessitate the use of wheel chairs, braces or crutches, and which restrict his movements to the home area can be overcome in many cases by providing transportation to and from school. For more than twenty-five years the Department has given grant support to school boards which provide transportation for crippled children, to orthopaedic classes, or to the regular grade classes. Over two hundred crippled children were enrolled in orthopaedic classes or units in 1952.

It has been found that children in hospitals undergoing months or years of treatment will benefit emotionally, socially, intellectually and academically by receiving instruction similar to that given in day schools. Nearly two hundred children in Ontario hospitals are receiving instruction while they are kept in hospital.

In sanatorium schools almost twenty-five hundred children, adults and adolescents are receiving educational therapy while they recover from the emotional and physical effects of tuberculosis. Schools for children were begun in 1920 and extended to adults in 1930. Sanatorium school boards have been organized in all thirteen sanatoria to administer the educational services needed by the patients.

Since 1937 special instructional services have been provided to victims of poliomyelitis. After World War II similar services were supplied to paraplegics and arthritics on the basis of individual needs and without the usual restrictions as to age.

HABILITATION TRAINING

Adolescents who have completed their elementary or secondary school reach a point where they must consider the problem of securing employment. With about 1,200 physically handicapped persons registered in Grades I to XIII inclusive, it is expected that over 100 each year will require habilitation training to prepare for gainful employment.

Every year as many as thirty adolescents will be found unable to attend a secondary school of any kind for commercial or vocational training because their crippling condition obviates the use of stairs. For some of the others who try to attend a secondary school the emotional effects of being helped from classroom to classroom usually results in their separation from school, without completing any of the recognized secondary courses. These persons have problems which cannot satisfactorily be met by regular school courses. Since they have not been employed, their problem is habilitation and placement.

Each person's case is treated individually. Medical, educational, psychological and social welfare data are collected and studied. Reports and recommendations of private agencies are studied before any plan for training is suggested. The trainee may be given training by a commercial or trade school or private instructor.

The record of successful training and subsequent employment is very creditable. Trainees who have taken clerical, watch-repairing, shoe-repairing, radio-repairing, switchboard and office practice, stenographic, upholstering or other types of training have done well.

REHABILITATION TRAINING

Adults who have been hospitalized for tuberculosis, arthritis, paraplegia or operations resulting in impairment of the use of hands or legs usually require training to fit them for employment in a new occupation physically less arduous than their previous work. This is particularly true of the ex-sanatorium patient who must guard his physical health with extreme care since a second admission to a sanatorium may mean that he will never work again.

Rehabilitation training assumes proportion when it is remembered that many of the trainees are on welfare assistance after a long period of hospitalization at

public expense and that after training they can become self-supporting again, without fear of rehospitalization and the unhappy consequences. For 1952 there were 110 persons in habilitation and rehabilitation units among whom 22 were back at work by March 1, 1953. The Sanatorium Hospital and School Staffs should be credited with the placement of an equal number.

These are men and women whose hospitalization has cost a great deal. Their immediate prospects of mental, physical, economic and social welfare are good and they are not in the position of being supported by mother's allowance, welfare assistance or direct relief grants. The average cost of instruction for each trainee has been less than \$300.

Rehabilitation units are treated individually on the same plan as has been described for habilitation units. The assistance of officials of the Departments of Health, Welfare, and Labour has been invaluable. The private agencies such as the Canadian Paraplegic Association, the Canadian Arthritis and Rheumatism Association, the Samaritan Club, the Crippled Civilians, and the Amity Club have made important contributions and have given valuable assistance, particularly in the discovery of cases and placement of training.

A small number of prospective trainees have refused training and have preferred to remain on welfare assistance. Some have been unwilling to take the courses recommended and available because they want training for which it is considered that they have not the necessary qualifications. Some have not been discovered until ten years after the most opportune time for beginning training.

Tables showing the types and numbers of new classes organized throughout the Province in 1952, and the surveys conducted by officials of the Department of Education will be found in Part II of this Report, on page 85.

Correspondence Courses

COURSES AVAILABLE

At the elementary school level courses were provided in 1952 for children in all subjects of Grades I to VIII, for English and French-speaking children. Courses for adults in English and Social Studies covering the senior grades of the elementary school were also available.

All the compulsory subjects and more than the minimum number of optional academic subjects required in each grade from IX to XIII were provided at the secondary school level.

Additional services were also provided. Teaching aids were sent out to help unqualified teachers. Courses in Elementary English for adults were supplied to the Community Programmes Branch for use in their classes for new Canadians. A library of 926 books supplemented the reading of both elementary and secondary students in English.

ENROLMENT

The enrolment for correspondence lessons was at the end of 1952 almost evenly divided between the elementary and secondary levels, 842 elementary and 841 secondary pupils.⁽¹⁴⁾ Over the past few years the elementary enrolment has decreased and the secondary enrolment has been increasing rapidly. The trend for the elementary pupils is desirable if it means, as it probably does, that more pupils are going to school as accommodation and transportation are provided. Approximately 74% of the enrolment for elementary courses is from children in the 17 northern inspectorial districts. Enrolment in the courses of the secondary grades is chiefly made up of adults who have left school and are now trying to raise their educational qualifications.

(14) For table see p. 158

The geographical distribution of lessons was widespread. Lessons went to the Arctic, the North-West Territories, the United States, Cuba, Mexico, South America, England, France, Holland, Germany, Italy, Africa, India, Malaya and Japan, to enable 128 students to keep pace with the school programme in their home Province.

Patients in sanatoria and inmates of two penitentiaries, four reformatories and two reform schools were assisted, supplementing the regular educational work in these institutions.

Examinations and Scholarships

DEPARTMENTAL EXAMINATIONS

Statistics showing the results of the Grade XIII and the Normal School examinations, as well as the number of Intermediate certificates, Secondary School Graduation Diplomas, and Secondary School Honour Graduation Diplomas, will be found in Part II of this Report.⁽¹⁵⁾

In 1952 for the first time a short dictation test was used as part of the Grade XIII test in French Composition. The test was administered by means of a phonograph record, a copy of which was provided for each examination room. This innovation worked so successfully that for only four examination rooms was it considered necessary to make any special allowance for candidates who were unable to hear the record distinctly.

STUDENT-AID

(a) Dominion-Provincial Student-Aid Bursaries

The purpose of these bursaries is to assist students of adequate ability who are financially unable to continue their education. In 1943-44 when the first scholarships were established, 192 applicants were awarded a total of \$45,950. In 1951-52 a total of 1,399 students received bursaries totalling \$279,662. The contributions of the Government of Canada to the bursary programme has increased from \$31,974 in 1944-45 to \$60,000. In the same period the Provincial contribution has increased from \$100,000 to \$219,662.⁽¹⁶⁾

(b) Transportation Assistance

The transportation subsidies provided by the Department of Education for persons who reside in the territorial districts and are enrolled in an eligible institution of university rank have now been in operation for six years. In 1952 the sum of \$11,736.95 was paid in transportation assistance to 600 students. Of these 155 reside west, and 445 east of Sault Ste. Marie.⁽¹⁷⁾

(c) Scholarships for Post-graduate Study in France

The Department of Education Act provides for the payment out of the Consolidated Revenue Fund annually of the sum of \$6,000 to be awarded by the Minister of Education in scholarships to residents of Ontario for the purpose of enabling them to pursue courses of study in France. For the school year 1952-53 the holders of these scholarships were Miss Margaret M. Baldwin, Collegiate-Vocational Institute, Stratford; Mr. Hubert T. Ferguson, Collegiate Institute, Stamford; Miss Jacqueline B. Gregory, Hon J. C. Patterson Collegiate Institute, Windsor; Miss Noreen Sheppard, Bloor Collegiate Institute, Toronto.

⁽¹⁵⁾ For tables see p. 111

⁽¹⁶⁾ For table see p. 114

⁽¹⁷⁾ For table see p. 114

INTERCHANGE OF TEACHERS

The Department of Education encourages interchange of teachers as a means of maintaining Commonwealth unity, of promoting national and international good-will and understanding, and of broadening teachers' interests and their knowledge of educational methods.

For the school year 1952-53 twenty exchanges were arranged, seventeen with the British Isles and three with other provinces.

Guidance

Guidance has come to be recognized as an essential educational service. After a period of rapid growth it has passed into a second stage of development in which greater efficiency rather than continued expansion is the aim.

INFORMATION

A first and minimum objective continues to be the provision of the information needed by the pupil in making plans for his further education and for entry into the occupational world. Through the services of the Guidance Centre the Ontario Department of Education sends to all secondary schools a monthly budget of material as a basis for their active information files. In addition the Mailing Service provides a regular means of distributing the growing volume of additional information supplied by the universities, industry, business, the hospitals, and the armed services. The Federal Department of Labour provides information on a national scale. The schools are expected to add local information, to keep the files up-to-date, and to see that the information is made available to pupils and their parents.

In addition to such printed material, information is provided by other means such as Careers Days, Educational Conferences, films, and plant visits. A feature of the year has been the effort to bridge the gap between Grade VIII and Grade IX and between secondary school and more advanced training schools. The exchange of information between schools, Grade VIII visits to secondary schools, classroom discussion of training plans, and conferences with representatives from educational institutions beyond high school have all encouraged careful planning. Another special project has been the organized effort to assist pupils in the wise choice of options within their own school, and to include parents in the responsibility for choice.

ELEMENTARY SCHOOLS

The voluntary movement in the elementary school toward provision of guidance services is growing. It is becoming more generally understood that at this stage stress must be on child development rather than on educational and occupational choice, and that in the elementary school the classroom teacher is the essential guidance worker. Further progress must wait upon more trained leadership.

COUNSELLING AND GROUP WORK

The Group Work in Grade IX which is offered in all schools, and the additional group work in other grades of elementary and secondary school provide an economical means of meeting needs that are common to many students. It cannot replace the counselling of students regarding individual needs. In schools which provide carefully selected teachers with specialized training and adequate time for counselling, valuable help is being given.

RECORDS

The Ontario School Record system first offered in 1950 by the Department of Education has been adopted by most elementary schools and many secondary schools. Transfer of the record from the elementary to the high school is now common practice. Transfer between secondary schools is beginning. The record is proving invaluable to principals and counsellors, and of increasing usefulness to other teachers.

TRAINING

It must be recognized that enthusiasm and interest cannot replace professional training. Approximately 1,100 teachers now hold an Ontario guidance certificate. Large schools are reasonably well-staffed. Very small schools must continue to rely on group work and the individual help that can be given incidentally. In schools of medium size the shortage of trained leadership continues to be the most serious handicap to progress.⁽¹⁸⁾ Teachers with guidance training and experience are assuming more responsibility for the in-service training of other teachers who share the work. This training is helpful but cannot replace full professional training.

SUPERVISION

Approximately 350 visits have been made to secondary schools and 150 visits to elementary schools by members of the Guidance Branch. In addition almost every Inspector of elementary schools has been consulted regarding guidance in the schools of his inspectorate. An effort has been made to relate guidance to other school and community services.

Music

MUSIC INSTRUCTION

Regular courses in music under the supervision of qualified music teachers were provided in eighty-six percent of the classrooms in elementary schools in 1952.⁽¹⁹⁾ Music courses, vocal, instrumental, or both, were offered in 373 secondary schools. There were 254 school choirs, 58 orchestras and 63 bands. Forty-five operas were performed during the year.⁽²⁰⁾

TEACHERS AND TRAINING

There were 782 certificated teachers and supervisors of music engaged in elementary schools and 251 in secondary schools.

Music is taught to all teachers-in-training at the Provincial normal schools. There was an enrolment of 429 teachers at the summer course in music in 1952. Nine different courses in vocal and instrumental music were offered.

MUSIC OPTION

Music is one of the optional subjects in Grades IX to XIII of the secondary schools. Pupils may obtain standing either by taking the school course or by submitting certificates of the Royal Conservatory of Music in Toronto or of other accredited examining bodies. Grade XII standing was achieved by 904 pupils in 1952. At the same time 124 pupils passed the Departmental Grade XIII examinations in Music, and 349 pupils in 122 schools presented equivalent certificates.

⁽¹⁸⁾ For table see p. 158

⁽¹⁹⁾ For tables see p. 157

⁽²⁰⁾ For tables see p. 157

MUSIC FESTIVALS

Approximately 125 music festivals were held in different parts of the Province. Festivals are encouraged as a means of motivating classroom work, establishing standards of performance, and stimulating public interest.

RADIO

During January, February and March the Department of Education, in co-operation with the Canadian Broadcasting Corporation, presented twenty-four music broadcasts in four series, i.e. "Primary School Music", five fifteen-minute programmes for Grades I - III; "Junior School Music", five fifteen-minute programmes for Grades IV - VI; "Music for Young Folk", ten thirty-minute programmes for Grades VII - X; "Ontario Sings", four fifteen-minute programmes for Grades V - VIII. For all these broadcasts, except "Ontario Sings", the commentary was prepared and given by the Provincial Director of Music.

CONCERTS

To bring live music of high quality to secondary school pupils in smaller communities, and to encourage young artists who are for the most part graduates of the Ontario schools, the Department has given, during seven years, 709 concerts by 198 artists. In 1951-52 75 artists gave 155 concerts in 46 towns.

MUSIC SCHOLARSHIPS

Music scholarships, formerly awarded by the Junior Leagues of Hamilton and Toronto, were discontinued in 1949-50. In the year 1951-52 the Department of Education awarded scholarships amounting to a total of \$1,500 to pupils in Grades IX and X of Ontario schools. The scholarships were for performance on any recognized instrument. 112 young school musicians were nominated for these awards.

School Attendance

ENROLMENT

For the school year 1951-52 the total enrolment of all schools of the provincial system, exclusive of night schools, was 814,087, an increase of 45,780 over the preceding year. The increase in the elementary enrolment was 42,983, and in the secondary enrolment it was 2,797.⁽²¹⁾

SCHOOLS AND TEACHERS

The number of public and separate schools in operation was 6,825, a decrease of 3 from the preceding year. Although many new schools were opened others were closed and their pupils transported to larger and better-equipped schools. The total staff numbered 22,327, an increase of 1,078 over the year 1950-51. The number of secondary schools in operation was 390, a decrease of 10 from the preceding year, with a staff of 6,016, which was an increase of 221. The percentage attendance for elementary schools was 93.5 and for secondary schools 94.⁽²²⁾

⁽²¹⁾ For tables see p. 54

⁽²²⁾ For tables see p. 58

EMPLOYMENT

The number of school children's employment certificates issued to children under fourteen years of age during the calendar year 1952 was 598, a decrease of 235 from the year 1951. These certificates, which are valid for not more than six weeks in a term, may be issued if the need is urgent. The number of home permits issued to pupils fourteen to sixteen years of age was 1,119, and the number of employment certificates issued was 3,947, decreases of 181 and 837 respectively.⁽²³⁾

Physical and Health Education

While Physical and Health Education has been for many years an obligatory subject, it is only recently that there has been a change in teaching methods designed to meet the growth and developmental needs of children. The urbanization of this province in recent years has emphasized the importance of planned activity as an essential requirement in all our school grades. Health Education has received considerable attention during the past year, with emphasis on teaching methods to improve the health attitudes and habits of school children.

TEACHER-TRAINING

There is a shortage of qualified men and women teachers of Physical and Health and Education for the secondary schools. Over 300 elementary rural school teachers attended In-Service Training Courses provided by the Department of Education. Teachers of one inspectorate carried out a detailed study of health problems. Summer school courses attracted 250 elementary and secondary school teachers.

CAMPS

Over 400 secondary school boys and girls took advantage of the training provided by the Athletic Leadership Camp during the months of July and August. In addition to the pupils nominated by the secondary schools of Ontario, each of the provinces selected one representative to attend the camp during the first two weeks of August. This gave the Ontario boys an opportunity of learning more about programmes conducted in other provinces.

A follow-up survey of the boys attending the 1950 Athletic Leadership Camp showed how extensively these graduates are participating in school and community life. Over 80% made some contribution to community activities. The following figures show the contribution to school life: 83% acted as squad leaders; 70% helped coach intra-mural teams; 87% officiated in intramural activities; 29% became president of athletic associations; 37% were executive members of athletic associations; 37% were members of the Student Council, and 30% participated in drama, music, and other school activities. 14% are now engaged in teaching and 66% are attending universities.

NON-PROFIT CAMPS

Short courses were provided for training Camp Counsellors to assist in non-profit camps. The three-week course conducted at the Belwood Camp, Fergus, was attended by 150 girls, while 130 boys attended a similar course at the Ontario Camp Leadership Centre, Irondale. There is evidence that these graduates are giving excellent service to the non-profit camps.

Grants totalling \$35,000 were paid to non-profit camps on a per capita basis. In addition advisory visits were paid to 175 camps and an information service was made available to more than 300 listed camps.

⁽²³⁾ For tables see p. 53

Community Programmes

The Community Programmes Branch was established for the purpose of administering Provincial services in the fields of community recreation and adult education. These services are for the purpose of encouraging the development of programmes of cultural, social, physical and educational activities by public and private agencies in communities throughout the Province. In fulfilling this purpose, the Branch provides the following specific services:

Assists municipal councils to establish a committee responsible to the municipal council for a balanced programme of recreation in the municipality.

Administers provincial grants to assist municipal councils in financing public programmes of recreation, and assesses such programmes.

Advises and assists municipal recreation committees and other community organizations in planning, organizing and operating their programmes of recreation or adult education.

Assists community recreation or adult education organizations to develop and maintain effective leadership.

Carries out training of non-English-speaking immigrants in language and citizenship.

Advises and assists provincial agencies which are contributing to adult education in Canadian citizenship, and provides resource material for their programmes.

Trains and recommends for provincial certification professional recreation workers who are employed full-time in municipal recreation programmes.

Prepares and circulates publications which may be stimulating and helpful to community leaders and interest groups.

Carries on research projects or special studies which may contribute to the knowledge or techniques in the fields of recreation and adult education in Ontario.

ANNUAL GRANTS

Annual grants are paid to municipalities which appoint Municipal Recreation Committees under the Regulations of the Department of Education and which establish and maintain recreation services. One hundred and seventy-nine municipalities have organized public recreation programmes and of these 56 municipalities employ full-time Directors of Recreation. In 1952, 140 municipalities received grants totalling \$228,542.49. It is estimated that 150 municipalities will receive \$255,000 in 1953.

Grants are also made to provincial organizations conducting programmes of recreation.

ADVISORY SERVICES

The Community Programmes Branch provides two types of advisory and consultant services.

- (1) By technical advisors who are specialists in specific areas of recreation. These specialists are available to communities to provide an advisory service related to problems of a specific nature. They produce and make available resource material; provide course outlines and advise regarding leadership technique; advise regarding supplementary aids such as films, books, pamphlets, displays, etc.; and personally assist in leadership training.
- (2) By field representatives in the various districts of the Province. These representatives assist municipalities, community organizations and agencies, in planning, organizing and operating programmes of recreation and adult education. They advise and assist in planning and operating local leadership training courses; and carry out with each municipal recreation authority a continuous evaluation of the local programmes of recreation.

LEADERSHIP TRAINING

A three-year course of training for Municipal Recreation Directors leading to provincial certification has been established. In 1952 37 Directors were enrolled in the first-year course and 36 Directors were enrolled in the second-year course.

Community group leaders were provided with courses in Art, the use of Audio-Visual Aids, Parent Education and Family Relations, Leadership Techniques, Handicrafts, Physical Recreation and Sports Coaching, Social Recreation, and Theatre. Altogether 174 courses with a total enrolment of 5,916 were held in centres throughout the Province.

Rural group leaders attended night schools operated jointly by the Community Programmes Branch and the Department of Agriculture. In 1952 twenty of these schools offering instruction in from five to ten of the following subjects were conducted: Woodworking, Public Speaking, Sewing, Motor Mechanics, Folk Dancing and Singing, Hobby Crafts, Welding and Metalcraft, French, Farm Engineering, Drama, Weaving, Farm Science, Farm Machinery, Music, Wood Refinishing, Leathercraft, Home Decorating, Home Building and Repairs, Radio, Electricity, Shop Work, Art, Plastics and Art Metal Work, Oil Painting, Design, Home Nursing, Food and Nutrition, Rural Planning, Bookkeeping, Typing and Shorthand.

Advanced summer courses are given to teachers and community leaders by the staff of the Branch at the regular summer schools of the Department at Queen's University, University of Western Ontario, and McMaster University.

PLAYGROUND LEADERSHIP

In response to recurring demands special emphasis was given to training of supervisors for summer programmes on playgrounds and beaches. Special attention was given to supervision and discipline, planning, specific skills in games, crafts teaching and general leadership. Four training courses were carried on with an attendance of 484 supervisor-trainees.

EXPERIMENTAL PROJECTS

Several successful experiments were carried out in 1952. One of these consisted of three community workshops. These are a series of meetings for several consecutive days for the purpose of intensively studying problems associated with the community.

At the request of the Ontario Farm organization the Branch also participated in carrying out experimental leadership training courses in six counties. Participants were representative of each county and were considered capable of giving leadership in their communities.

A course was held at McMaster University for the purpose of training skilled craftsmen in the techniques of instruction, with special reference to teaching adult groups. Subsequent observations indicate that a high percentage of participants became leaders or instructors of local skill groups.

In consultation with the Community Programmes Branch, two communities in the Toronto area established and operated self-supporting evening classes using the local school facilities. The results of the first season indicate that this approach can effect an important part in meeting specific adult educational needs in a community.

PUBLICATIONS

Increased demand has been noted during the past year for the publications and instructional material on recreation and adult education which are prepared and issued by the Branch. These include the Community Courier, a monthly

magazine of general interest, literature and instructional aids in Citizenship, Parent Education, Theatre, Hockey, Baseball, and Puppetry; and playground manuals on Art and Crafts, Quiet Periods, Sports and Active Games.

CITIZENSHIP TRAINING

In 1952 there were 22,456 students enrolled in 772 Citizenship Training Classes, of which 705 classes were operated by local school boards, and 67 classes directed by the Branch were operated in outlying territories.

In 1952 tests were carried out to ascertain the degree of proficiency of students attending the various classes. Proficiency certificates were presented to 1,939 students who successfully passed a test based upon instruction received. These constituted 78.5% of those writing the test.

Special summer classes in Advanced English for Newcomers were held at the University of Toronto and at McMaster University. A special experimental class for beginners was also held at the University of Toronto during the summer.

Public Libraries

BUILDINGS

Although some public libraries are housed in buildings which are obsolescent, overcrowded, and badly adapted to the needs of contemporary service, progress in the correction of these conditions can be reported in many parts of the Province. In Sudbury a splendid new library, modern in all respects, functional and beautiful as well, has recently been opened. Toronto has opened two new branches, one in converted quarters downtown, and the other embodying the new principle which provides office space for rent on the upper floors. This rent is sufficient to take care of the carrying charges of the new building. In London a major addition has been made to the building, thus completing the plans as drawn in 1941. The Hamilton board has spent a large sum in the remodelling of the Main Library, bringing its interior arrangement into closer relationship with contemporary needs. At Burlington a large house has been successfully converted to library use. This conversion has produced one of the most attractive town libraries in the Province. In Westport a well-designed and attractive small library has been built. It is hoped that the completion of this project will serve as an example and stimulus to other villages.

GRANTS

Legislative grants paid to libraries in 1952 totalled \$600,000. Of this amount \$471,805 went to public libraries, \$35,576 to library associations, \$60,500 to county libraries, and \$20,119 for special grants and adjustments.

In 1947 library grants amounted to \$105,000 and they have increased annually to the present figure. Grants are based on the accomplishments of the libraries, and the increased grants reflect the expansion and improvement of library services. Under the stimulus of this government aid the amount of local support has increased so that only 15 libraries are now receiving less than 50c. per capita from local levy; 156 are receiving between 50c. and \$1.00; 46 are receiving more than \$1.00.

SERVICE

There were 541 library agencies operating in 1952, made up of 225 public libraries, 255 library associations, 48 branch public libraries, and 13 county libraries. Two more bookmobiles were put into city use, in Kitchener and St. Thomas.

Two new public libraries were established, and one new library association. Four association libraries became public libraries and one was dissolved. One new county library was formed.

It is estimated that 3,000,000 people in the Province are within reach of library service. There were 847,000 reported library users.

COST OF SERVICE

The total expenditures on public libraries in 1951 amounted to \$3,378,604; on library associations \$118,143; and on county libraries \$134,474.

TRAVELLING LIBRARIES

Book circulation totalled 63,500 volumes from 1,348 boxes sent out. Of these boxes, 950 went to elementary schools, 69 to secondary schools, 130 to rural libraries, 37 to Women's Institutes, and 93 to Farm Forum groups. Sixty new farm forums borrowed books during the year. Other agencies using the service were summer camps, folk schools, leadership training groups, Indian schools, hospitals, industrial camps, and reading clubs.

The professional library for rural teachers has been enlarged, and its use, encouraged by the inspectors, has shown a steady increase.⁽²⁴⁾

Public Records and Archives

During the year 1952 certain important additions were made to the furnishings of the Archives Building. The installation of shelving was completed and improved document-cases were purchased. For the reproduction of manuscripts a photostat camera and a microfilm camera were acquired, and both have been much used. With the microfilm camera the almost complete file of the Brantford Courier was placed on film. A number of photostat copies of documents were purchased by students using the Archives.

MANUSCRIPT DIVISION

Several important collections of manuscripts have recently been transferred to the Archives.

From the Attorney-General's Department came files of general correspondence for the years 1873-1895, as well as letter-books dating from 1872 to 1889. From the same Department a large number of miscellaneous documents were received, related to the pre-war activities of subversive organizations.

With the aid of the Inspector of Legal Offices and with the co-operation of the Clerks of the Peace throughout the Province, valuable records of the early Courts of Quarter Sessions of the Peace were obtained. In these early days the Courts and the Justices of the Peace performed many administrative, as well as purely judicial, functions.

Four collections of private papers were transferred by the University of Toronto on indefinite loan to the Archives: the John Graves Simcoe Papers, the Edward Blake Papers, the John A. Macdonald Papers, and the George Gordon Papers. The first two are large and extremely important collections which would be indispensable to any one studying the careers of the first Lieutenant-Governor of Upper Canada or the second Premier of Ontario. Included in the Simcoe Papers are the valuable drawings of Lady Simcoe which, in many cases, furnish the sole pictorial records of parts of Upper Canada at that early period. The Macdonald Papers include thirty-nine letters of the former Prime Minister, some of them of considerable value.

From the Canada Company, through its agents, the Canada Permanent Mortgage Corporation, a valuable collection of the records of that Company was received. At the same time the Dominion Archivist kindly gave us all the

⁽²⁴⁾ For statistical tables relative to this report see p. 139

Canada Company Papers in his possession. In addition, the Company has agreed that its London records shall be transferred to us. When these are received, the Provincial Archives will possess all the important records of the Company which was responsible for settling a considerable portion of the Province. The Sir George Foster Papers, which recently came to us, are to be transferred to the Dominion Archives.

Included in the numerous collections and individual documents acquired from private sources were miscellaneous letters and a letter-book of the Honourable Richard Cartwright of Kingston; photostat copies of papers of the Honourable Robert Nelles of Grimsby, and of Charles Rankin, one of Ontario's early surveyors; some papers of Sir Daniel Wilson, President of the University of Toronto; and a collection of the papers of Sir William Hearst, Prime Minister of Ontario.

Complete inventories were made of the following collections: the George S. Henry Papers, the Sir Daniel Wilson Papers, the Sir George Foster Papers, the Sir William Hearst Papers, and the records of the Department of Travel and Publicity.

A calendar of the records of the Courts of Quarter Sessions and a list of the field notes and diaries in our possession were also prepared. Preliminary work on inventories of various other collections was begun, including the very extensive and complex records of the former Department of Crown Lands. A certain number of index cards covering the newly inventoried material were also prepared.

A constant search for new documents dealing with the history of Ontario has been carried on, and several promising negotiations were begun.

LIBRARY AND MAP DIVISION

The task of cataloguing and classifying the books in the library was completed during the year by a trained librarian. A card index of the articles in the Ontario Historical Society's annual publications was also prepared. By the end of the year the cataloguing of all government publications was under way.

The early newspapers of the Province which have been microfilmed by the Canadian Library Association are now available on film in the Reading Room. In addition, the Archives are in a position to microfilm material such as newspapers, manuscripts, atlases, and rare books.

The accessions for 1952 amounted to 43 books, 35 pamphlets, 132 maps, 76 pictures (mostly photographs,) and 23 volumes of newspapers. Some of the material consists of photostats of rare items. Among the original material were several very valuable Selkirk items. The Archives receive 62 periodicals and government publications.

SERVICES

The Reading Room facilities have served between four and five hundred visitors during the year. In addition, the Archives deal with a very large number of inquiries which come through the mail and by telephone.

Throughout the school year reproductions of carefully chosen documents have continued to be sent to various secondary schools throughout the Province, a service which seems to be much appreciated by the staff and pupils.

Ontario School for the Blind

ENROLMENT

One hundred and eighty-five students were enrolled during the year 1952. Nine left during the year leaving the June 1953 enrolment 176, of whom 89 were boys and 87 girls. There were 112 students from Ontario, 22 from Manitoba, 23 from Saskatchewan, and 19 from Alberta.⁽²⁵⁾

⁽²⁵⁾ For tables see p. 159

PROGRAMME

A balanced programme of academic, physical and social activities, suited to the needs and abilities of the pupils, was provided. Evidence of success in academic instruction is provided by graduates of the school attending St. Patrick's College, Ottawa, the University of Western Ontario, and the School of Graduate Studies of the University of Toronto.

Individual and group achievements in music attended the activities of the pupils in this subject which has such an important place in the school.

A vigorous programme in Physical Education also resulted in extra-curricular activities and some successes in competitive sports.

Ontario School for the Deaf

ENROLMENT

The enrolment of the Ontario School for the Deaf on September 15, 1952, was 360, a decrease of two from the total of the previous September. During the year it reached an all-time high of 364.⁽²⁶⁾ Most of these children were profoundly deaf. Their hearing losses in decibels for the better ear, as determined by the use of a pure-tone audiometer, were as follows: 90-100 decibels, 194 pupils; 80-90 decibels, 55 pupils; 70-79 decibels, 48 pupils; 60-69 decibels, 37 pupils; 50-59 decibels, 17 pupils; 40-49 decibels, 7 pupils; 30-39 decibels, 2 pupils.

The nine pupils with hearing losses under 50 decibels were not only hard-of-hearing but lived in communities where special provision could not be made for their education.

PROGRAMME

During the period under review, a special room was sound treated and equipped with a group hearing aid for the purpose of improving the facilities for auditory training. The new room was provided by partitioning the largest classroom. An auditory testing room was fitted up at the same time. Three additional classrooms were equipped with group hearing aids. Two teachers were added to the staff, one in the senior school, and one in the junior school to provide for children to be taken in small groups to the new auditory training room. A new linotype machine was added to the print shop.

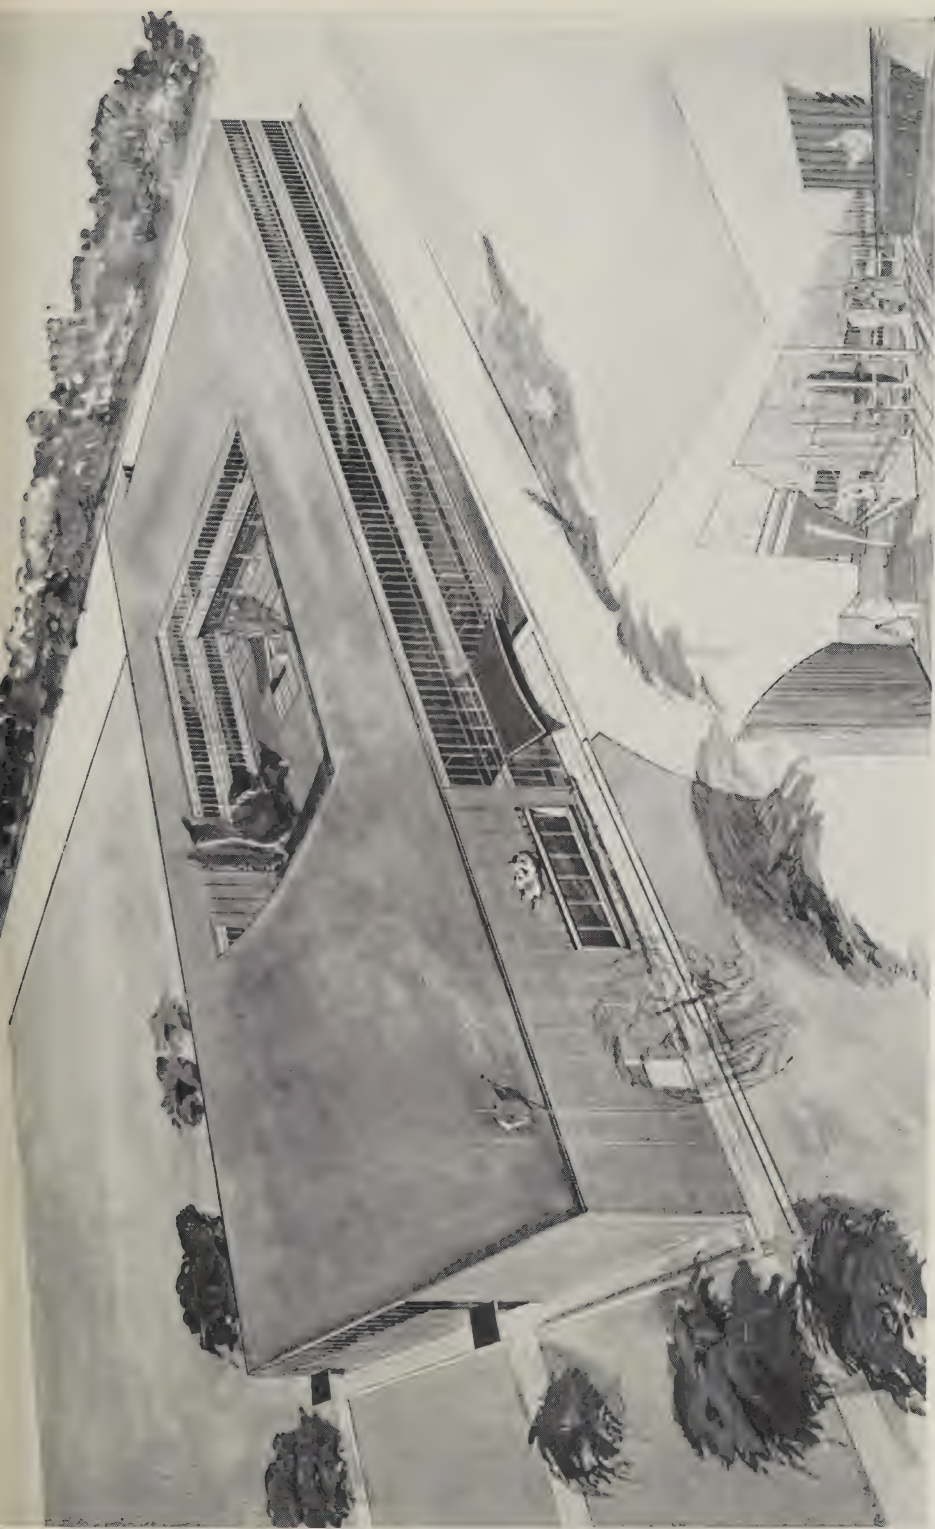

School plays and pageants continue to provide important training for the children and were presented to large audiences in the school auditorium. The annual visiting day and display of work from the academic and vocational classes in June was attended by a particularly large number of parents and friends of the children.

Service Record

IN MEMORIAM

ROY C. CASSIE, B.A., Inspector of Public Schools for District Division 16, died in Parry Sound on June 29, 1952. He was born in Fergus on July 25, 1900, and attended public and high school in that town. He attended North Bay Normal School and taught public school in Nairn, Floridale, Garson Mine, Fergus, and Fort Erie. In 1936 he obtained the Bachelor of Arts degree from the University of Western Ontario. He was principal of Wintemute Public School,

Fort Erie, when he received his appointment as Public School Inspector for District Division 9, on September 1, 1942, with residence at Cochrane. On September 1, 1945, he was transferred to District Division 15, with residence at Parry Sound. Mr. Cassie was a faithful public servant in the inspectorates in which he served. Many children in Parry Sound District owe him a debt of gratitude for encouraging the School Boards to organize numerous transportation routes which made it possible for those who resided in remote areas to attend public and high school. Mr. Cassie was small in stature but an inspiring leader of teachers and trustees. His fellow inspectors were deeply indebted to him for his untiring efforts on their behalf when he served as president of their group.

THOMAS R. FERGUSON, M.A., who died in Uxbridge, September 16, 1952, was born near Kincardine, in Bruce County. He received his elementary and secondary education in Wiarton and graduated from Queen's University with a Master's degree in Mathematics and Physics. He taught in the public school at Oil Springs for four years and served as principal of the public and continuation school there for an additional year. Mr. Ferguson then taught Mathematics in the Midland High School and in the Cornwall Collegiate Institute, and served for a term as principal of Uxbridge High School. In 1914 he was appointed Inspector of Public Schools for Ontario County North, with headquarters at Uxbridge, and held this position until his retirement in 1943.

ALVIN F. HANSULD, B.S.A., B.Paed., was born in East Zorra in Oxford County. He attended the public school in S.S. No. 7 East Zorra, the Tavistock Continuation School, and the Stratford Collegiate Institute. He graduated from the Stratford Normal School in 1911. Mr. Hansuld taught for a number of years in rural schools at Heidelberg and New Dundee. In 1920 he graduated from the Ontario Agricultural College, Guelph. For four years he was a member of the staff of the Prince of Wales College, Charlottetown, and later taught in the Sault Ste. Marie Technical School. For ten years he was Principal of Pine Street Public School, Port Arthur. In 1937, Mr. Hansuld was appointed Public School Inspector for Dufferin County, and in 1939 was transferred to the Stratford Normal School where he was Science Master for three years. From 1942 to 1951 he served as Inspector of Waterloo No. 2, and then was transferred to Haldimand County where he served until his death on December 9, 1952. Mr. Hansuld was interested in the teaching of Science. He loved the out-of-doors. The many beautiful school grounds in Waterloo No. 2 are a tribute to the great contribution he made in the field of school ground beautification.

WILLIAM R. LIDDY, B.A., one-time Inspector of Public Schools for Dufferin County, who passed away May 29, 1952, was born in Mulmur Township in Dufferin County. He attended S.S. No. 9 and S.S. No. 11 Mono Township, and the Orangeville High School. He taught for five years in rural schools, returned to High School, and then graduated from the University of Toronto in 1893. Mr. Liddy taught in Shelburne and in Port Dover High Schools, and for over twelve years was principal of the latter school. In 1911 he was appointed Inspector of Public Schools for Dufferin County, and held this post for twenty-five years until his retirement in 1936. Many changes in elementary education were instituted in Dufferin County during his period of leadership.

JOHN MCCOOL, M.A., who retired in 1931 as Public School Inspector for East Bruce, died on March 17, 1952. Mr. McCool was born in Castle Dawson, Ireland, in 1861. His parents, Mr. and Mrs. Samuel McCool, settled in the Queen's Bush near Paisley in 1868. Mr. McCool became a teacher and for a number of years taught in Central Collegiate Institute, London. In 1906 he was appointed Inspector of Public Schools for East Bruce. He held that position for twenty-five years, until his retirement in 1931. During that time he was a familiar figure on foot, in horse-and-buggy, and later with a motor car, as he visited the schools of the county each year. Mr. McCool was an ardent churchman. He taught Sunday School for many years and was superintendent of the Sunday School and elder in Knox Presbyterian Church, Walkerton. He is survived by

his daughter, Aileen, who is a teacher in Toronto, and one son, Major Brian S. McCool, who is Assistant Director of Music for the Province.

ADAM W. MCGUIRE, B.A., was born in Kincardine. He attended the school in S.S. No. 10 Huntingdon, the Madoc High School, the Madoc Model School, and the Peterborough Normal School. He began his teaching career in S.S. No. 8 Huntingdon, and later taught in Kemptville and Almonte. Mr. McGuire graduated from Queen's University and then served on the staff of the Ottawa Normal Model School. In 1924 he was appointed Inspector of Public Schools for Hastings Centre, where he served for twenty-eight years until his death on July 5, 1952.

JAMES F. MCGUIRE, M.A., who passed away on October 19, 1952, was born in Elgin in Leeds County. He attended the Westport Public School and the Ottawa Model School. He taught in S.S. No. 3 North Crosby before entering Queen's University, where he received his Master of Arts degree and the Gold Medal in Science. He later taught in the public schools in Almonte and Iroquois, and in the Brockville Collegiate Institute. In 1916 he was appointed Inspector of Public Schools for Leeds County, with residence in Westport. During the school year 1933-34 he was a member of the staff of the Hamilton Normal School. In 1934 he moved to Gananoque. He retired in 1942 and continued to live in Gananoque. Following his retirement he was very active in many community organizations and activities.

RETIREMENTS

LEONARD T. J. BOYCE, B.A., was born at Brucefield. He attended the rural school in S.S. No. 3 Tuckersmith and the Collegiate Institute at Clinton. He graduated from the London Normal School, Western University, and the Ontario College of Education. Mr. Boyce taught in the public school in S.S. No. 3 Tuckersmith. He was principal of the Embro Public School. He was a member of the staff of the Teeswater Continuation School and the Brockville Collegiate Institute. In 1947 he was appointed Director of Education for the City of Sault Ste. Marie, where he worked diligently to improve the standards of education. He resigned his position in August, 1952.

FREDERICK S. COOPER, B.A., Inspector of Public Schools for the City of St. Thomas, and the County of Elgin, resigned on August 31, 1952, to accept a principalship in Etobicoke Township. Mr. Cooper was born in the City of Toronto, where he attended the elementary and secondary schools. He graduated from the Toronto Normal School and the University of Toronto. He taught for four years in a rural school in Peterborough County and in 1937 was appointed to the Toronto staff. During World War II, Mr. Cooper served for three years with the RCAF in the Middle East, India and Burma. In 1951 he was a Public School Inspector for St. Thomas and Elgin County, a post which he held for one year.

ROBERT W. WESTWATER, D.Paed., Chief Inspector of the Ottawa Public Schools, retired on October 31, 1952. Dr. Westwater was born and educated in Fifeshire, Scotland. He came to Canada in 1913, and returned to Europe in 1914 as a member of the Canadian Army. He was wounded overseas, and after discharge returned to Canada in 1919. He attended the Ontario College of Education, and in 1920 was appointed to the staff of the Ottawa Public Schools. In 1928 he was appointed principal of Elmdale School, in 1931 principal of York Street School, and in 1937 was made Public School Inspector. On August 1, 1949, he was appointed Chief Inspector. Dr. Westwater is a graduate in Arts of Queen's University, and holds the degree of Doctor of Pedagogy from the University of Toronto. He has taken a prominent part in public life. During the Second World War he was chairman of the Eastern Ontario Division of the Canadian Legion Educational Services. For some time he was engaged in duties for the Wartime Information Board in connection with plans for rehabilitation of RCAF personnel. He retired from the position of Chief Inspector to accept an appointment with the United Nations Educational, Scientific and Cultural Organization, to establish and develop an educational system

ARTHUR G. HOOPER, M.A., LL.D.

Dr. A. G. Hooper, who was for eight years Superintendent of Secondary Education for Ontario, retired in 1952. Previous to his appointment as Superintendent he served for fourteen years as a High School Inspector.

A graduate and gold medallist in Classics of the University of Toronto, Dr. Hooper has devoted his whole life to the cause of secondary education. He taught in Ridley College and in secondary schools in Winnipeg, Strathroy, Lindsay and Guelph. He was for seven years principal of Windsor (Patterson) Collegiate, and later the principal of Kennedy Collegiate and at the same time supervising principal of Windsor Collegiates, until his appointment as an inspector in 1930. The University of Western Ontario, recognizing his distinguished service and leadership in education, conferred on him an honorary degree of Doctor of Laws in May, 1952.

The period of Dr. Hooper's association with secondary education was a time of marked expansion in enrolment and facilities and of increased public interest in the schools, along with a changing view of the aims and purposes of secondary education. In these developments Dr. Hooper played a notable part, exhibiting marked qualities of leadership, and in all his capacities giving an example of untiring devotion to duty and the highest ideals of public service.

for displaced Arab children in the Middle East. His headquarters are in Beirut, Lebanon. His duties take him to Jordan, Syria and Egypt also.

WILLIAM ARTHUR JENNINGS, B.A., High School Inspector, retired on September 1, 1952, after twenty-three years' service in the Department of Education. Born in Enniskillen, Ireland, he came to Canada while very young and received all his education in Toronto schools and the University of Toronto. He taught for one year in Hamilton and then for twenty-one years on the staff of Jarvis Collegiate Institute, where he was Vice-principal and head of the Science Department when appointed Inspector. In his official capacity Mr. Jennings always held to a high ideal of service, looking upon his inspections as opportunities to help the teachers in their work and to give sound advice to school authorities whenever he felt assistance was needed.

MRS. CLAIRE SENIOR BURKE retired as Instructor in Kindergarten Methods, Toronto Normal School, on August 31, 1952. Mrs. Burke had a long and influential career as a leader in Kindergarten education. Her skill as a directress and her useful contribution in the field of kindergarten music were widely recognized throughout the Province. She served in the kindergartens of the Toronto public schools and in the Village of Forest Hill. In September, 1939, she joined the staff of the Toronto Normal School.

MR. H. G. MANNING, B.A., retired as Master, Stratford Normal School, on August 31, 1952. Mr. Manning began his teaching career in public schools at Harrington, S.S. No. 7, Hullett, and at Wingham. After graduating from the University of Toronto, he taught in Lindsay Collegiate Institute and the University of Toronto Schools. He served in the army from 1915 to 1917 in World War I, saw action in France, and was wounded in 1916. Mr. Manning joined the staff of the Stratford Normal School as Master in September, 1919. His useful influence on the teaching of English has been felt in many classrooms through the students whom he prepared as teachers.

MISS E. M. COTTLE, retired as Instructor, Stratford Normal School, on August 31, 1952. Miss Cottle was born and educated in Toronto. She is a graduate of the Somers' School of Physical Training, Toronto; Chautauqua School of Physical Education, Chautauqua, N.Y., and the Mosher School of Dancing, Toronto. Joining the staff of the Stratford Normal School when that institution first opened in September, 1908, Miss Cottle gave valuable service as instructor in physical education and penmanship to succeeding classes of elementary school teachers over a long period of years.

MISS LENA EVELYN MONAGHAN, retired from the staff of the Ottawa Normal School as Instructor in Home Economics and Dean of Women on September 1, 1952. Miss Monaghan was born in Deseronto, Ontario, of United Empire Loyalist parentage, and received her education in the elementary schools of St. John, New Brunswick, in Belleville High School, in Peterborough Normal School, and in the Lillian Massey School of Home Economics, University of Toronto. After teaching Home Economics in the elementary schools of Picton and Ottawa, she was appointed in 1921 to the staff of Ottawa Normal-Model School. In 1940 she became Dean of Women in the Normal School. Miss Monaghan was actively interested in all forms of handicraft, and passed on this enthusiasm to the students and teachers whom she taught at the Normal School and at summer courses conducted by the Department of Education.

Because of war conditions, the general programme of Summer Courses was discontinued from 1941 to 1944, inclusive.

During that period, the following courses were offered:

1942 —Summer Course in Defence Training, Health and Physical Education—925.

1942-43—Winter Course in Manual Training, Type A—40.

1944 —Summer Course in Physical and Health Education and Cadet Training—313.

1944 —Refresher Course in Medieval History given during Christmas vacation—45.

1944-45—Winter Course in Manual Training, Type A—48.

(a)—Formerly Art and Crafts. (b)—Formerly Vocational Guidance.

(c)—Formerly Industrial Arts and Crafts. (d)—Formerly Physical Education.

(e)—Type B.

The School Boards in Ontario continue to employ contractors rather than own and operate buses. Less than 2% of the school buses are owned by School Boards.

Buses Owned by School Boards in 1952

Elementary Boards—12 Boards owned 27 buses size 25-60 passengers.

Summaries

Original cost of vehicle.....	\$100 per seating capacity		Average driver's salary.....		Cost per vehicle per day for operating.....	\$19.38
Average size.....	43	per mile	Cost of gas and oil.....	43c.	Cost per pupil per day for operating.....	24.5c
Average load.....	59	per mile	Cost of tires and repairs.....	3c.	Cost per mile for operating.....	\$22.13
Average route.....	54 miles per day	per year	Cost of storage.....	\$88	Approved cost for operating buses.....	22c
					per mile	

An Ontario School Bus Operators' Association has been formed. This is an independent body which is interested in uniform standards for school buses, in safety education and in the protection of contracts.

The continued increase in the number of pupils transported is shown below.

Board Supplying the Transportation	Number of Routes	Number of Pupils	Daily Miles	ACTUAL COST				APPROVED COST

SUNNY VIEW SCHOOL FOR HANDICAPPED CHILDREN

Located on Blythwood Road, Toronto, has 8 orthopaedic classrooms, 4 additional classrooms for totally deaf children, a combined Home Economics and Arts and Crafts room, a library, the Honour Milne Auditorium, a glassed-in Conservatory, a solarium, and a gymnasium. The school includes offices for doctors, dentist and nurse, and an infirmary, besides Principal's office, teachers' rooms, matron's office, kitchen and lunch rooms. It accommodates more needy children than Wellesley, and provides a vastly superior service.

TABLE 4—STATISTICS OF AUXILIARY CLASSES, 1951-52

OPPORTUNITY CLASSES

For backward and psychopathic children and those who have not successfully pursued the ordinary grade work, but who can be trained and whose mental age is not less than the legal school age.

The noticeable decrease in the number of Ontario school boards in recent years is indicated below. From a high of 6,617 in the year 1941 this figure has declined to 4,131 in 1952. This decrease in administrative units has been caused mainly by the establishment of elementary township school areas and larger secondary school districts.

DECREASE IN ONTARIO SCHOOL ADMINISTRATIVE UNITS

TABLE 38—PUBLICATIONS OF THE DEPARTMENT OF EDUCATION PROVINCE OF ONTARIO

As of September 1st, 1953

The year or years in which the latest revision was printed are shown in each case.

A. COURSES OF STUDY

Junior Kindergarten to Grade VIII

1. Programme for Junior and Senior Kindergarten and Kindergarten Primary Classes of the Public and Separate Schools, 1944, 1946, 1950.
2. Programmes of Studies for Grades I to VI of the Public and Separate Schools, 1942, 1947, 1949 1952.
3. Programme for Religious Education in the Public Schools, 1949.
4. Curriculum 1. 1, Intermediate Division, Outlines of Courses for Experimental Use, 1951.
5. Circular 1. 3, Guidance in the Intermediate Division, 1950.
6. Curriculum 1. 4, Supplementary Reading List for Grades VII to X, 1951.
7. Curriculum 1. 5, Physical Education, Outline of Courses for Experimental Use, Grades VII to X, 1952

B. REVISION OF CURRICULUM

8. Curriculum: 1, Revision of Curriculum, December 10, 1949.
9. Curriculum: 2, Promotion from Grade VIII and Admission to Grade IX, March 30, 1950.
10. Curriculum: 3, Establishment of Local Committees on Curriculum, May 15, 1950.
11. Curriculum: 7, Memorandum re Curriculum, Progress of the Revision, 1952.

C. COURSES OF STUDY

Grades IX to XIII

12. Circular H.S. 1, Requirements for Certificates and Diplomas for 1953-54. Outlines subjects of various courses leading to Intermediate Certificates, Secondary School Graduation Diplomas, and Secondary School Honour Graduation Diplomas.
13. Cir. H.S. 1B, List of Publications re Courses of Study, Grades IX to XIII, 1953-54. Lists Circular Numbers and Titles of the various Courses of Study.
14. Curriculum I. 1, Intermediate Division, Outlines of Courses for Experimental Use, 1951.
15. Circ. H.S. 2, Art, Grades IX to XII, General and Academic, 1940, 1944, 1946, and 1951.
16. Circ. H.S. 3, Commercial Courses, Grades IX to XII, 1946 and 1952.
17. Curriculum S. 4, English, Grades XI and XII, 1952 and 1953.
18. Circ. H.S. 5, Physical Education, Grades XI to XIII, 1950 and 1953.
19. Circ. H.S. 6, Home Economics, General and Commercial Courses and Vocational Courses, Grades IX to XII, 1945, 1946 and 1952.
20. Circ. H.S. 7, Social Studies, Geography, Grades IX to XII, 1943, 1945, 1950 and 1952.
21. Curriculum S. 9, World History, Grades XI and XII, 1952 and 1953.
22. Curriculum S. 9A, Suggestions for Teachers of World History, 1953.
23. Circ. H.S. 10, History, Grade XIII, 1945, 1951 and 1953.
24. Curriculum S. 11, Latin and Greek, Grades X to XII, 1952 and 1953.
25. Curriculum S. 12, Mathematics, Grades XI and XII, 1952.
26. Curriculum S. 12B, Suggestions for Teachers of Geometry in Grades XI and XII, 1952.
27. Circ. H.S. 13, Algebra, Geometry, Trigonometry and Statics, Grades XIII, 1940, 1943, 1946.
28. Circ. H.S. 15, Modern Languages, Grades IX to XIII, 1945, 1951.
29. Circ. H.S. 16, Music, Grades IX to XIII, 1943, 1944.
30. Curriculum S. 17, General Science and Agricultural Science, Grades XI and XII, 1952.
31. Circ. H.S. 18, Chemistry, Grade XIII, 1948, 1951 and 1953.
32. Circ. H.S. 18A, Physics, Grade XIII, 1944, 1946, 1948 and 1953.
33. Circ. H.S. 19, Industrial Arts, Grades IX to XII, 1946, 1947 and 1953.
34. Circ. I. 3, Guidance in The Intermediate Division, 1950.
35. Curriculum S. 5, Guidance Services in the Senior Division, 1952.
36. Circ. H.S. 22, Latin and Greek, Grade XIII, 1947, 1950 and 1953.
37. Circular Tech. 17, Science for Vocational Schools and Departments, Grades XI and XII, 1939, 1943
38. Circular Tech. 40, Shop Courses in Vocational Schools, Grades IX to XII, 1946.
39. Circular Tech. 42, Social Studies, History of Commerce and Industry for Vocational Schools and Departments, Grades XI and XII, 1940.
40. Circular 46, Courses of Study and Examinations in Schools attended by French-speaking Pupils, 1952.
41. Circular Eldem. H.S. 14, Text-books Authorized and Recommended for 1953-54.
42. Circular H.S. 58, Prescriptions in English and Modern Languages for Grade XIII Departmental Examinations, 1954.
43. Circular 46 (a), Prescriptions in French for French-speaking Pupils for Grade XIII Departmental Examinations, 1954.

D. TEACHING AIDS

Art

44. Art and Crafts in the Schools of Ontario, 1949.
45. Art Education in the Kindergarten, 1952.
46. Art Education for Slow Learners, 1953.

Library

47. Teachers' Library Catalogue.

Music

48. Circular Mus. 1, Training the Voices of Children and Adolescents, 1944.
49. Circular Mus. 2, Music in Rural Schools, 1946.
50. Circular Mus. 3, School Music Festivals, 1946.
51. Circular Mus. 4, Introducing Part Singing with Adolescent Boys.
52. Circular Mus. 5, Memorandum relating to The Teaching of Music in Elementary and Secondary Schools, 1946.
53. Circular Mus. 10, Operettas, Music Plays and Cantatas.
54. Music Appreciation Through Listening, for Elementary Schools, 1950.

Radio

55. School Radio Broadcasts. October, April, 1953-54.

Religious Exercises, Religious Education and Religious Instructions

56. List of Bible Readings for Schools, 1944, 1949.
57. Programme for Religious Education in the Public Schools, 1949.

E. ADDITIONAL PAMPHLETS

58. Visual Education Catalogue.
59. Teaching in the Elementary Schools of Ontario, 1953.
60. Teaching Try-Out Experience, 1950.
61. Calendar of the Teachers' Colleges, 1953.
62. Calendar of the University of Ottawa Teacher's College, 1953.
63. Calendar of the Primary Specialist Course, 1953.

F. SCHOOL ACTS

64. Department of Education Act.
65. Public Schools Act.
66. Auxiliary Classes Act.
67. Continuation Schools Act.
68. High Schools Act.
69. Boards of Education Act.
70. Separate Schools Act.
71. School Attendance Act.
72. Vocational Educational Act.
73. School Sites Act.
74. The Teaching Profession Act.
75. The Teachers' Superannuation Act.
76. The Trade Schools Act.
77. The Public Libraries Act.
78. The Teachers' Boards of Reference Act.

G. REGULATIONS

79. Public and Separate Schools.
80. High Schools and Collegiate Institutes.
81. Continuation Schools.
82. Vocational Schools.
83. Public School Inspector's Certificates.
84. Supervisory Officers.
85. Scholarships for Post Graduate Study in France.
86. School Attendance.
87. General Legislative Grants.
88. Grants for Non-Profit Camps.
89. Assistance in the Cost of Educating Retarded Children.

Terminology

Assessment—*The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.*

Attendance Efficiency—*The percentage relationship of the actual days attended to the perfect aggregate.*

Auxiliary Classes—*These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.*

Capital Charges—*Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.*

Compulsory School Age—*Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part-time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.*

Consolidated School—*An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyances.*

Correspondence Courses—*Are a substitute for regular school for those who are unable to attend because of age, health or distance. They cover Grades I to XIII in English and Grades I to VIII Bilingual and are based on the new Course of Studies. The maximum enrolment for the school year 1952-53 was over 2,100, and the average monthly enrolment was over 1,700. Lessons are marked by a Departmental staff. These courses are entirely free.*

Cost per Pupil-Day—*The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.*

County Pupil—*A secondary school pupil living within the County but outside any secondary school district.*

District—*The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing.*

Enrolment (Net)—*The number of pupils who have attended school during the year, excluding all duplications.*

Fifth Classes—*Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.*

Free School Age—*The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.*

General Maintenance—*Ordinary, current expense, as opposed to capital outlays and debenture charges.*

Improvement District—*Shall be deemed to be for all purposes of every Act a township municipality, a village municipality, or a town municipality, as may be designated from time to time by the Municipal Board.*

Inspectorate—*The area under the supervision of a local Department representative.*

Kindergarten-Primary—*A class combining the work of the kindergarten and Grade I.*

Non-Resident Pupil—*A secondary school pupil who is neither a resident nor a County pupil.*

Public School Section—*A subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.*

Resident Pupil—*A secondary school pupil living within the secondary school district.*

School—*Provincially controlled schools may be classified as:*

I. Elementary—*Those doing the work of the first eight grades. A few have Fifth Classes (see above).*

(a) **Public**—*The first school established in any school section or urban municipality, and supported by the ratepayers.*

(b) **R.C. Separate**—*For the children of Roman Catholics.*

(c) **Protestant Separate**—*For the children of Protestants in centres preponderantly Roman Catholic.*

II. Secondary—*Those doing the work of Grades IX to University Matriculation.*

(a) **Academic:**

1. Collegiate Institutes.

2. High Schools.

3. Continuation Schools.

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic courses are designed to lead to Universities and Teacher-Taaining Schools.

(b) **Vocational:**

1. Technical High Schools.

2. Commercial High Schools.

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

III. Provincial Technical Institutes

These offer courses designed to train technicians for positions in industry which are supplementary to, but not in the field of, professional engineering. The admission requirement is secondary school graduation, and the courses are of two or three years' duration. The Institutes are owned and administered directly by the Department of Education under the Vocational Education Act, Part II, but close co-operation with industry is maintained through advisory committees, the members of which are appointed by the Minister.

IV. Professional Training Schools

(a) **Ontario College of Education (University of Toronto)**—*for the training of secondary school teachers.*

(b) **Provincial Normal Schools**—*for the training of elementary school teachers.*

V. Special Schools:

Ontario School for the Blind, Brantford.

Ontario School for the Deaf, Belleville.

School Car—*A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of northern Ontario. There are six of these cars at present, and the length of route ranges from 83 to 221 miles. The route is covered in four to six weeks, and each car is "spotted" for about a week at a time. Problems are solved, work is outlined for the next period, and daily problems of life are discussed. The present enrolment approximates 150, and comprises 10 nationalities. The Department pays all operating costs.*

School Year—*The school year consists of two terms, September 1 to December 22, and January 3 to June 29. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remain on the calendar year basis.*

Secondary School District—*The area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.*

Township School Area—*A unit of school administration comprising two or more contiguous rural school sections in the same township or in adjacent townships, or comprising such rural sections along with one or more adjacent villages or towns. See Cir. Elem. 15, "The Township School Area in Ontario."*

Report of The Minister of Education 1953

To The Honourable Louis O. Breithaupt, LL.D.,
Lieutenant-Governor of the Province of Ontario.

Your Honour,

May I respectfully submit to your Honour the following Report which gives in broad outline, as well as in some detail, pertinent information regarding the development of the educational system of Ontario during 1953. There are some phases of the service rendered by the Department of Education which seem to merit special consideration. These I should like to summarize briefly.

Special attention has been given to thorough instruction in the basic fundamentals of education—those skills with which every citizen should be familiar if he is to be equipped to make a good living and to live a good life. For this type of instruction there can be no substitute. Pupils must have plenty of hard work in school if they are to be qualified to undertake in adult life those difficult tasks which they confront as they travel the road to success. Boys and girls must learn that they owe a duty to the country in which they are privileged to live—a duty which can best be fulfilled by working as the pioneers worked, by having regard to the rights of their fellow-citizens, by striving to be strong, healthy, loyal, and religious men and women. Such citizens the schools of this Province are endeavouring, with a great measure of success, to produce.

Railway school cars, six of them, carry educational facilities to 159 children in Northern and Northwestern Ontario. Correspondence Courses are provided for children who, for any good reason, are unable to attend school. Boys and girls of school age who are unable to make much progress in the standard courses are provided for in Auxiliary Classes. Grants are available to Parents' Councils for the training of Retarded Children who cannot be taught in Auxiliary Classes. The Ontario School for the Deaf at Belleville has an enrolment of nearly 400 while the Ontario School for the Blind at Brantford has half that number of pupils. These facts are cited here to indicate that no child in the Province is overlooked in the provision of the type of education or training suitable to his needs.

The total number of pupils in the elementary and the secondary schools of the Province for the school year 1952-53 was 878,203 which was an increase of 64,116 over the enrolment of the previous year, an indication of the general expansion of Ontario; but no classroom was closed for lack of a teacher. Figures are given in the Report on the new buildings which were required to house the increased numbers. In addition, nearly 67,000 adults attended evening classes in the vocational schools and approximately 22,000 New Canadians studied Basic English and Citizenship in 843 evening classes.

The continuing interest which the adult population of the Province shows in education is significant and praiseworthy. In addition to the evening classes mentioned above, more than two hundred communities have organized cultural and recreational activities for their citizens. Assistance is provided by grants and advisory services and the training of directors and instructors. Attention has recently been directed to the problem of special programmes for the aged.

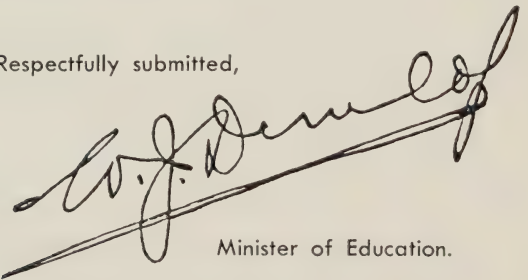

The Public Libraries of Ontario are meeting, in adequate fashion, another need in this field of adult education and recreation. For smaller communities and the rural areas boxes of books sent out by the Travelling Libraries Branch provide a useful supplement to the Public Library system.

Correspondence Courses, originally operated for children of elementary school age in isolated areas, have now been extended in scope to cover elementary and secondary school courses without restriction as to age or occupation of those enrolled. Members of the Armed Services, patients in Sanatoria, and inmates of Reform Institutions are being provided with courses to meet their special needs.

Realizing the need for preserving as many as possible of the relics of the history of the early years in Ontario the staff of the Provincial Archives is accumulating and systematizing a great quantity of original historical material. Acquisitions from Government departments and private benefactors and materials received on loan or by purchase will provide rich sources for the researches of future historians. Travelling exhibits of original documents, proclamations and maps are circulated to secondary schools for the enrichment of the study of history.

A glance at the following pages of this Report will amplify what I have been trying to point out—the diversity of the educational system of Ontario. Yet with all its ramifications there is an essential unity in the system since it concerns all the citizens of the Province and its one purpose is to provide facilities for the continuing development of an enlightened and industrious people.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "W. J. D. Smith", written over a horizontal line.

Minister of Education.

October 27, 1954.

PART I
GENERAL

Elementary Education

LEGISLATIVE GRANTS

The plan for distribution of the general legislative grants was enlarged to incorporate the special grants formerly paid with respect to Auxiliary Classes and classes in Home Economics and Industrial Arts. A grant was paid equal to fifty percent of the amount expended by any board in the preceding year for the purchase of milk for consumption by pupils at school. With these exceptions the general legislative grant plan was similar to that of the preceding year.⁽¹⁾

LARGER UNITS OF ADMINISTRATION

Four new township school areas were formed in 1953 and six school sections were added to existing areas. In this move to larger units of administration 17 school sections were involved. At the same time 4 established township school areas were dissolved and 13 former school sections were re-established on their withdrawal from other larger units. At the end of 1953 there were 554 township school areas in operation, replacing 3,529 former school sections.

Two new union separate school boards were formed in 1953 and 2 separate schools were added to existing larger units. There are now 52 boards for union separate schools in operation, replacing 150 boards formerly administering schools.⁽²⁾

THE TEMPORARY CLOSING OF SMALL SCHOOLS

Thirty-five small rural schools were closed during 1953. Local boards of trustees felt action was necessary because of low enrolments and other local conditions, and arrangements were made to have the remaining children educated at a nearby school or schools. Thirteen schools were reopened during the year. At the end of 1953 there were 775 closed schools in the Province.⁽³⁾

TRANSPORTATION OF PUPILS

During the school year 1953-54 there was a further increase over the preceding year in the number of pupils transported by elementary school boards in Ontario. There were 33,925 pupils transported to elementary schools and 6,448 pupils transported to secondary schools. The increase in the number transported by elementary school boards to secondary schools was only 250 pupils, while the figure for elementary pupils is more than 6,000 higher than last year. A large portion of this increase may be attributed to the inclusion for the first time of pupils transported from schools temporarily closed because of low enrolment.⁽⁴⁾

RAILWAY SCHOOL CARS

During the year 1953 the six Railway School Cars in Northern Ontario brought educational facilities to a total of 159 children who live in isolated homes too far from regular schools to permit daily attendance. These pupils were enrolled at twenty-six stops made by the six cars, one on the Ontario Northland, two on the Canadian Pacific, and three on the Canadian National Railways.

(1) The Regulations for General Legislative Grants are reprinted on pp. 37—54. See also p. 58

(2) For tables see p. 91

(3) For tables see p. 92

(4) See also p. 9, and tables p. 90

SCHOOL HEALTH

A public or separate school board is empowered under statutory provisions to enter into an agreement with the local Board of Health to provide school health services. Provision of these services by the board itself is statutory only where such provision "was inaugurated by the board prior to the 31st day of July, 1924". Thus, health services in the great majority of elementary schools are now under the Public Health authorities.

The Departments of Education and of Health continue to co-operate with regard to the provisions in new school construction for drinking-water supply and sewage disposal. The co-operative arrangements require approval of these facilities by the Department of Health as a prerequisite to approval of the project as a whole by the Department of Education for grant purposes.

The work of the public health nursing, medical and dental staffs in the elementary schools is appreciated by school authorities. The accommodations required for their work are provided by the school board. Helpful suggestions from various voluntary organizations interested in health are appreciated in the school health programme in our schools. Particular mention may be made of the Junior Red Cross and the Health League of Canada.

As a contribution to healthful nutrition, the Department of Education pays a grant to an elementary school board of 50 percent of the cost of the purchase of milk for consumption by its pupils at school.

NEW CONSTRUCTION

In 1953 the volume of elementary school construction exceeded that of the previous year, a trend which has persisted since 1945. In 1953 new accommodation was provided for 44,390 pupils at an estimated cost of \$31,806,000. During the period 1945 to 1953 inclusive, new accommodation has been provided at a cost of \$137,406,000 for 206,430 pupils, while the increase in enrolment has been 239,300 pupils.⁽⁵⁾

CURRICULUM PLANNING

In the summer of 1953 four workshops were conducted by the Department of Education. One in Social Studies, held at the University of Western Ontario, had for its particular problem the improvement of the teaching of Geography and History. At a workshop in English, held at Toronto, the improvement of the teaching of this subject was discussed, and particular attention was given to Reading and English Composition. A conference on Health Education was directed by the staff of the Physical and Health Education branch of the Department at the Ontario Athletic Training Camp near Orillia. A workshop in Conservation was held for the fourth consecutive year at the Ontario Forest Rangers School, Dorset, and in this workshop other Provincial Departments co-operated.

The number of conferences, short courses and workshops initiated and sponsored by the Ontario Teachers' Federation and its affiliates is evidence of the keen interest of the teachers of Ontario in the improvement of the work of the schools. A curriculum conference attended by teachers, trustees, and lay people from the Province at large was held in Toronto in October. This was the third such meeting sponsored by the Ontario Teachers' Federation. A curriculum conference dealing particularly with problems of the separate schools, initiated and conducted by the Ontario English Catholic Teachers' Association, was held in November. Similar conferences are planned for the autumn of 1954. A short course for school principals, organized and conducted by the Ontario Men Teachers' Federation, was held at Queen's University during the month of August. A conference dealing

⁽⁵⁾ See also p. 9

with Mental Health in Schools was held in London, Ontario, in February, and a short course in Visual Education, widely attended, was provided in Toronto in the month of October. A workshop for teachers of Home Economics, organized independently by a committee of teachers of Home Economics, was held at Guelph in the last week of June. In these praiseworthy efforts the teachers have had the support of the Department of Education and officials of the Department and members of the staffs of the Teachers' Colleges have participated freely in the meetings.

Throughout the year discussions between elementary and secondary school teachers took place in various centres. These were arranged by local Co-ordinating Committees. Of particular note were the series of such discussions in the inspectorates of Centre Hastings and Durham West. The chief problems dealt with were the transition from the elementary school to the secondary school and improvement in teaching the fundamental subjects. Other courses for teachers, dealing with Conservation and Map Reading, have been arranged by a number of local inspectors.

Local curriculum committees throughout the Province have worked on experimental courses in various subjects adapted to local needs. The primary function of the elementary school is to ensure the literacy of its scholars and attention has been given chiefly to plans for increasing the effectiveness of the teaching of English. Other subjects have not been neglected. A number of experimental courses in the Social Studies have been drawn up and these have provided for a strengthening of the teaching of Geography. The teachers have been somewhat handicapped by the scarcity of good text-books in this field but it is expected that this difficulty will soon be overcome.

TEXT-BOOKS

At present no text-books are authorized by the Department, but, from Grades I to X, approved lists, offering a number of choices, are issued each year. From these lists boards and teachers may select the books which appear most suitable for their needs. It is the policy of the Department to require, wherever possible, that text-books for inclusion in approved lists be of Canadian authorship, illustrated by Canadian artists, and printed and published in Canada. This policy, which has the support of Canadian publishers, has been amply justified by the number and quality of the books that have been published or are in preparation.

Particular attention has been given to securing the best available books for the teaching of Reading. New readers have been approved for use in the separate schools and greatly improved readers are in preparation for use in the schools in which French is a subject of instruction with the approval of the Minister.

Under the regulations, school boards are required to provide all text-books for pupils in Grades I to VIII. The parents of the pupils in these grades are therefore put to no direct expense for the purchase of text-books. Books do not become the property of the pupils, but are retained in the school and may be used for several years. It is estimated that, on the average, they will have to be replaced every three years, but the period of use of many books should be longer than that.

The retail cost of a typical set of text-books for a Grade VI pupil during the year 1952 might have been as much as \$13.90; and, if books were not provided by boards, a parent might have to face this considerable outlay; but, by taking advantage of the discount allowed by publishers, a board could buy the same books for \$11.00. If the books have an average life of three years the cost per pupil per year for this set would be \$3.66, but if the books last longer than this the annual cost would be further reduced.

The Department of Education makes a reimbursement grant of \$3.00 a pupil to boards yearly for expenditures for the purchase of text-books. Returns for the calendar year 1952 showed that reimbursement grants claimed by boards amounted to \$2.72 a pupil (grant paid in 1953). That the whole available grant was not claimed in that year may be explained by the fact that many boards

Courtesy Barnett & Rider, Architects

GEORGETOWN HIGH SCHOOL

had built up stocks of text-books before the reimbursement grant came into effect, and by the lack of suitable books, worthy of approved listing, in some subjects. It is probable that the whole of the \$3.00 grant will be claimed for 1953 and that the actual expenditure made by boards in 1952 may even exceed the \$3.00 grant.

It is interesting to note that in 1952 the cost of text-books was 1.5 percent of the total cost of education in Ontario for Grades I to VIII, as shown by the Report of the Minister for the year 1952.

RELIGIOUS EDUCATION

The course in Religious Education, instituted in 1944, continues to be successfully carried out and the publishers of the Teachers' Guides to Religious Education report an increased demand for the books. This increase is related, in part, to the increase in the number of classrooms. In the school year 1944-45 sixty-three boards asked for exemption from the teaching of Religious Education and twenty-one exemptions were requested in the school year 1952-53.

CEA-KELLOGG PROJECT

As a result of a proposal made in December, 1951, by the Canadian Education Association to the W. K. Kellogg Foundation of Battle Creek, Michigan, the sum of \$230,282 was made available over a five-year period for an in-service improvement programme, for inspectors and local school superintendents in Canada, to be known as the CEA-Kellogg Project in Educational Leadership. The project will provide a programme designed to improve the training and further the development of educational leaders in the supervision and administration of local school systems.

For one week during April, 1953, five inspectors from Ontario met with a like number of representatives from Quebec in one of three regional workshops which were organized across Canada. This workshop served as a preliminary to the pilot short course which was held for three weeks in May, 1953, at the University of Alberta in Edmonton and which was attended by 48 inspectors and local superintendents from across Canada. Ten of these came from Ontario and five of the ten had already attended the Ottawa regional meeting.

Delegates to each of the courses believe that the opportunity to meet and work with educational leaders from other parts of Canada has been of value in terms of a greater understanding of the problems and difficulties encountered by educational authorities across the Dominion. It has done much to overcome many misunderstandings about different parts of the country, and has suggested ways of working together for the ultimate benefit of boys and girls in the classrooms. While it is too early to make any final judgment about the benefits to be derived, the project gives promise of making an important contribution to the improvement of educational leadership in Canada.

ADMINISTRATION

In 1953 an Act was passed to provide for the federation of the municipalities in the Toronto Metropolitan Area for certain financial and other purposes. The bill provided for a Metropolitan School Board composed of the chairmen of each of the Boards of Education in the thirteen municipalities, the member securing the highest vote in each of the wards in the City of Toronto, and two members appointed by the Separate School Board.

The Metropolitan Board of Education is to make maintenance assistance payments to the member boards, based on the average attendance of resident pupils. The current revenue of the Metropolitan Board consists of a tax levied on the ratepayers in the Metropolitan Area and the general legislative grants formerly payable to the member boards. Outstanding capital debts and new issues of debentures, up to the amount approved by the Department of Education

for legislative grant purposes, are spread over the entire area. The building programmes of the member boards are reviewed and consolidated by the Metropolitan Board.

The Act also provided for a Board of Education for each of the Townships of North York and Scarborough. These boards replaced the boards for former school sections, township areas and secondary school districts in these townships.

An Act was passed respecting Separate School Boards in the Metropolitan Area of Toronto, which provided for a Metropolitan School Board to replace the Toronto and Suburban Separate School Board.

Secondary Education

1. SECONDARY SCHOOLS

ENROLMENT

There were 109,272 pupils enrolled in academic secondary schools in 1952-53 and 32,649 in vocational schools, making an increase in the secondary school population of nearly eight thousand pupils. In addition, the enrolment in evening classes in the vocational schools amounted to 66,955, an increase of nearly three thousand over that of the preceding year.

TRANSPORTATION

Secondary school boards provided transportation for 34,881 of their pupils at a daily cost of just over \$17,000. There were 1,403 routes in operation with a total daily mileage of 61,543 miles. In addition, elementary school boards provided conveyance for 6,198 secondary school pupils.⁽⁶⁾

BUILDING PROGRAMME

Fourteen new secondary schools were completed during 1953 at a cost of approximately \$8,000,000, providing accommodation for 5,250 pupils. These new buildings were constructed at Cannington, Cooksville, Dresden, Etobicoke (Royal York Road), Flesherton, Haliburton, Hawkesbury, Kingsville, Leamington, Lucknow, Mount Forest, Terrace Bay, Thornbury, York Township (Coronation Square).

Additions or alterations made to twenty-nine existing buildings at a cost of approximately \$9,000,000 provided additional accommodation for 5,400 pupils.⁽⁷⁾

THE MODERN DISTRICT HIGH SCHOOL

A typical District High School, the result of the reorganization of a school area, and the product of a well-planned building programme, may be described in general terms which would apply to a number of modern schools in Ontario. Its territory probably covers about 400 square miles and it is administered by an appointed board representative of all the municipalities served, all of whom have an equity in the school property. It has a comprehensive system of transportation of pupils by bus, together with adequate lunch-room facilities in the school building. Modern and attractive accommodations, usually on one floor, include well-lighted and acoustically treated classrooms, and special rooms for subjects such as Music, Art, Commercial work, Home Economics and Industrial Arts, and a gymnasium-auditorium. For a curriculum it offers, within the framework of the General Course, the required subjects of English, Social Studies, and

⁽⁶⁾ See also p. 3, and tables p. 90

⁽⁷⁾ See also p. 4

Physical Education, the traditional options of Latin, French, Mathematics, and Science, and such of the more recently introduced optional subjects as are suited to the needs of the community. In addition, a district school quite often offers a commercial course as distinct from the commercial option in the General Course.

Because of the attractions offered by a modern building, an improved salary schedule, a larger staff and a somewhat bigger community, the district school tends to attract more capable teachers and to hold them longer. There is an opportunity also for the individual member of the staff to teach those subjects in which he is best qualified and most interested; this in turn raises the general level of instruction.

Finally the district school gives an opportunity to the rural pupils to participate in intramural activities not usually available in most small schools. During the noon hour or in a special activity period they can now share in the varied programme of co-curricular activities customarily available only to urban pupils.

GRANTS

General legislative grants paid to academic secondary schools in the fiscal year 1952-53 amounted to \$14,146,876 and to vocational schools \$4,303,659.⁽⁸⁾

Under the Vocational Schools Assistance Agreement the Government of Canada pays a grant equal to Provincial expenditures in grants for maintenance up to a fixed maximum of \$597,500, and also makes an allowance toward capital expenditures for buildings and equipment equal to fifty percent of the Provincial allowance for these purposes. Under this agreement a payment of \$1,076,538.37 was received on account of capital expenditures, while the Provincial expenditures were far in excess of the amount required to qualify for the maximum grant under the maintenance clause.

CURRICULUM

English, Social Studies and Physical Education are compulsory subjects in all courses of Grades IX to XII. Within the framework of suggested courses there is a wide choice of optional subjects which may be provided in various combinations to meet local needs. The Department of Education fixes the content of subject courses for Grades XI and XII and for the examinations of Grade XIII, while schools are free to adopt suggested courses for Grades IX and X or to prepare their own courses. Examinations for Grades IX to XII, as well as for admission to Grade IX, are a purely local concern.

The vocational schools maintain close contact with the leaders of commerce and industry in their immediate localities, not only for placement and follow-up of their pupils but also to keep their courses and methods of instruction in harmony with local needs and conditions. In this work the co-operation of organized bodies such as the Canadian Manufacturers' Association, the National Office Management Association, Boards of Trade and Chambers of Commerce, is freely given to the schools. Under the sponsorship of these organizations co-operative training plans have been initiated in a number of centres, and the evaluation of the results, arrived at jointly by the school and the sponsoring organization, is of great value in maintaining effective liaison between education and industry.

TEACHERS

There were 6,131 full-time teachers employed in secondary schools during the year 1952-53. Most of the schools were adequately staffed with certificated teachers, though in some branches of vocational education there were shortages of properly qualified instructors. Summer courses conducted by the Department of Education have done much to offset this deficiency. In addition to the regular summer courses in commercial subjects, industrial arts, home economics and agri-

⁽⁸⁾ See also pp. 3 and 58

culture, a special emergency course was provided to enable prospective teachers of industrial subjects under contract to school boards to begin a qualifying course. The forty-six teachers who enrolled in this course may, in three summer sessions, proceed to full qualification as teachers of shop subjects in vocational schools.

Teachers continue to undertake a wide variety of professional activities, such as the evaluation and development of courses of study, regional conferences and workshops in special subjects, the preparation of periodicals and text-books, summer courses and graduate studies. Individual and group activities of this kind are most heartily to be commended, since they lead not only to improved curricula and increased professional competence, but ultimately to an improved standard of education for the whole Province.

2. TECHNICAL INSTITUTES

Since the close of World War II, several Technical Institutes have been established to provide post-secondary education with specialization in a number of technological fields. Through Advisory Councils close co-operation is maintained with industry and courses are revised constantly in the light of the latest advances. Extensive evening class facilities provide opportunity for regularly employed workers to improve their training and skills.

LAKEHEAD TECHNICAL INSTITUTE

The Lakehead Technical Institute at Port Arthur operates in three divisions. The Technical division offers two-year terminal courses with extensive field training in Forestry and Mining. The University Division offers the first year of Arts, Applied Science, Commerce, Forestry, Forest Engineering, and Household Science courses. Students complete their courses at universities of their choice. The special division offers academic courses at post-secondary level in a night school programme.

PROVINCIAL INSTITUTE OF MINING

The Provincial Institute of Mining at Haileybury continues to serve Canada's mining industry by providing trained technical personnel for engineering and survey departments of mines, for geological staffs, and for mill, mine and smelter laboratories.

PROVINCIAL INSTITUTE OF TEXTILES

This school at Hamilton provides both day and evening classes in technical aspects of the textile industry. Its students are drawn from cities and towns in its surrounding area where textile factories operate, and the demand for graduates still exceeds the supply. The industry continues to help the Institute by contributions of machinery and raw materials and by assistance to students.

PROVINCIAL INSTITUTE OF TRADES

The Provincial Institute of Trades at Toronto provides training for trades designated by the Department of Labour under the Apprenticeship Act, for a few non-designated trades and for certain special requirements of the Royal Canadian Air Force in Telecommunications.

RYERSON INSTITUTE OF TECHNOLOGY

A large proportion of the day enrolment of this school is drawn from outside the Toronto area. Courses are offered in a wide variety of technical fields. Most of the courses are of three years' duration and require the Ontario Secondary School Graduation Diploma (Grade XII standing) as a prerequisite. There are also evening classes which attract an enrolment in excess of four thousand.

3. SPECIAL PROJECTS UNDER FEDERAL-PROVINCIAL AGREEMENTS

1. General

The Department of Education, Ontario, and the Department of Labour (Canadian Vocational Training), Ottawa, are co-operating in special types of training programmes. The extent of the Federal reimbursement, depending on the agreement, varies from 50% to 100% for such programmes.

(a) Rehabilitation of Disabled Persons

Disabled persons over sixteen years of age may be approved for suitable training for a maximum period of twelve months. Tuition, books, and some transportation charges are paid by the Ontario Government.

(b) Royal Canadian Air Force—Project No. 2

Special arrangements have been made with the R.C.A.F. whereby up to 120 R.C.A.F. personnel are being trained in Telecommunications at the Provincial Institute of Trades.

2. The Defence Training Board

This Board was set up at the request of the Department of Labour, Ottawa, for the purpose of hiring and paying civilian instructors for the Air Force and the Army. The Services concerned have representation on this Board. At the present time 60 teachers are in the employ of the Board.

3. Supervisory Training

The Department of Education has recently developed a programme of assistance to industry which is generally known as "Supervisory Training Services". These services, popular and effective during the World War II period, have been modified to meet the needs of present-day industrial development.

Professional Training

TEACHERS' COLLEGE ENROLMENT

A decrease occurred in the enrolment of the colleges for the professional preparation of teachers in the school year 1953-54. The eight Teachers' Colleges had an enrolment of 1,732, representing a decrease of 141 when compared with the total for 1952-53. Eighty-four students taking the elementary school option at the Ontario College of Education brought the total number of candidates for teaching certificates valid in elementary schools to 1,816. Included in the enrolment of the Teachers' Colleges were 314 students in the first year of the Two-year Course.

The Ontario College of Education had a total enrolment of 470 in courses leading to the High School Assistant's, Library, Home Economics, Vocational, and Industrial Arts certificates. This figure was 18 below that of the previous year.⁽⁹⁾

COURSES OF STUDY

The reorganization announced in 1952 of the system of preparing teachers for the elementary schools established three courses leading to the Interim First Class certificate. The first is the One-year Course for candidates holding standing in eight Grade XIII papers including at least one English paper; the second is the Two-year Course for applicants holding the Secondary School Graduation Diploma of the General Course, at the Grade XII level; and the third is the one-year Completing Course for students who have been successful at the Pre-Teachers'

⁽⁹⁾ For tables see p. 64

College Summer Courses, First and Second Years, and who have taught successfully for two years on a Temporary certificate in the public or separate schools of Ontario.

The Two-year Course, the first year of which was introduced in September, 1953, combines academic and professional study. The academic subjects are English, Geography, History, Child Psychology, and Educational Psychology. The professional programme offers the subjects of the One-year Course but provides double the practice work in urban and rural schools. Several supplementary courses—History of Education, the School and The Community, Audio-visual Education, and Children's Literature—complete the programme.

In addition to the three courses mentioned leading to the Interim First Class certificate, three specialized courses were offered at the Toronto Teachers' College during the year under review: the Primary School Specialist Course which prepares teachers for the junior and senior kindergartens and for Grades 1 and II; the Intermediate Art Certificate Course, which may be taken at the Teachers' College during the same year as the First Class course by graduates of the Two-year Course in Art for Prospective Teachers at the Ontario College of Art; and the Intermediate Home Economics Certificate Course, which may be taken at the Teachers' College during the same year as the First Class course by graduates of the Two-year Course in Home Economics at the Ryerson Institute of Technology. Thirty-three students were enrolled in the Primary School Specialist Course, seven in the Home Economics Course, and two in the Art Course during the school year 1953-54. The course leading to the Intermediate Home Economics Certificate was first offered in 1952-53, and the special Art Course was introduced in 1953-54.

CHANGE IN NAME

"Normal School" was the name applied by Dr. Egerton Ryerson to the first institution established in the Province for the preparation of teachers. "The word **Normal** signifies 'according to rule or principle,'" he explained at the opening ceremony of the provincial Normal School in Toronto on November 1, 1847, "and is employed to express the systematic teaching of the rudiments of learning". A century passed, but the reason for using this common word in an uncommon sense continued to escape the general public. In 1953, the Legislature amended the Department of Education Act, and substituted the words "teachers' college" for "normal school". With the opening of the school year in September the new name came into use.

TEACHER SUPPLY

Except in the fields of commercial subjects, girls' physical education, home economics, and vocational shopwork, the supply of teachers for secondary schools was adequate during 1953-54. Where certificated teachers were not available for the fields named, letters of permission were issued authorizing Boards of Trustees to employ persons with special qualifications although without professional training.

In September, 1953, there were 52,524 more pupils in the elementary schools in Ontario than in September, 1952. A total of 1,480 additional teachers was required to cope with this increase. Statistics related to live births and immigration indicate that similar rises in annual enrolment may be expected for some years to come. The unusually heavy demand for teachers is being met from three sources: (i) newly qualified teachers graduating from the Teachers' Colleges and Pre-Teachers'-College Summer Courses, (ii) married women, certificated as teachers, who are returning to, or who are being retained in the profession, and (iii) teachers who come to Ontario from other educational systems.

The recent reorganization of the system of preparing teachers for elementary school is designed to increase the enrolment in the Teachers' Colleges and preliminary summer courses by securing teachers not only from Grade XIII graduates but also from the larger group of students completing Grade XII. The employment

of married women as teachers is now so general that some third or more of women teaching in the elementary schools are married.

During 1952 the terms upon which teachers of acceptable training and academic background from Great Britain and other Provinces in Canada might be certificated in Ontario were revised. These teachers were issued letters of standing valid for teaching for one school year, at the end of which period the candidates were required to write the final examination of a Teachers' College in Ontario. Persons successful at the examinations then received teaching certificates. In 1953 the requirement that such teachers pass the examinations of a Teachers' College was withdrawn, and the holder of a letter of standing was issued a teaching certificate upon the completion of one year of successful teaching in Ontario as certified by the inspector concerned. It should be noted that all applicants for letters of standing are required to pass a medical examination.

During the calendar year 1953 a total of 269 letters of standing were issued to teachers for elementary schools. By December, 1953, the number of letters of permission issued to Boards of Trustees for the employment of uncertificated teachers during the school year 1953-54 totalled 682. Of this number 330 were issued for persons having training as teachers and 352 were for persons with no professional training.

Schools Attended by French-speaking Pupils

TEACHER-SUPPLY

In 1952-53 there were 143 teachers-in-training at the University of Ottawa Normal School, 23 of whom were enrolled in the First Class course and 120 in the Second Class course. As a result of the term and final examinations 23 students were awarded First Class certificates, and 105 obtained Second Class certificates.

There were in this school year 1,957 French-speaking teachers employed in the elementary schools. Of this number 1,648 or 84.2 percent held First or Second Class certificates.

SECONDARY SCHOOL CLASSES

The total enrolment of French-speaking students taking advanced French courses in secondary schools was 2,820.⁽¹⁰⁾

To give a more complete picture of the secondary school enrolment it should be added that besides the 2,820 students reported above there were 1,923 French-speaking pupils enrolled in Grade IX and Grade X classes of elementary schools and 2,122 French-speaking students attending inspected private secondary schools in Ontario. Inspected private schools may, on the recommendation of the Inspector, qualify for certain privileges in reporting the standing of their pupils.

ELEMENTARY SCHOOLS

There were 59,576 French-speaking pupils enrolled in June, 1953, in separate and public elementary schools, an increase of 2,083 over the preceding year. The total of 59,576 includes 1,923 students in Grade IX and Grade X classes in elementary schools, and 211 pupils in auxiliary classes.⁽¹¹⁾

⁽¹⁰⁾ For table see p. 105

⁽¹¹⁾ For tables see p. 102

CORRESPONDENCE COURSES

June, 1953, completed the eleventh school year in which correspondence courses for French-speaking children of Ontario were given by the Department of Education. All the courses for pupils of Grade I to Grade VIII have been available since September, 1946.

A revision of the courses for the Primary and Junior Division (Grades I to VI) was partly completed during the year. Enrolment figures are shown in Part IV of this report.⁽¹²⁾

Agriculture

The regulations of the Department of Education provide for instruction in Agriculture as an optional subject in the elementary and secondary schools of the Provincial system.

ELEMENTARY SCHOOLS

Special grants for agricultural instruction in elementary schools were discontinued in 1953. Instead of the usual report forms a survey questionnaire was sent out through the inspectors in September, 1953. Returns showed that out of 4,994 rural and 1,115 urban schools reporting Agriculture was taken for at least one hour a week in 876 rural and 157 urban schools. Agriculture as a part of Science teaching, usually from topics suggested in Curriculum I:1, was taught in 3,419 rural and 671 urban schools. Replies to the questionnaire also indicated that 1,768 teachers possessed some qualification in Agriculture, 1,485 the elementary and 168 the intermediate certificate, and 115 had completed at least one summer course.

School ground improvement as a school activity was reported by 1,536 schools, mostly rural. School Fairs were held in 236 schools under local committees, and 1,817 schools, or their pupils individually, sent exhibits to local Fall Fairs.

SECONDARY SCHOOLS

Instruction in Agriculture is provided in secondary schools in two ways. Courses in Agricultural Science, optional with General Science, and with agricultural topics included in the Science courses, are taken by 34,000 pupils in Grades IX to XII in 140 schools and in Grades IX and X in 39 schools. Alternatively, schools may organize departments of Agriculture and provide programmes of instruction which include Agriculture and Shop Work for boys and Home Economics for girls. There are 92 schools with this type of organization and 29 of them carry the courses on into Grades XI and XII. The number of pupils taking Agriculture is 7,800. Schools with departments of Agriculture provide extra services such as visits to the homes of pupils by principal or teacher during the summer months, school meals and the use of the school as a community centre.⁽¹³⁾

Grants formerly paid to boards as special subsidies for Agricultural instruction were in 1953 incorporated in the general legislative grants.

TEACHERS SUPPLY

Teachers with qualifications in Agriculture are either graduates of the Ontario Agricultural College who have attended the Ontario College of Education or certificated teachers who have attended one or more summer courses in Agriculture. Seventy-three teachers attended summer courses in 1953. All schools with

⁽¹²⁾ For table see p. 175

⁽¹³⁾ For tables see p. 173

departments of Agriculture have qualified teachers. A few teachers, mainly in the smaller schools, are teaching Agriculture by special permission.⁽¹⁴⁾

PRACTICAL WORK

The basic or minimum requirements for Agricultural Science include instruction in the laboratory or classroom, gardening, where an area is available, and inspection of home projects. In many schools special facilities include a poultry house, one or more colonies of bees, and an area for gardening and experimental plots. There may be participation by the pupils in 4H Club projects in co-operation with the Agricultural Representative, and home projects organized and inspected by the teacher. During the last two years pupils have taken part in local ploughing matches, and in the International Ploughing Match in which 23 schools were entered in 1953.

Art

RESEARCH

A research project dealing with Art Education During Adolescence has been in progress during the past five years. A summary of the findings is now being made, and will appear in pamphlet form as soon as possible.

Saturday morning classes conducted for the purpose of studying children of outstanding ability in Art were held at the Ryerson Institute of Technology from October to March, inclusive.

SUPERVISION AND TRAINING

The teaching of Art in the secondary schools was given special attention during the year. All the schools at which general inspections were held were visited and their Art programmes evaluated.

The summer courses in Art were well attended, and more than four hundred teachers qualified for elementary, intermediate, supervisor's or specialist's certificates. Meetings of elementary teachers of Art have been held throughout the year in several inspectorates.

Audio-visual Education

SCHOOL BROADCASTS

A programme of ninety-three Ontario school broadcasts covering fifteen different school subjects was prepared for use in the elementary and secondary schools of the Province. These broadcasts were presented in co-operation with the Canadian Broadcasting Corporation over a network of twenty-six radio stations.

Classroom teachers were used as radio consultants for several series of broadcasts. It is believed that this policy was responsible for an improvement in the educational value of the broadcasts.

Evaluation surveys of the effectiveness of the broadcasts were made during the year. Constructive comments were received as a result, and improved planning for succeeding broadcasts was made possible.

Radio manuals outlining the broadcasts were distributed to all Ontario teachers in September.

⁽¹⁴⁾ For table see p. 174

FILM SERVICE

Films from the Audio-Visual Education Library were shown on 164,127 occasions to a total school audience of 8,606,012 students. Eighty-two new film titles were approved as additions to the library, and 974 additional prints of films already listed in the Visual Education catalogue were purchased. During the year, forty-seven schools registered new film projectors with the library for film service. The Audio-Visual Branch now has 6,901 prints of sound films available for use in Ontario schools.

FILMSTRIPS

Lists of recommended filmstrips for elementary and secondary schools were prepared by Ontario teachers enrolled in the Audio-Visual Education course, and distributed by the Audio-Visual Education Branch to Ontario schools on request.

PUBLICATIONS

A supplement to the Visual Education catalogue was prepared and forwarded during the year to all Ontario schools using the film service of the Audio-Visual Education Branch.

Auxiliary Education

During the last twenty-five years there has been a gradual recognition of the obligation of the school to young people of school age who are from physical or mental cause unable to take proper advantage of the elementary or secondary school courses. This is most encouraging, as it indicates a desire to educate handicapped people to become self-reliant. The tables on p. 000 indicate the extent and variety of auxiliary classes in the Province.

SERVICES

An interesting addition to the services provided for various groups of handicapped children was made in 1953 in South Wellington inspectorate. A group of township school areas and school sections combined to employ a remedial teacher who could visit the children in these rural units at least once each month to provide direction and leadership for the classroom teacher. The teacher has had under his supervision and instruction 153 children in 57 classrooms, and has been very successful in collaborating with the classroom teachers in graded and one-roomed schools. The children who have shown the most striking progress are the fifteen-year-old boys who were in a state of boredom and frustration and a group of children with defects of speech. In reading, spelling, and arithmetic there is definite evidence of correction of errors, of the elimination of habits of faulty thinking, recall and computation, and the resulting improvement in achievement.

As a result of the remedial teacher's guidance and assistance, regular teachers are getting results and satisfaction with pupils who previously made little progress. The classroom teachers are adapting successfully special techniques for individual instruction to class instruction and to the teaching of small groups.

TEACHER SUPPLY

Teachers of auxiliary classes are drawn from the regular teaching staffs. They are individuals who have taught successfully for at least two years in a public or separate school in Ontario and qualified for certificates in Auxiliary Education by attending summer courses. In the summer of 1953, 226 teachers took courses leading to certificates in this field.

RETARDED CHILDREN

By authority of an Act of the Legislature in 1953, and subsequent regulations, provision was made for assistance in the payment of the cost of education of children under eighteen years of age, whose mental capacity is incapable of development beyond that of a child of normal mentality at eight years of age. Grants were provided for classes conducted by parents' groups which are affiliated with the Ontario Association for Retarded Children. In 1953 a grant of \$250 a year for each pupil of average daily attendance was paid to parents' groups located in Barrie, Brantford, Hamilton, Kirkland Lake, London, Niagara Falls, Peterborough, Toronto, Waterford, Welland and Windsor. In December, 1953, there were 260 pupils enrolled in these classes.

Correspondence Courses

COURSES

At the elementary school level courses are provided for both English and French-speaking pupils in all the subjects of Grades I—VIII. Some courses are also provided for adults. At the secondary level the available courses include English, French, Mathematics and Science in Grades IX to XIII.⁽¹⁵⁾ New courses are added from time to time and revisions are continually being made.

ENROLMENT

All the courses are free, and they are being made available to more and more people. At first only children living in Ontario who were for any reason unable to attend regular classes were eligible. In 1953 more than half of those enrolled were over the compulsory school age. There were 880 pupils taking elementary school courses and 856 in secondary school courses.⁽¹⁶⁾

Courses were sent in 1953 to personnel in the Canadian Armed Services on duty outside Canada and their dependents, and to Ontario residents temporarily living in other provinces or abroad. Patients in sanatoria were enrolled for secondary school lessons under special arrangements. In addition sets of lessons were sent out as teaching aids for Grades I to X, to some unqualified teachers and to assist the educational programmes in sanatoria, penitentiaries and reformatories.

Examinations and Scholarships

DEPARTMENTAL EXAMINATIONS

Statistics showing the results of the Grade XIII and the Normal School examinations, as well as the number of Intermediate Certificates, Secondary School Graduation Diplomas, and Secondary School Honour Graduation Diplomas, will be found in Part II of this Report.⁽¹⁷⁾

STUDENT-AID

(a) Dominion-Provincial Student-Aid Bursaries.

The purpose of these bursaries is to assist students of adequate ability who are financially unable to continue their education. In 1943-44 when the first scholarships were established 192 applicants were awarded a total of \$45,950.

⁽¹⁵⁾ For tables see p. 175

⁽¹⁶⁾ For tables see p. 175

⁽¹⁷⁾ For tables see p. 126

In 1952-53 a total of 1,536 students received bursaries totalling \$316,461. The contribution of the Government of Canada to the bursary programme has increased from \$31,974 in 1944-45 to \$100,000. In the same period the Provincial contribution has increased from \$100,000 to \$316,461.⁽¹⁸⁾

(b) Transportation Assistance.

The transportation subsidies provided by the Department of Education for persons who reside in the territorial districts and are enrolled in an eligible institution of university rank have now been in operation for seven years. In 1953 the sum of \$11,370.45 was paid in transportation assistance to 558 students. Of these 227 reside west, and 331 east of Sault Ste. Marie.

(c) Scholarships for Post-graduate Study in France.

The Department of Education Act provides for the payment out of the Consolidated Revenue Fund annually of the sum of \$6,000 to be awarded by the Minister of Education in scholarships to residents of Ontario for the purpose of enabling them to pursue courses of study in France. For the school year 1953-54 the holders of these scholarships were Miss Rita M. Hanlon, Collegiate Institute and Vocational School, Weston; Miss Pauline J. Bondy, Hon. W. C. Kennedy Collegiate Institute, Windsor; Miss Mary Stortz, Collegiate Institute and Vocational School, Kirkland Lake; Miss Wilhelmina M. Wiacek, High School, Port Colborne.

INTERCHANGE OF TEACHERS

Interchange of teachers is encouraged as a means of maintaining Commonwealth unity, of promoting national and international good-will and understanding, and of broadening teachers' interests and their knowledge of educational methods.

For the school year 1953-54 twenty-nine exchanges were arranged, twenty-one with the British Isles, seven with other provinces, and one with the United States.

Guidance

Schools are encouraged to adapt their guidance courses and services to the needs of the pupils and to integrate them into the regular school programme. This philosophy of guidance as an essential service for the pupils is applied in all relations between the schools and the officials of the Guidance branch of the Department of Education. Visits made to the schools provided opportunities to improve the guidance services by conferences with principals and guidance workers.

TRAINING

One hundred and two teachers attended the summer courses offered by the Department of Education and leading to the Elementary, Intermediate, and Specialist certificates in Guidance. The need for trained guidance workers is still great in the smaller secondary schools and in the elementary schools.

In-service training provided by the Guidance branch as well as by experienced school counsellors is increasing. The services of the Guidance branch are available at any time for this purpose and the demand for this kind of assistance is encouraging, particularly at the elementary school level.

Of special interest was an international guidance conference held in Watertown, New York, on May 8 and 9, 1953. This conference was sponsored jointly by the Bureau of Guidance for New York State and the guidance branch of the Ontario Department of Education. About one hundred guidance workers and principals from Eastern Ontario and Northern New York State attended the sessions at the Watertown High School. Since those in attendance were enthusiastic about the value of the meetings, it was unanimously agreed to hold a second international conference in Eastern Ontario at a future date.

⁽¹⁸⁾ For tables see p. 129

RADIO BROADCASTS

A series of five fifteen-minute radio broadcasts was presented during the fall term. These broadcasts served to indicate to pupils and to teachers the nature of guidance, the methods used, and the help that can be expected from it. Lesson aids were provided to assist teachers to obtain the maximum effectiveness from these broadcasts.

Music

INSTRUCTION

Regular courses in Music continue to be offered, under the supervision of qualified music teachers, in more than 80% of the elementary school classrooms in Ontario.⁽¹⁹⁾ Music courses were also provided in 373 secondary schools, and the number of schools in which instrumental music is taught continues to increase. There were 258 school choirs, 81 orchestras, and 77 bands in secondary schools, and 27 operas were performed during the year.⁽²⁰⁾ School music is making an important contribution to the cultural life of the Province.

TEACHERS AND TRAINING

There were 773 trained and certificated teachers and supervisors of music in the elementary schools and 258 in secondary schools. Music is taught in all the Teachers' Colleges, and the summer course in Music is always largely attended. Nine different courses in vocal and instrumental music were offered in 1953, and the total enrolment was 377.

MUSIC OPTION

Music is an optional subject in Grades IX to XI of the secondary schools. Pupils may take the school course or they may obtain equivalent standing by submitting certificates of several accredited examining bodies, including the Royal Conservatory of Music at Toronto. Grade XII standing was achieved by 948 students in 1953. At the Departmental examinations of Grade XIII 127 pupils attained standing and at the same time 479 pupils from 160 schools presented equivalent certificates.

MUSIC FESTIVALS

Music festivals have been encouraged as a means of motivating classroom work, establishing standards of performance, and stimulating public interest. The number of festivals involving more than one school held in 1953 was approximately 125, and nearly every part of the Province was served.

RADIO

During January, February and March the Department, in co-operation with the Canadian Broadcasting Corporation, presented twenty-four music broadcasts in four series, i.e. "Primary School Music", five fifteen-minute programmes for Grades I-III; "Junior School Music", five fifteen-minute programmes for Grades IV-VI; "Music for Young Folk", ten thirty-minute programmes for Grades VII-X; "Ontario Sings", four fifteen-minute programmes for Grades V-VIII. For all these broadcasts the commentary was prepared and given by the Provincial Director of Music.

⁽¹⁹⁾ For tables see p. 174

⁽²⁰⁾ For tables see p. 174

CONCERTS

To bring live music of high quality to secondary school pupils in smaller communities and to encourage young artists who are for the most part graduates of the Ontario schools, the Department has given, during eight years, 850 concerts by 226 artists. In 1952-53 sixty-six artists gave 134 concerts in 46 towns.

School Attendance

ENROLMENT

The total enrolment of all schools of the provincial system for the school year 1952-53 was 878,203, an increase of 64,116 over the preceding year. The elementary schools showed an increase of 56,412, and the secondary schools 7,704. The number of public and separate schools in operation was 6,857, with a percentage attendance of 93.4, and the number of secondary schools was 378 with a percentage attendance of 94.9.⁽²¹⁾

EMPLOYMENT

The number of school children's employment certificates issued to children under fourteen years of age during the calendar year 1953 was 593, a decrease of 5 from the year 1952. These certificates, which are valid for not more than six weeks in a term, were issued if the need was urgent. The number of home permits issued to pupils fourteen to sixteen years of age was 1,137, and the number of employment certificates was 4,210, increases of 18 and 263 respectively.⁽²²⁾

Physical and Health Education

SCHOOL PROGRAMME

Training courses for teachers in service have been held in both urban and rural areas. In the elementary schools it is hoped that the courses will lead to a greater use of the available facilities. Meetings of groups of secondary school teachers have been directed towards a better assessment of objectives in Physical Education. Discussions have been held with representatives of Ontario universities regarding the standards of physical fitness for students entering university.

HEALTH EDUCATION

A meeting of physicians, nurses, inspectors and teachers was held at the Ontario Athletic Leadership Camp in August. The desirability of the establishment of School Health committees at the community level was discussed and studies are likely to be undertaken in two centres.

A committee of teachers and officials co-operated with the Ontario Temperance Education Association to produce a series of pamphlets to assist teachers in dealing with the topic, the use of alcohol, in Health courses.

CAMPS

Ontario Athletic Leadership Camp

The purpose of this camp is to provide experience in leadership for secondary school pupils. Each secondary school is invited to send a representative selected on the basis of academic standing and contribution to school life. At the camp this year less emphasis was placed on athletic skills and more on developing qualities of leadership.

Four two-week courses were held. Two hundred and twenty girls and two hundred and ten boys attended.

⁽²¹⁾ For tables see pp. 76 and 80

⁽²²⁾ For tables see p. 80

Ontario Camp Leadership Centre, Bark Lake

This camp provides leadership training for prospective counsellors in non-profit camps in Ontario. Students are nominated for the three-weeks training course by Camp directors. A separate course for girls was previously provided at Bellwood, but because of changing water levels it was decided to hold both boys' and girls' courses at Bark Lake this year. One hundred and twenty girls and one hundred boys completed the course.

Further assistance was given to 271 non-profit camps in Ontario by the payment of grants totalling more than \$35,000.

Community Programmes

Services are provided in the fields of community recreation and adult education, to encourage the development of programmes of cultural, social, physical and educational activities by public and private agencies in communities throughout the Province. These services are chiefly advisory, but in addition provision is made for the training and certification of recreation workers, the payment of grants in aid of municipal programmes, and the operation of classes in Citizenship Training and English for newcomers.

ANNUAL GRANTS

Annual grants are paid to municipalities which appoint Municipal Recreation Committees under the Regulations of the Department of Education and which establish and maintain recreation services. Two hundred and fifteen municipalities have organized public recreation programmes and of these approximately 62 municipalities employ full-time Directors of Recreation. In 1953, 150 municipalities received grants totalling \$225,041.27. It is estimated that 160 municipalities will receive \$250,000.00 in 1954.

Grants are also made to provincial organizations conducting programmes of recreation.

ADVISORY SERVICES

The Community Programmes Branch provides two types of advisory and consultant services:

- (1) By technical advisers who are specialists in specific areas of recreation. These specialists are available to communities to provide an advisory service related to problems of a specific nature.
- (2) By field representatives in the various districts of the Province. These representatives assist municipalities, community organizations and agencies in planning, organizing and operating programmes of recreation and adult education.

LEADERSHIP TRAINING

A three-year course of training for Municipal Recreation Directors leading to provincial certification has been established. In 1953, 44 Directors were enrolled in the first year course, 5 were enrolled in the second year course, and 17 were enrolled in the third year course. Ninety-five courses with a total enrolment of 3,754 were provided for community group leaders. Rural group leaders attended night schools operated jointly by the Community Programmes Branch and the Department of Agriculture. In 1953, 19 of these schools offering a wide variety of subjects were attended by 4,227 persons. Eight training courses for playground leadership were carried on with an attendance of 614.

Advanced summer courses were given to instructors and community leaders at regular summer schools of the Department of Education held at Queen's University, the University of Western Ontario, and McMaster University.

At the request of the Ontario Farm Forum organization the Community Programmes Branch co-operated with the Department of Agriculture in providing leadership training courses for forum activities in ten counties.

EXPERIMENTAL PROJECTS

Study of Night Schools

A preliminary study of the night school programme in secondary schools in the school year 1952-53 showed a total registration of 69,846. In addition to this, there were 15,346 new Canadians studying Basic English and Citizenship in secondary schools.

Community Leadership Courses

During the last year a committee of staff members has prepared instructional material for a course for community leaders. The material is now being tested and evaluated before being put to use.

Gerontology

In 1953 a study was made of what had been done to date in Canada, the United States and England on the Problems of the Aging. With the object of assisting Recreation Directors to plan helpful programmes for Senior Citizens' Clubs the information gained was put into pamphlet form.

Family Camp

In order to discover how family camping can contribute to a more co-operative, productive and happier life for the whole family through the understanding of human relationships, learning of new skills and the opportunity to relax, a family camp was held in August, 1953, at Loon Lake, 30 miles north of Fort William. The Branch participated in the camp at which nine families were present, a total of 15 adults and 23 children.

Experimental Conference in Citizenship

In 1953 the Branch organized the first camp conference dealing with the problem of integration of newcomers to Ontario. This conference gave an opportunity to leaders in ethnic groups and leaders in community organizations to meet for a week in a camp setting to study the various problems connected with integration, to get to know each other and to plan together various programmes which would have the effect of bringing newcomers closer into the life of the Ontario communities.

Experimental Course in Day Camp Leadership

At the request of several Ontario municipalities interested in Day Camp programmes an experimental course in Nature Study methods was held in co-operation with the Ontario Field Naturalists at Guelph on June 21 and 22, 1953. Forty-five leaders from seven communities attended this course. Subsequent observations indicated that this course can play an important part in the development of our youth.

CITIZENSHIP TRAINING

In 1953 there were 21,702 students enrolled in 843 Citizenship Training classes of which 760 were operated by local School Boards, and 73 classes directed by the Branch were operated in outlying territories.

In 1953 tests were carried out to ascertain the degree of proficiency of students attending the various classes. Proficiency certificates were presented to 1,917 students, 65% of those writing, who successfully passed a test based upon instruction received.

A conference of representatives of various agencies interested in the integration of new Canadians was held at Geneva Park. The cost and leadership was shared by the Federal and Provincial authorities. About 50 persons attended, representing a number of ethnic groups and organizations of Canadians, both native-born and newcomers.

Public Libraries

BUILDINGS

It is undoubtedly a sign of the growing appreciation of the public library, its service and its place in contemporary life, that there has been so much building activity during the past few years. Library boards cannot demand money for capital expenditures, and funds for this purpose must be achieved by persuasion. They come either as the result of a vote or else through the interest of the municipal council. In either case they are provided only where the public library, through vigorous service, has made its mark upon the community and has become an important and widely appreciated element in the community life.

Since last reporting, the Library Board of the Village of Centralia has purchased a small building and, largely with volunteer help, has converted it into an attractive library. In Lorne Park, excellent rented quarters have replaced a tiny and badly outgrown building. In Norland, an ingenious board bought a small, disused church in the country, moved it into the village and rebuilt it very successfully as a public library. In Woodville, when the association became a public library, a completely new building was provided with public funds. This one bids fair to become the show village library of the Province.

In the towns, the Bobcaygeon library, for many years cramped for room and suffering insecure tenancy, now occupies splendid quarters in what were once the offices of the Boyd Lumber Company, situated on a delightful river bank. The old church which has for long years housed the Georgetown Public Library most inadequately, has been completely remodelled at public expense and has been made attractive and well adapted to a town library service. In Long Branch, the new library has not yet arisen but the ratepayers have voted in its favour and construction is about to begin. Tilbury offers one of the most striking examples of successful conversion. Two shops have been thrown together to produce a modern and functional library, well designed and decorated in striking taste. In Trenton, a new library, functional in architecture and beautifully located overlooking the Bay of Quinte, is nearing completion. And in Wingham, dreary quarters in the municipal hall have been thoroughly redesigned and rebuilt to provide an extremely satisfactory small town library.

Building in the cities has not been so active as in the smaller places. However, a beautiful new library is nearing completion in Oshawa, the gift of Colonel R. S. McLaughlin to his city. The redesigning and remodelling of the St. Catharines library has been completed with satisfactory results; and a new outlet, the Seminole Branch, of outstanding design and construction, has been opened in Windsor.

GRANTS

Legislative grants paid to libraries in 1953 amounted to \$736,180, an increase of \$168,299 over the year before. Public libraries received \$620,791, county and district libraries \$72,700, and library associations \$42,689. Grants on the certificates of librarians (excluding the Toronto Public Library) amounted to \$108,000. The Legislative vote for the purpose of making grants to libraries has risen to its present figure from the \$105,000 voted in 1947.

SERVICE

There were 539 public library agencies operating in 1953, made up of 232 public libraries, 244 library associations, 49 branch public libraries and 14 county and district libraries. The following changes are reported as having

occurred between January, 1953, and February, 1954. New public libraries were established in Levack in the District of Sudbury, Michipicoten (Wawa) in the District of Algoma, and Stamford Township in the county of Welland. The public library of Lancaster, which had been closed for a number of years, was reorganized and is now in service again. Ten library associations have become public libraries, namely Athens, Bradford, Huntsville, Kirkland Lake, Lambeth, Merlin, Port Credit, Thornhill, Wardsville and Woodville.

A district library co-operative has been organized in the District of Thunder Bay. Library associations have been established in Atikokan in the District of Rainy River, Finch in the county of Stormont, and Forest Hill Village in the county of York. The following library associations have been disestablished for failure to comply with the provisions of the Public Libraries Act: Glen Allan, Harrington, Sparta, Stevensville, Tottenham and Underwood.

It is noted that a few library associations are now being organized; and when they are, it is usually with the intention of achieving public library status at an early date.

New bookmobiles have been purchased for the public libraries of Etobicoke Township, Ottawa and Sarnia. This brings to nineteen the number of bookmobiles in service in the Province at the end of 1953.

The use of Public library books increased by one million in 1952, despite the fact that television appears to have caused a falling off in some districts. The total circulation was 16,540,000, of which the public libraries accounted for 15,440,000 and the library associations 1,100,000 books.

EXPENDITURES ON LIBRARIES

In 1953 the total expenditure on public libraries was \$4,094,000, of which \$129,000 was spent on library associations and \$142,000 on county and district libraries. This is an increase of \$463,000 over the year before. Book purchases of \$717,400 were \$63,400 higher and salaries at \$1,978,900 were \$239,300 more than in 1952.

It is noted that only 14 public libraries are still receiving less than the 50¢ per capita in tax levy which library boards may require under the provisions of the Public Libraries Act. A greatly increased local support is being achieved generally, stimulated by the generous Legislative grants. Of the 14 libraries which received less than the minimum 50¢ per capita in 1952, three are township libraries which have not yet been fully developed, two are town libraries, and nine are in villages. The 11 town and village municipalities have a combined population of 23,000 and show total book issues of only 74,000, or about 3.2 books per capita.

Fifty-seven libraries are receiving 90¢ per capita or more from their local governments, and forty-three are over the \$1.00 mark.

The average public library tax levied by municipal councils in 1952 was at the rate of 80¢ per capita, an increase of 5¢ per capita over 1951, while the whole expenditure on public libraries in 1952, per capita of population served, was \$1.34, an increase of 10¢.

It appears that increased financial support and increased reading from the public libraries go hand in hand, and that the advent of a new medium for mass communication, such as television, is likely to reduce the volume of reading only where the library is not well enough supported to meet the challenge.

TRAVELLING LIBRARIES

The 1953 book circulation from the Travelling Libraries was 63,109. Boxes sent out were 1,351. Of these 1,037 went to elementary schools, 58 to secondary schools, 168 to small libraries, 22 to groups of the Women's Institute, 23 to groups of the Farm Forum and 43 to miscellaneous organizations.

Issues from the Rural Teachers' Professional Library, recently reorganized and re-stocked, continue to increase slowly; but the use of this valuable material

is still far below that which might be expected, considering its importance to rural teachers and the strong approval which it has received from the inspectors.⁽²³⁾

Public Records and Archives

MANUSCRIPT DIVISION

Several valuable additions to materials in the Archives were made during the year. The various government departments are important sources of material. A quantity of records were received from the Prime Minister's Department, records of the Hepburn, Nixon and Conant administrations, 1934-43. Such records cannot be made available for some time, but they are now being sorted and will in future be a most valuable source of information regarding the activities of the Government and conditions in the Province during these years. Some files were also received from the Department of the Attorney-General.

From Colonel Charles Lindsey the Archives received on indefinite loan the W. L. Mackenzie papers (including a large number of Lindsey papers). A portion of this collection was sent temporarily to the British Museum, where they are being examined by the writer of a forth-coming biography of Mackenzie. From Colonel C. G. M. Grier were received, also on indefinite loan, papers of his ancestor, the Honourable William Dickson, who was chiefly instrumental in bringing about the settlement of Dumfries Township. The estate of the late H. H. Langton donated the original Langton letters (most of which have been published), together with sketches and miniatures by Anne Langton.

Last year the records of the Canada Company which had been preserved in Canada were transferred to this Department. This year the records from the head office in London were received. Among the latter are the Minutes of the Court, the early correspondence with the Commissioners, and correspondence between the Company and His Majesty's Government.

With the consent of the donor, Mrs. Charles Macinnes, the University of Toronto Library transferred to the Archives the T. C. Patterson papers. Mr. Patterson was the editor of the Toronto Mail. Colonel S. Heward donated the original Crookshank-Lambert letters. A collection of manuscripts, maps, and pamphlets belonging to the late Percy J. Robinson was presented by Mrs. Robinson. By purchase the papers of Colonel J. B. Rousseau (1758-1812), pioneer settler and trader, were acquired.

Many other individual items were received. Mention should perhaps be made of the making of microfilm copies of much of the correspondence of John Beverley Robinson and of the diary of the Reverend F. J. Lundy, Rector of Grimsby, 1849-1867, lent to us for this purpose.

Much work has been done on the Records of the Crown Lands Department, placed in the Archives many years ago and now organized and made available for study. Another large body of material inventoried during the year is the William Kirby collection, given to the Archives several years ago by the Niagara Parks Commission. There is also on file a very large collection of railway material, among which are the Francis Shanly records. The latter have now been reduced from a conglomeration of miscellaneous papers to a useful collection. Calendars have been compiled for smaller collections: the J. B. Rousseau papers, the Sir William Hearst collection, some commercial records, and some W. L. Mackenzie papers.

There are in the Archives three books of maps used by Colonel Thomas Talbot, the founder of the Talbot Settlement, in locating his settlers. The names of those to whom land was allotted were written in pencil and, as in the process of time the original entries were becoming illegible, photostats of these maps have been made and the names of the settlers deciphered and written in. The result will be an almost imperishable record of a series of valuable documents.

⁽²³⁾ For statistical tables relative to this report see p. 153

As reported last year, the books in the Archives library were classified and catalogued in 1951-52. This did not include government publications, and much work has been done in checking and cataloguing these. In some cases, rare government reports have some pages missing; in such cases, the complete book has been borrowed, the missing pages photostated, and the photostats placed with our original to make a complete item.

SERVICES

Beginning in January, 1953, a careful check was kept of those who visited the reading room to use manuscripts and books. The total for the year was 866 persons, an average of nearly four persons per day. As those who use manuscripts usually remain for some time, the reading room has been almost continuously occupied. A new, improved, table-model microfilm reader and additions to the microfilm collection have resulted in increased use of this medium.

In the early summer the Board for the Protection of Archaeological and Historic Sites was constituted, and the Archivist was asked to act as secretary. There were a number of meetings of the Board in the Archives Building during the remainder of the year, and several recommendations were forwarded for consideration, both on sites to be designated and procedure to be followed.

As in previous years, three cases of documents were sent during the school year to schools selected by the Secondary School inspectors' office. These documents serve to bring a sense of realism to the history being taught, and are much appreciated.

Trade Schools

There were 122 registered Trade Schools operating in Ontario in 1953. These schools offered 86 different courses of study, available in day or evening classes or by correspondence.

Day school registration showed a decrease of approximately ten percent, and night school registration an increase of fifteen percent, compared with the registrations in 1952. The number of registrations for instruction by correspondence was the highest recorded since the Trade Schools Regulation Act became effective.

The need for privately-operated fee-charging Trade Schools is sometimes questioned, when there are Vocational schools providing day and evening courses in most of the larger centres of the Province and free correspondence courses offered by the Department of Education. The Trade Schools provide courses not always found in the Vocational schools or in the Department of Education correspondence courses. They are able to permit entry at any time and progress at a rate adjustable to the individuals capacity. Trade School timetables are flexible enough to permit employed persons to attend in off-work hours, or to attend day or evening classes for alternating periods. These are some of the reasons why the Trade Schools continue to occupy a useful place in our educational system and to enjoy their own measure of public patronage.

Each successive year that private Trade Schools operate under the supervision of the Department of Education there are fewer cases in which the schools fail to comply, intentionally or inadvertently, with the regulations. Generally speaking, the proprietors are co-operative and anxious to meet the requirements implied in their registration.

Ontario School for the Blind

ENROLMENT

There were 198 students enrolled during the school year 1953-54. Eight students withdrew during the year and the June, 1954, enrolment was 190.⁽²⁴⁾ Of this number, 27 students were from Manitoba, 18 from Alberta, and 21 from Saskatchewan.

PROGRAMME

Academic, physical and social activities all entered into the school programme, with music and dramatics as usual playing an important part in the corporate life of the school.

TEACHER-TRAINING

Classes were instituted to provide special training for teachers serving in the school. It is intended to provide a course extending over a period of five years and including classes in Braille Reading and Writing, Special Methods for the Blind, Physiology of the Eye, and Psychology of the Blind.

NEW JUNIOR SCHOOL BUILDING

A new building for the junior school was opened in September, 1953, to accommodate 54 pupils aged from six to ten years. The building includes dormitory, dining, recreation and classroom accommodation for the pupils. A separate wing of the building provides a twelve-bed hospital to serve all the pupils of the school.

Ontario School for the Deaf

ENROLMENT

The enrolment of the Ontario School for the Deaf on September 15, 1953, was 372, an increase of 12 over the total of the previous September. During the year it reached an all-time high of 376.⁽²⁵⁾ Most of these children were profoundly deaf. Their hearing losses in decibels for the better ear, as determined by the use of a pure-tone audiometer, were as follows: 90-100 decibels, 206 pupils; 80-90 decibels, 60 pupils; 70-79 decibels, 47 pupils; 60-69 decibels, 36 pupils; 50-59 decibels, 16 pupils; 40-49 decibels, 5 pupils; 30-39 decibels, 2 pupils.

The seven pupils with hearing losses under 50 decibels were not only hard-of-hearing but lived in communities where special provision could not be made for their education.

PROGRAMME

During the period under review, two additional classes were organized to take care of the increased enrolment. Three teachers were added to the staff, two for the additional classrooms and one to provide for an increase in auditory training for the youngest pupils. Three additional classes were equipped with group hearing aids. Some work was done to evaluate wearable hearing aids for individual pupils, and as a result many pupils with sufficient residual hearing to profit from wearing individual aids are now using them. A new automatic press, a trim saw, and a caster were added to the print shop. Showers and dressing rooms were added to the boys' gymnasium.

⁽²⁴⁾ For tables see p. 176

⁽²⁵⁾ For tables see p. 177

School plays and pageants continue to provide important training for the children and were presented to large audiences in the school auditorium. The annual visiting day and display of work from the academic and vocational classes in June was attended by a large number of parents and friends of the children.

Service Record

IN MEMORIAM

CHARLES F. EWERS, B.A., retired Public School Inspector for District Division 2, passed away on May 12 at the age of eighty-seven. Mr. Ewers was born in Manchester and received his elementary education in Port Perry. He graduated with honours in Science from Queen's University. He taught public school at Kleinburg and was Principal of the Bolton Continuation School and the High Schools in Bradford and Aurora. For two years he served as Principal of the Fort Frances High School, and in 1925 was appointed Public School Inspector for District Division 2. He retired in 1936. Mr. Ewers did much to advance the cause of education as a teacher, as a High School Principal, and as an Inspector.

OLIVER M. MacKILLOP, B.A., B.Paed., passed away suddenly at his home in Richmond Hill on March 9. He was born at Allenford and received his elementary and secondary education in Port Elgin and Owen Sound. He attended the Faculty of Education, and later taught for several years in the rural schools of the Province. He graduated from Queen's University in 1922 and served as Principal of Belmont Continuation School and Milton High School. In 1927 he was appointed Public School Inspector for the City of Sudbury and surrounding district, and was transferred in 1944 to York No. 1 with residence at Richmond Hill. Mr. MacKillop loved children, and it was his desire that the teachers should inspire in their pupils a love of learning. He was himself an ardent student of English Literature. During his many years of service he made an outstanding contribution to both elementary and secondary education in the Province.

LAMBERT NORMAN, B.A., who retired as Public School Inspector for Waterloo South in 1943, died on February 25, 1953. Mr. Norman was born in King, Ontario, in 1869. He was an honour graduate of Toronto University in Modern Languages. He taught in Ingersoll Collegiate and Kitchener-Waterloo Collegiate. In 1913 he was appointed Public School Inspector for Waterloo South and served in that post for thirty years. Following his retirement Mr. Norman resided in the Village of Ayr.

HOWARD ROBERTSON, B.A., B.Paed., Public School Inspector for Waterloo North, died on May 30, 1953. Mr. Robertson was born in Howard Township, Kent County, on May 18, 1898. He received his early education in Kent County and later graduated from Victoria University in Arts and Theology. He was ordained as a Minister of the United Church, and served in Dewberry, Alberta. Later he taught public school in Toronto and became principal of Norway Public School in that city. Later Mr. Robertson was Supervising Principal for the Town of Brockville. In 1942 he was appointed Public School Inspector in Glengarry County. On January 1, 1947, he was transferred to Waterloo North, which position he held until the time of his death. Mr. Robertson was highly respected by his colleagues. His untimely death was due largely to his untiring devotion to duty.

RETIREMENTS

Mr. JOSEPH BÉCHARD retired as Master, University of Ottawa Teachers' College, on August 31, 1953. Mr. Béchard was born in Rockland, where he attended the primary and secondary schools. He obtained his B.A. from the University of Montreal in 1912. During World War I Mr. Béchard served in the Canadian Army. He attended the Ontario College of Education in 1916. His first teaching

appointment was at Plantagenet High School in 1917. From 1920 to 1925 he taught at the Sturgeon Falls Model School. In 1925 he was appointed Principal of the Embrun Model School, where he remained until 1927 when he became Separate School Inspector at Sudbury. In September, 1931, he was made Master at the University of Ottawa Normal School and remained there until his retirement. He taught Mathematics and School Management most successfully, and was well liked both by students and masters for his competence and joviality.

Miss JESSIE I. CROSS, B.A., retired as Supervising Teacher of Public Schools for York Nos. 3 and 4 on August 31, 1953. Miss Cross was born in Barrie and received her elementary education in Stewarttown and Georgetown. After graduating from the Gravenhurst High School she attended the Faculty of Education when it first opened in 1907. Miss Cross taught in Waubausene, Powassan, Collingwood, Orillia, and Toronto. In 1917 she was appointed to the staff of the Toronto Normal Model School, where she taught various grades until August 31, 1941, when she was appointed Supervising Teacher for York Nos. 3 and 4. Miss Cross was a teacher of much competence and was popular with teachers and pupils. On her retirement she said "As a child I wanted to be a teacher, and I have never regretted my decision to become one."

GEORGE C. DOBSON, B.A., B.Paed., Public School Inspector for Kent County, retired on March 26. He was born in Essa Township and secured his elementary education there. He attended the Barrie Collegiate Institute and taught elementary school for some years in Western Canada. He graduated with Honours in Mathematics from the University of Toronto, and later attended the faculty of Education. In 1918 he was appointed to the staff of the Sudbury High School. Later he taught in the secondary schools in Port Colborne, Almonte, and Weston. In 1934 he was appointed Inspector of Public Schools for Bruce West with residence at Kincardine, and in 1944 was transferred to the County of Kent.

HUBERT B. GALPIN, B.A., B.Paed., Inspector of Public Schools, retired in January, 1953. Mr. Galpin was born in London, where he received his elementary and secondary education. He graduated from the Faculty of Education in Toronto in 1912 and taught for nine years in the London Public Schools. This teaching service was interrupted during World War I, when he served as an artillery officer in the Canadian Army in Canada and in Europe. In 1928 Mr. Galpin was appointed Inspector of Public Schools in Lambton No. 1 with residence in Sarnia, where he served until 1951 when he was transferred to the inspectorate of York No. 9. Mr. Galpin is a graduate of Queen's University in Arts, and holds the degree of Bachelor of Pedagogy from the University of Toronto. His influence towards efficiency was felt in Lambton County and York County during his tenure of office as an inspector.

Miss FLORENCE F. HALLIDAY, B.A., B.Paed., Master in the Toronto Normal School, retired on August 31, 1953. She first entered the teaching profession in 1908 when she graduated from the Faculty of Education and taught in a rural school near her home in Chesley, Ontario. After two short periods of teaching in the Orangeville Public School and the Thamesville Continuation School, Miss Halliday returned to Chesley to teach there in the High School for eight years. Then she left to go to the University of Toronto where she took the honour course in Mathematics and Physics, graduating in 1922. With this standing she taught Mathematics for one year in Parkdale Collegiate Institute, Toronto, thus completing an experience which embraced every type of school in the Provincial system. It was in September, 1923, that Miss Halliday began the career in the Toronto Normal School which continued for thirty years. By former students and associates she will always be honoured for her manifest kindness and the complete integrity of her character.

HUGH H. LOUCKS, B.A., attended Ottawa Normal School and, after graduation, taught in a one-room school in Lanark County. Later he served as Principal of the two-room school at Woodville. During the period 1928-41 Mr. Loucks was Principal of the Morewood Public School and the Morewood High School. He was

appointed Inspector of Public Schools for Hastings North with residence at Bancroft, effective September 1, 1941. He served there until September, 1 1948, when he was transferred to Renfrew South with residence at Renfrew. After a long period of illness Mr. Loucks retired August 31, 1953.

WILLIAM J. MORRISON, B.A., B.Paed., retired on January 27, 1953, as Superintendent and Principal of the Ontario School for the Deaf, Belleville, completing half a century of devoted service in many educational fields. Born in Beeton, in Simcoe County, he received his early education in nearby Painswick. He attended Barrie Collegiate Institute and Barrie Model School and began teaching in January, 1902, in the rural school at Eady. Next he became principal of the school at Hillsdale. Following this he graduated with honours in Chemistry and Mineralogy from the University of Toronto and later obtained the degree of Bachelor of Pedagogy there. His varied teaching career includes service at Dane for the Reading Camp Association in the summer of 1908, in a rural school in Saskatchewan, as science master in Listowel and Dunnville High Schools, principal and science teacher in Dutton High School and Bowmanville High School, and Inspector of Public Schools for the city of Brantford. After six years in the latter position, he was appointed to head the Ontario School for the Deaf on October 1, 1935. An able administrator, his leadership was characterized by a profound understanding of the needs, and a kindly interest in the welfare of the deaf children in Ontario.

Mrs. OLIVE E. PALMER, B.A., after experience as a teacher and Guidance Counsellor in Ontario schools, joined the staff of the Guidance Branch of the Department of Education on July 1, 1945. She served as Assistant Director of Guidance until her appointment as Acting Director in July, 1953. She resigned in October, 1953, to be married to Mr. John G. Diefenbaker. With her wide experience, expert knowledge of Guidance and its relationship to general educational progress, and her charming personality, she made a very definite contribution to the development of Guidance services in Ontario schools.

ARNOTT M. PATTERSON, M.A., B.Paed., who retired as Master from the Toronto Teachers' College in November, 1953, had been on the staff of the Toronto Normal School since 1923. Born on a farm in Haldimand County, he took junior matriculation with honours from Caledonia High School in 1902. His First Class certificates, professional and non-professional, were obtained at Central Collegiate, Hamilton, where the Ontario Normal College was then located. Mr. Patterson began to teach in 1905 in the Vienna High School. He served briefly in Cornwall High School and Ryerson Public School, Toronto, and then went to Queen's University for his M.A. degree in Science, taken in 1910. After that he served in Jarvis and Parkdale Collegiate Institutes, Toronto, before being appointed head of the Physics Department at Humberstone, where he remained for ten years. Mr. Patterson's work as Master in the Normal Schools at Stratford and Toronto was enhanced by his outstanding scholarship and by his interest in and consideration for individual students.

JAMES J. WILSON, B.A., B.Paed., retired on August 31, 1953, from the inspectorate of Grey North and Bruce (in part). He was appointed to this position on August 1, 1929, and served this inspectorate for twenty-four years. Prior to his appointment, Mr. Wilson was Principal of Chesley High School.

Miss MADELINE C. YOUNG, M.A., B.Paed., English Master in the Toronto Normal School since 1931, retired from that position on August 31, 1953. Though born in Trenton, Ontario, Miss Young received all her elementary and secondary school education in Belleville. Her distinguished teaching career, after attendance at the Ontario Normal College in Hamilton, began in 1907 in a rural school at Melrose in Tyendinaga Township, and continued with a "Senior First" class in Belleville. She attended McMaster University, graduating with a B.A. degree in 1911, and then taught in the Lakefield Continuation School and Albert College, Belleville. In February, 1919, she was appointed Head of the English Department

at Belleville Collegiate Institute, where she remained till her appointment to the Normal School. She spent a year in post-graduate study in English at Columbia University and obtained an M.A. degree. Her Bachelor of Pedagogy was from the University of Toronto. Miss Young was peculiarly beloved by reason of her ability to delight as well as to inspire, and to communicate her own enthusiasm for literature, especially drama and poetry.

PROMOTIONS

- Howard R. Beatie.....Promoted to Assistant Superintendent in charge of Auxiliary, Guidance and Statistical Services, June 1, 1953.
- Herbert A. Newstead.....Promoted to Director of Guidance, December 1, 1953.
- Joseph J. Demeza.....Promoted to Superintendent and Principal, Ontario School for the Deaf, January 27, 1953.
- J. R. McCarthy.....Promoted to Assistant Superintendent of Elementary Education, June 1, 1953.

APPOINTMENTS

- James R. Thomson.....Appointed Secondary School Inspector, July 1, 1953 (Secondary Education Branch).
- Clancy C. Fisher.....Appointed Vocational Supervisor, Correspondence Courses Branch, August 4, 1953.
- Gaetan C. Filion.....Appointed Elementary School Inspector, September 1, 1953.
- J. Douglas Hanmer.....Appointed Elementary School Inspector, September 1, 1953.
- Melvin W. Holmes.....Appointed Elementary School Inspector, September 1, 1953.
- Bernard A. Hoy.....Appointed Elementary School Inspector, September 1, 1953.
- Hector L. Knight.....Appointed Elementary School Inspector, September 1, 1953.
- John S. Lowcock.....Appointed Elementary School Inspector, September 1, 1953.
- Thomas A. S. McKee.....Appointed Elementary School Inspector, September 1, 1953.
- George M. Nobes.....Appointed Elementary School Inspector, September 1, 1953.
- Everett G. Peterson.....Appointed Elementary School Inspector, September 1, 1953.
- Peter H. Torrance.....Appointed Elementary School Inspector, September 1, 1953.
- Charles W. Young.....Appointed Elementary School Inspector, September 1, 1953.
- John A. Aikman.....Appointed Master, Hamilton Teachers' College, September 1, 1953.
- B. Gertrude Bergey.....Appointed Master, London Teachers' College, September 1, 1953.
- John L. Bowers.....Appointed Master, Stratford Teachers' College, September 1, 1953.
- David A. Clee.....Appointed Master, Toronto Teachers' College, September 1, 1953.
- Murray J. Dobson.....Appointed Master, Toronto Teachers' College, September 1, 1953.
- Donald E. Farwell.....Appointed Master, Toronto Teachers' College, September 1, 1953.

Maxwell B. Parnall.....Appointed Master, Toronto Teachers' College,
September 1, 1953.
Edison J. Quick.....Appointed Master, Toronto Teachers' College,
September 1, 1953.
Emile Dubois.....Appointed Master, University of Ottawa Teachers'
College, September 1, 1953.
Erna A. Martin.....Appointed Master, North Bay Teachers' College,
September 1, 1953.
Mrs. Claire S. Burke.....Appointed Kindergarten Specialist, Toronto Teachers'
College, September 1, 1953.

TRANSFERS

Maynard Hallman.....Transferred from Master, Hamilton Teachers' College,
to Elementary School Inspector, January 1, 1953.
Bertha Dick.....Transferred from North Bay Teachers' College to
Toronto Teachers' College, September 1, 1953.
J. R. M. Peat.....Transferred from Master, Toronto Teachers' College,
to Elementary School Inspector, September 1,
1953.
Frank P. Cunningham.....Transferred from Assistant Principal, Ontario School
for the Deaf, To Elementary School Inspector,
September 1, 1953.

RESIGNATIONS

Geoffrey S. O'Brian.....Assistant Director of Cadet Corps, resigned May 31,
1953.
A. Margaret Wettlaufer...Resigned as Kindergarten Specialist, Toronto Teachers'
College, August 31, 1953.
(Mrs.) Olive E. Palmer.....Executive Officer, Guidance Branch, resigned October
31, 1953.
Harold A. Christie.....Elementary School Inspector, resigned August 31, 1953.
Kenneth D. Hall.....Master, London Teachers' College, resigned August 31,
1953.

SUPERANNUATIONS

Arnott M. Patterson.....Master, Toronto Teachers' College, superannuated
November 29, 1953.
Madeline C. Young.....Master, Toronto Teachers' College, superannuated
August 31, 1953.
Florence F. Halliday.....Master, Toronto Teachers' College, superannuated
August 31, 1953.
Joseph Béchard.....Master, University of Ottawa Teachers' College,
superannuated August 31, 1953.
James J. Wilson.....Elementary School Inspector, superannuated September
2, 1953.
Hubert B. Galpin.....Elementary School Inspector, superannuated January
31, 1953.
William J. Morrison.....Superintendent and Principal, Ontario School for the
Deaf, superannuated January 26, 1953.
George B. Dobson.....Elementary School Inspector, superannuated March 26,
1953.
Hugh H. Loucks.....Elementary School Inspector, superannuated August
31, 1953.

APPOINTMENTS

The following appointments were made by Boards of Education during 1953:

Township of Etobicoke

L. W. Smith, Supervising Principal, Etobicoke Public Schools, appointed Public School Inspector and Assistant Superintendent of Public Schools, September 1.

City of Hamilton

G. J. Patterson, Principal, Prince of Wales School, Hamilton, appointed Public School Inspector, January 1.

City of Kingston

H. C. Hunter, Supervising Principal, Kingston Public Schools, appointed Public School Inspector, September 1.

City of Ottawa

H. A. Christie, Inspector for Waterloo No. 2, appointed Public School Inspector, August 17.

City of Windsor

K. H. D. Hall, London Teachers' College staff, appointed Public School Inspector, September 1.

The following appointments were made to the provincial staff of inspectors during 1953:

Carleton and Prescott and Russell No. 1

G. M. Nobes, Broadview Public School, Ottawa, appointed Public School Inspector with Inspector D. W. Simpson, September 1.

Glengarry No. 1 and Prescott (In Part)

P. H. Torrance, Principal, McKee Avenue Public School, York North T.S.A. No. 1, appointed Public School Inspector, September 1.

Northumberland

C. W. Young, Principal, Ross Public School, Welland, appointed Public School Inspector, September 1.

Prince Edward

H. L. Knight, Teacher in Wingham District High School, appointed Public School Inspector, September 1.

Welland (In Part); Lincoln (In Part)

J. R. M. Peat, Toronto Teachers' College staff, appointed Public School Inspector, September 1.

E. G. Peterson, Principal, Central Public School, Welland, appointed Public School Inspector with Inspector J. R. M. Peat, September 1.

York Nos. 3 and 4

M. W. Holmes, Supervising Principal, Oakville Public Schools, appointed Public School Inspector with Inspector W. G. Chatterton, September 1.

York No. 7

J. D. Hanmer, Principal, Chester Public School, East York, appointed Public School Inspector with Inspector F. W. Minkler, September 1.

York No. 9

Maynard Hallman, Hamilton Teachers' College staff, appointed Public School Inspector, January 1.

District Division 3

T. A. S. McKee, Public School Inspector in the City of Ottawa, appointed Public School Inspector, September 1.

District Divisions 7 and 8 (1)

J. S. Lowcock, Principal, Cornwall Public School, Port Arthur, appointed Public School Inspector with Inspectors C. A. Rath and C. M. Elliott, September 1.

R.C.S.S. Division 8

F. P. Cunningham, Vice-Principal, Ontario School for the Deaf, appointed Separate School Inspector, September 1.

R.C.S.S. Division 29 (New)

B. A. Hoy, Principal, Pinecrest Public School, Camp Petawawa, appointed Separate School Inspector, September 1.

Inspector Without Designated Area

G. C. Filion, Teacher, Sudbury High School, appointed Separate School Inspector, September 1.

Transfers

The following transfers were made in the provincial staff of inspectors during the year 1953:

A. F. Brown, from Prince Edward to Grey North and Bruce North, September 1.

W. H. Bulger, from R.C.S.S. Division 8 to R.C.S.S. Division 30 (new), September 1.

R. J. Carter, from Welland (in part); Lincoln (in part) to Lambton No. 1, January 1.

W. G. Chatterton, from Welland (in part); Lincoln (in part) to York Nos. 3 and 4, September 1.

D. J. Hynes, from Glengarry No. 1 and Prescott (in part) to Waterloo No. 2, September 1.

G. A. McLeod, from Lincoln to Renfrew South, September 1.

G. A. Noble, from District Division 3 to York No. 1, September 1.

L. C. Sutherland, from Northumberland to Waterloo No. 1, September 1.

D. I. Young, Inspector without designated area, to Haldimand, January 1.

PART II

REGULATIONS FOR GENERAL LEGISLATIVE GRANTS

GENERAL LEGISLATIVE GRANTS

THE DEPARTMENT OF EDUCATION ACT

O. Reg. 30/53.

General Legislative Grants.

New and Amending Regulations 36, 37, 38, 44, 50, 51, 52, 53, 54, 55, 56, 57 and 68, of Consolidated Regulations 1950, and O. Reg. 34/51, 319/51, 133/52, and Revoking O. Reg. 262/52.

Approved—26th February, 1953.

Filed—3rd March, 1953, 11.40 a.m.

REGULATIONS MADE BY THE MINISTER UNDER THE DEPARTMENT OF EDUCATION ACT

GENERAL LEGISLATIVE GRANTS

INTERPRETATION

1. In these regulations

- (a) "equalized assessment" has the same meaning as in *The High Schools Act*;
 - (b) "instructional salaries" means the total amount paid to or on behalf of teachers for day-school services in respect of
 - (i) their salaries, and
 - (ii) travelling allowances for itinerant teachersand includes the amount of superannuation withheld by a board under *The Teachers' Superannuation Act*;
 - (c) "municipality" means city, town, village or township;
 - (d) "public institution" means an institution operated by Canada, Ontario, a county or a municipality, and having real property not taxable under *The Assessment Act*;
 - (e) "rural municipality" means an organized township;
 - (f) "teacher" means a person employed by a board who, under a certificate or letter of standing from the Minister, is engaged in inspecting, supervising or teaching in a school under the jurisdiction of the board;
 - (g) "urban municipality" means city, town or village; and
 - (h) "year" means the period from and including the 1st of January to and including the 31st of December next following.
2. "Approved cost" shall be subject to the approval of the Minister.

APPORTIONMENT

3. The General Legislative grants for public schools, separate schools, continuation schools, high schools and vocational schools shall be

- (a) apportioned and distributed to boards in accordance with these regulations, and
- (b) applied to such school purposes as the board receiving a grant deems expedient.

CONTINGENCIES OF GRANTS

4. Where a board does not comply with the Acts administered by the Minister or the regulations thereunder, the Minister may withhold the whole or any part of a grant payable to the board.

5. Where in any year the amount voted by the Legislature for the grants under these regulations is insufficient or more than sufficient to pay the grants in full, the Minister may make a *pro-rata* reduction or increase, as the case may be.

PART 1

Public and Separate Schools

APPLICATION

6. This part applies to general legislative grants in respect of public and separate schools.

INTERPRETATION

7.(1) In regulations 10 and 12 "approved cost" means

- (a) payments in respect of principal, interest and other charges due in the current year on debentures issued and capital loans obtained on or after the 1st of January, 1951, and
- (b) the total of the disbursements made from current funds by a board or on its behalf during the preceding year, except as set forth under regulation 12, in respect of
 - (i) instructional salaries not exceeding \$75 for each pupil of average daily attendance as determined under regulations 8 and 9,
 - (ii) salaries of teachers for night-school services,
 - (iii) principal, interest and other charges due in that year on debentures issued and capital loans obtained before the 1st of January, 1951,
 - (iv) transportation of pupils to and from school, but only where their parents or guardians do not contribute directly to the cost of the transportation,
 - (v) tuition fees paid to another board,
 - (vi) fuel and electricity but only where the board qualifies for a grant under subregulation 2 of regulation 10 and the assessment per class-room unit is less than \$20,000,
 - (vii) restoration of insured school-property destroyed or damaged, but not exceeding an amount equal to the insurance proceeds received in respect thereof,
 - (viii) structural alterations, new foundations, new basements, new stairways, new roofs, new floors, fire-escapes, fire-doors, new heating-equipment, new lighting, new sanitary-conveniences of a modern type, new water-facilities, new fences, new black-boards, new desks, new pianos and new film-projectors, except where the school under the jurisdiction of the board is in an urban municipality having a population of 2,500 or more or is in a rural municipality having a population of 25,000 or more, and
 - (ix) new schools, additions to schools, new class-rooms, and new buses for the transportation of pupils,

less current-fund receipts as follows:

- (x) tuition fees from another board,
- (xi) amounts transferred to current funds from capital funds,
- (xii) insurance proceeds,
- (xiii) receipts from the sale of capital assets, and
- (xiv) refunds and reimbursements connected with disbursements previously included in approved cost.

(2) In this Part

(a) "assessment" means

- (i) the assessment of property rateable for public-school purposes in the public-school section or for separate-school purposes in the area prescribed under section 57 of *The Separate Schools Act*, as the case may be, as shown by the assessment roll on which taxes were levied for the preceding year, or where that public-school section or separate-school area is in a municipality which forms part of a county for municipal purposes, the amount at which that assessment was equalized; and
- (ii) where moneys are received by the board under section 33 of *The Assessment Act* or clause b of regulation 4 of Ontario Regulations 197/52, the assessment as set forth in sub-clause i together with an amount equivalent to that which, if levied upon at the rate of real-property taxation on the rate-payers of the school section or separate-school organization for school purposes, would result in taxes equal to the moneys so received by the board,

but where the assessment under sub-clause i, to be used for a municipality in the calculation of the grant under these regulations, is more than 120 per cent of the assessment under sub-clause i used for that municipality in the preceding year, the assessment of that municipality under sub-clause i means 120 per cent of the latter assessment;

(b) "class-room unit" means

- (i) for the board of a larger unit of administration, the number of open class-rooms on the first school-day of the current year, together with one-half of a class-room for each of the former school-sections or separate-school areas in which the board is not operating a school and which are included in the larger unit,
- (ii) for a board all of whose pupils are attending a school operated by another board, the quotient, adjusted to the next largest whole number, obtained by dividing the number of those pupils enrolled on the first school-day of the current year by 39,
- (iii) for a board operating a school and having more than 20 pupils enrolled on the first school-day in the current year at a school operated by another board, the number of open class-rooms on the first school-day of the current year added to the quotient, adjusted to the next largest whole number, obtained by dividing the number of those pupils by 39, and
- (iv) for other boards, the number of open class-rooms on the first school-day of the current year;

(c) "cost of operating" means the total of the disbursements for school purposes paid out of current funds by a board or on its behalf during

the preceding year under the Acts administered by the Minister and the regulations thereunder, and includes payments in respect of principal, interest and other charges due in the current year on debentures issued and capital loans obtained on or after the 1st of January, 1951, less

- (i) repayments of current-fund borrowings,
 - (ii) moneys transferred to a reserve fund,
 - (iii) payments to a municipality to be credited against any tax levy by that municipality,
 - (iv) receipts from another board but not including receipts under an arbitration award or an agreement in the stead thereof,
 - (v) amounts transferred to current funds from capital funds,
 - (vi) receipts from insurance,
 - (vii) receipts from the sale of capital assets, and
 - (viii) refunds and reimbursements connected with prior disbursements;
- (d) "larger unit of administration" means a consolidated-school section, a township school-area, an area under a township board, an improvement district, or a union of separate-school areas;
- (e) "open class-room" means a class-room used throughout each school-day by pupils in the charge of a teacher; and
- (f) "population" means
- (i) subject to sub-clause ii, the population of the municipality in which the school is located, as shown on the assessment roll on which taxes for the preceding year were levied, less the number of inmates of public institutions, or
 - (ii) where a board of education has been formed for 2 or more urban municipalities, the average of the combined populations thereof, computed in accordance with sub-clause i.

AVERAGE DAILY ATTENDANCE

8.(1) Subject to subregulation 2, the average daily attendance shall, for the purpose of sub-clause i of clause b of subregulation 1 of regulation 7, be the average daily attendance for the preceding year.

(2) Where the average daily attendance for the preceding year for a board in an urban municipality or in a rural school is under 300, the number used for the average daily attendance shall be not less than 30 times the number of open class-rooms as set forth under clauses a and b of subregulation 7 of regulation 10.

9.(1) Where a board operates one or more auxiliary classes or units, the average daily attendance, as determined under regulation 8, shall be increased by adding thereto

- (a) 20 for each braille class for the blind, hard-of-hearing class, home-instruction class, hospital class, oral class for the deaf, orthopaedic class for physically disabled, and sight-saving class,
- (b) 8 for each handicraft class, opportunity class, speech-correction and lip-reading class, and partial class of 4 or more handicapped pupils,
- (c) 2 for each advancement class, discipline class, institutional class, open-air class, and partial class of 2 or 3 handicapped pupils,
- (d) 2 for each home-instruction and orthopaedic unit, and

(e) $\frac{1}{2}$ for each opportunity, sight-saving, and speech-correction unit, but the number of units under class d or e shall not exceed 10.

(2) Where a board operates one or more industrial-arts or home-economics class-rooms, the average daily attendance, as determined under regulation 8, shall be increased for each of those class-rooms by the number set forth in Column 2 in accordance with the average daily attendance in the preceding year set opposite thereto in Column 1 as follows:

COLUMN 1	COLUMN 2
Average Daily Attendance of School	Number to be added
Under 50	1
50 but under 100	2
100 but under 200	3
200 but under 300	4
300 or more	5

(3) Where the pupils of 2 or more schools operated by a board receive instructions in industrial arts or home economics in one school operated by that board, the average daily attendance of those schools shall be added together for the purposes of subregulation 2.

(4) Where a class-room or unit was in operation for only one term in the preceding year, the average daily attendance shall be increased by one-half of the number calculated under subregulations 1 and 2 respectively.

AMOUNTS OF GRANTS

10.(1) Subject to regulations 11, 12, 14, 15 and 37, the board of a public or separate school in a city, or in a town or village having a population of 2,500 or more, shall be paid a grant of

- (a) \$16 for each pupil of average daily attendance during the preceding year as determined under subregulation 1 of regulation 8 and under regulation 9, and
- (b) an amount calculated by taking a percentage of the approved cost at the rate set forth in column 2 in accordance with the population set opposite thereto in Column 1 as follows:

COLUMN 1	COLUMN 2
Population	Percentage
200,000 or more	16
100,000 to 199,999	17
50,000 to 99,999	20
40,000 to 49,999	21
30,000 to 39,999	22
20,000 to 29,999	23
10,000 to 19,999	24
9,000 to 9,999	25
8,000 to 8,999	26
7,000 to 7,999	27
6,000 to 6,999	28
5,000 to 5,999	30
4,500 to 4,999	32
4,000 to 4,499	35
3,500 to 3,999	38
3,000 to 3,499	41
2,500 to 2,999	44

(2) Subject to subregulations 7 and 8 and to regulations 11, 12, 15 and 37, the board of a larger unit of administration, and all other boards not qualifying for a grant under subregulation 1 or under regulation 14 shall be paid a grant of

- (a) \$16 for each pupil of average daily attendance during the preceding year as determined under subregulation 1 of regulation 8 and under regulation 9, and
- (b) an amount calculated by taking a percentage of the approved cost at the rate set forth in Column 2 in accordance with the assessment per class-room unit set opposite thereto in Column 1, as follows:

COLUMN 1	COLUMN 2
Assessment per class-room unit	Percentage
\$125,000 or more	40
\$120,000 or more but under \$125,000	42
\$115,000 or more but under \$120,000	44
\$110,000 or more but under \$115,000	46
\$105,000 or more but under \$110,000	48
\$100,000 or more but under \$105,000	50
\$ 95,000 or more but under \$100,000	52
\$ 90,000 or more but under \$ 95,000	54
\$ 85,000 or more but under \$ 90,000	56
\$ 80,000 or more but under \$ 85,000	58
\$ 75,000 or more but under \$ 80,000	60
\$ 70,000 or more but under \$ 75,000	62
\$ 65,000 or more but under \$ 70,000	64
\$ 60,000 or more but under \$ 65,000	66
\$ 55,000 or more but under \$ 60,000	68
\$ 50,000 or more but under \$ 55,000	70
\$ 45,000 or more but under \$ 50,000	72
\$ 40,000 or more but under \$ 45,000	74
\$ 35,000 or more but under \$ 40,000	79
\$ 30,000 or more but under \$ 35,000	84
\$ 25,000 or more but under \$ 30,000	89
under \$25,000	92

(3) In addition to the grant under subregulation 2, a grant of \$300 shall be paid

- (a) to each board in the year it enters a larger unit of administration, and
- (b) to the board of a larger unit of administration for each former school-section or former separate-school area included in the larger unit of administration before the current year.

(4) In addition to the grants under subregulations 1 and 2, the board of a public or separate school shall be paid an additional grant of \$3 per pupil in respect of the increased average daily attendance under subregulation 1 of regulation 9.

(5) Where a school-section or separate-school area is withdrawn from a larger unit of administration during the current year, the grant under subregulation 3 shall not be paid in respect of that section or area.

(6) Where there is no assessment for school purposes, the assessment per class-room unit shall be deemed to be \$125,000.

(7) Where a town or village having a population of 2,500 or more is included in a larger unit of administration, the board shall be paid a grant under subregulation 1.

(8) The number of open class-rooms shall not exceed

- (a) where the average daily attendance for a board in an urban municipality or in a rural school is fewer than 300, the number obtained by dividing the average daily attendance by 33 and allowing an additional room for any remaining fraction, or
- (b) where the average daily attendance for a board in an urban municipality or in a rural school is 300 or more, the number obtained by dividing the average daily attendance by 30 and making no allowance for any remaining fraction.

TRANSFER OF SECTIONS AND AREAS

11.(1) Where the whole of a public-school section, or a separate-school area, is transferred from one board to another, the grant for the former board for the year following the transfer shall be calculated as though there had been no transfer and be paid to the latter board.

(2) Where part of a public-school section or of a larger unit of administration is transferred from one board to another, the grant for the year following the transfer shall be calculated as though there had been no transfer, and

- (a) in the case of public schools, subject to the provisions of sections 29 and 39 of *The Public Schools Act*, or
- (b) in the case of separate schools, subject to an agreement between the boards,

shall be paid to each board in the proportion that the number of pupils in the remaining part and in the part transferred, respectively, bears to the enrolment of pupils on the first school-day of December in the year preceding the transfer.

NEW BOARDS AND BOARDS COMMENCING OPERATION OF A SCHOOL

12.(1) In the year in which a new board is established, other than a board assuming jurisdiction for school purposes of an area previously administered by another board, the average daily attendance and approved cost shall be for the current year, and shall be used for the purposes of this Part until the year following that in which the board has operated a school for a year.

(2) In the year in which a board commences operation of a school, and the board or any former board incorporated therein has not previously operated a school, the average daily attendance and approved cost shall be for the current year, and shall be used for the purposes of this Part until the year following that in which the board has operated the school for a year.

(3) A disbursement included in approved cost under subregulations 1 and 2 for

- (a) capital charges,
- (b) capital outlays from current funds,
- (c) tuition fees paid to another board, or
- (d) transportation,

shall not be included in approved cost for more than one year.

MILK

13. The board of a public or separate school shall be paid a grant equal to 50 per cent of the amount expended in the preceding year for the purchase of milk for consumption by its pupils on school days between 8.45 a.m. and 4.00 p.m., less that portion of any amount contributed for the purchase of milk from any source which is in excess of 50 per cent of the amount so expended.

Boards Appointed under Section 66 of *The Public Schools Act*

14.(1) Where a rural school-section is designated and a board appointed under subsection 1 of section 66 of *The Public Schools Act*, "approved cost" means the total amount of money paid out of current revenue during the preceding year for the operation of the school or schools under the jurisdiction of the board, inclusive of tuition fees paid to any other board but exclusive of capital expenditures and expenditures for text-books, books of reference, milk and rent, and less tuition fees received from any other board.

(2) The board so appointed shall be paid a grant of 50 per cent of the approved cost as defined in subregulation 1, but where the board operates a school in a sanatorium or a hospital, the grant shall be 80 per cent of the instructional salaries paid the preceding year.

(3) Notwithstanding subregulations 1 and 2, where Canada pays Ontario, for the training of disabled or handicapped persons, a portion of the disbursements therefor made by Ontario to a board so appointed, no grant shall be paid under these regulations.

LIMITATION ON GRANTS

15.(1) Except in the case of the board of a larger unit of administration, the grants under this Part shall not exceed the amount by which the cost of operating exceeds the township grant payable under section 91 or 115 of *The Public Schools Act*.

(2) The total of the grants to a board under this Part and under Parts 4, 5 and 6 shall not exceed in any year

- (a) 90 per cent of the cost of operating where the assessment per class-room unit is \$20,000 or more, or
- (b) 95 per cent of the cost of operating where the assessment per class-room unit is less than \$20,000.

PART 2

High Schools, Continuation Schools and Vocational Schools

APPLICATION

16. This Part applies to general legislative grants in respect of high schools, continuation schools and vocational schools.

INTERPRETATION

17.(1) In this Part "approved cost" means for high schools and continuation schools, but subject to subregulation 3,

- (a) payments in respect of principal, interest and other charges due in the current year on debentures issued and capital loans obtained on or after the 1st of January, 1945, for new buildings, additions to buildings, or for equipment, and
- (b) the total of the disbursements made from current funds by a board or on its behalf during the preceding year, except as set forth under regulations 26 and 27, in respect of
 - (i) principal, interest and other charges due in that year on debentures issued and capital loans obtained before the 1st of January, 1945,
 - (ii) transportation of pupils to and from school, but only where their parents or guardians do not contribute directly to the cost of the transportation,
 - (iii) tuition fees paid to another board for pupils attending a high, continuation or vocational school operated by that board and, where subregulation 1 of regulation 25 is applicable, tuition fees with respect to the year preceding the transfer which are owed to the board of any former district transferred to a new district by any other board transferred to that district,
 - (iv) capital outlays for new buildings and additions to buildings,
 - (v) capital outlays for school buses,
 - (vi) capital outlays, in schools already in operation, for power-operated equipment, business machines, typewriters, musical instruments, desks, and gymnasium equipment, used for instructional purposes, and, where the population per municipality is under 3,000, for new heating-equipment, new lighting and new sanitary-conveniences of a modern type, and
 - (vii) restoration of insured school-property destroyed or damaged, but not exceeding an amount equal to the insurance proceeds received in respect thereof,

less current-fund receipts as follows:

- (viii) amounts transferred to current funds from capital funds,
- (ix) insurance proceeds,
- (x) proceeds from the sale of capital assets, and
- (xi) refunds and reimbursements connected with disbursements previously included in approved cost.

(2) In this Part

- (a) subject to subregulation 3, "approved cost" means for vocational schools the total of the disbursements made by a board or on its behalf from

- (i) current funds in respect of principal, interest and other charges due in the current year on debentures other than those issued in respect of buildings, additions to buildings, or equipment under sub-clause ii, and
- (ii) current or capital funds in respect of capital outlays for new buildings or additions to buildings, or for equipment,

less current-fund receipts as follows:

- (iii) amounts transferred to current funds from capital funds,
- (iv) insurance proceeds,
- (v) proceeds from the sale of capital assets, and
- (vi) refunds and reimbursements connected with disbursements previously included in approved cost;

(b) "assessment" means

- (i) the assessment of all property rateable for school purposes in each municipality within or partly within the high- or continuation-school district, whether or not only part of the municipality is included in the district, as shown by the assessment roll on which taxes were levied for the preceding year, or where that high- or continuation-school district is in a municipality which forms part of a county for municipal purposes, the amount at which that assessment was equalized; and
- (ii) where moneys are received by the board under section 33 of *The Assessment Act* or clause b of regulation 4 of Ontario Regulations 197/52, the assessment as set forth in sub-clause i together with an amount equivalent to that which, if levied upon at the rate of real-property taxation on the rate-payers of the high- or continuation-school district for school purposes, would result in taxes equal to the moneys so received by the board,

but where the assessment under sub-clause i, to be used for a municipality in the calculation of the grant under these regulations, is more than 120 per cent of the assessment under sub-clause i used for that municipality in the preceding year, the assessment of that municipality under sub-clause i means 120 per cent of the latter assessment;

- (c) "assessment per capita" means the quotient obtained by dividing the number representing the assessment by the number representing the population, but where there is no assessment for school purposes, the assessment per capita means an assessment per capita of \$1150;
- (d) "population" means the total population of each municipality within or partly within the high or continuation-school district, whether or not only part of the municipality is included in the district, as shown by the assessment rolls on which taxes for the preceding year were levied, less the number of inmates of public institutions; and
- (e) "population per municipality" means the quotient obtained by dividing the total population of municipalities in whole or in part in the high- or continuation-school district by the number of those municipalities, but where no population is available, the population per municipality means fifty times the average daily attendance.

(3) Except where grants are payable under subregulation 2 of regulation 22, debenture charges and capital outlays from current funds shall form part of the approved cost only in the proportion that the average daily attendance of all pupils other than pupils from other high-school districts attending the schools

under the jurisdiction of a board, bears to the total average daily attendance in those schools.

AVERAGE DAILY ATTENDANCE

18.(1) Subject to subregulation 2, "average daily attendance" for the purposes of the grant to a board under subregulation 1 of regulation 24 means average daily attendance of pupils for the preceding year but does not include pupils from another high- or continuation-school district.

(2) Where in the high schools or continuation schools of a board the average daily attendance of pupils for the preceding year including pupils from another high- or continuation school district is under 400, "average daily attendance" for the purposes of regulation 24 means the greater of

- (a) the average daily attendance, and
 - (b) the number of teachers employed in the schools throughout December of the preceding year multiplied by 20,
- less the average daily attendance of pupils from another high- or continuation-school district.

- (3) Under clause b of subregulation 2 the number of teachers shall not
- (a) exceed 20, or one for each 18 pupils or fraction thereof of the average daily attendance, whichever is the lesser, or
 - (b) be calculated at less than 2 in respect of a school on an island or in a territorial district.

19.(1) Where the board operates one or more departments of agriculture, the average daily attendance, as provided in regulation 18, shall be increased for each department by the number set forth in Column 2 in accordance with the average daily attendance in the preceding year set opposite thereto in Column 1 as follows:

COLUMN 1	COLUMN 2
Average Daily Attendance of School	Number to be added
Under 100	10
100 but under 200	15
200 but under 300	20
300 or more	25

(2) Where the board operates one or more industrial-arts or home-economics class-rooms, the average daily attendance, as provided in regulation 18, shall be increased for each of those class-rooms by the number set forth in Column 2 in accordance with the average daily attendance in the preceding year set opposite thereto in Column 1 as follows:

COLUMN 1	COLUMN 2
Average Daily Attendance of School	Number to be added
Under 50	1
50 but under 100	2
100 but under 200	3
200 but under 300	4
300 or more	5

(3) Where the pupils of 2 or more schools operated by a board receive instruction in industrial arts or home economics in one school operated by that board, the average daily attendance of those schools shall be added together for the purpose of subregulation 2.

(4) Where the board operates one or more home-instruction units, the average daily attendance, as provided in regulation 18, shall be increased for each of those units by 2.

(5) Where a department, class-room or unit was in operation for only one term in the preceding year, the average daily attendance shall be increased by one-half of the number calculated under subregulations 1 and 2 respectively.

AMOUNT ON GRANTS

20. The board of a continuation school shall be paid a grant of

(a) 75 per cent of the approved cost where the school is in a territorial district or on an island, or

(b) 50 per cent of the approved cost where the school is situated elsewhere.

21.(1) Subject to subregulations 2 and 3, and to regulations 26, 27, 28 and 37, the board of a high-school district which operates a school shall be paid a grant of a percentage of the approved cost as set forth in Columns 2, 3 or 5, as the case may be, in accordance with the population per municipality set opposite thereto in Column 1, and the board of a high-school district which does not operate a school shall be paid a grant of a percentage of the approved cost as set forth in Column 4, in accordance with the population per municipality set opposite thereto in Column 1 as follows:

COLUMN 1	COLUMN 2	COLUMN 3	COLUMN 4	COLUMN 5
Population per municipality	The board of a city, separated town or other urban municipality in a county	The board of an urban municipality in a territorial district	The board of a district not operating a school	The board of a high-school district consisting of a township or of all or parts of two or more municipalities, not including a city
100,000 or more	15	20	20	30
60,000 or more but under 100,000	20	25	25	30
30,000 or more but under 60,000	25	30	30	30
20,000 or more but under 30,000	30	35	35	35
15,000 or more but under 20,000	35	40	40	40
10,000 or more but under 15,000	40	45	45	50
8,000 or more but under 10,000	45	50	50	60
6,000 or more but under 8,000	45	55	55	65
4,000 or more but under 6,000	50	65	60	70
1,500 or more but under 4,000	50	70	65	75

(2) Where the population per municipality is under 1,500 and the assessment per capita is \$550 or more, the percentages under Columns 2, 3, 4 and 5 of subregulation 1 shall be 50, 75, 65 and 80, respectively.

(3) Where the population per municipality is under 1,500 and the assessment per capita is under \$550, the percentages under Columns 2, 3, 4 and 5 of subregulation 1 shall be 50, 80, 65 and 85, respectively.

22.(1) Subject to subregulations 2, 3 and 4, and to regulations 26 and 27, the board of a vocational school shall be paid a grant of a percentage of the approved cost in accordance with regulation 21.

(2) Where an existing agreement was entered into before the 1st of July, 1944, between a board and the Minister with respect to the payment of grants on debenture instalments, or disbursements for buildings and equipment, the percentage set forth in the agreement shall apply.

(3) Where Canada pays Ontario a portion of the disbursements for a vocational school, the percentage applicable to the board of the vocational school shall be 50 in respect of those disbursements.

(4) Where there are disbursements from current funds for

- (a) equipment for shops,
- (b) power-operated equipment,
- (c) typewriters and business machines,
- (d) musical instruments,
- (e) gymnasium equipment, or
- (f) desks,

for instructional purposes, the percentage applicable to the board of the vocational school shall be 50 in respect of those disbursements.

23. In addition to the grant under regulation 21, the board of a high school that operates a school within a high-school district during the current year shall be paid

- (a) a grant of \$100 for each rural school-section that is completely within the high-school district, and
- (b) where there is a township school-area in the high-school district, a grant of \$100 for each former rural school-section that is completely within the high-school district.

24.(1) In addition to the grants under regulations 20, 21, 22 and 23, and subject to subregulations 2 and 3, and to regulations 26, 27 and 28, the board of a high, continuation or vocational school shall, for each pupil in average daily attendance during the preceding year, be paid a grant as set forth in Column 2, 3, 4, 5, 6 or 7, as the case may be, in accordance with the assessment per capita set opposite thereto in Column 1 as follows:

ASSESSMENT PER CAPITA	HIGH SCHOOLS				CON- TINUATION SCHOOLS	VOCA- TIONAL SCHOOLS	
	Column 1	Column 2	Column 3	Column 4			Column 5
		Boards in urban or rural munici- palities having a population per munici- pality of 20,000 or more	Boards in urban munici- palities having a population per munici- pality of 10,000 or more but under 20,000	Boards in urban munici- palities having a population per munici- pality under 10,000	Boards of high- school districts including the whole or part of one or more townships each having a population under 25,000, but not including a city

under \$200		\$120	\$130	\$140	\$140	\$100	\$150

(2) Where the average daily attendance in a vocational school is under 500, the amount set forth in Column 7 of subregulation 1 shall be increased by \$20 for each of the first 200 pupils.

(3) The grant under subregulations 1 and 2 shall not exceed an amount equal to 120 per cent of the instructional salaries paid in the preceding year.

TRANSFER OF DISTRICTS

25.(1) Where the whole of a high- or continuation-school district is transferred from one board to another, the grant for the former board for the year of the transfer shall be calculated as though there had been no transfer and be paid to the latter board.

(2) Where part of a high- or continuation-school district is transferred from one board to another, the grant for the former board for the year of the transfer shall

- (a) be calculated as though there had been no transfer, and
- (b) be paid to each board in the proportion that the number of pupils in the remaining part and in the part transferred, respectively, bears to the enrolment of pupils on the first school-day of December in the year preceding the transfer.

SPECIAL HIGH-SCHOOL DISTRICTS

26.(1) Subject to regulation 25, where a high-school district includes a city and one or more townships, or a city and 16 or more school sections,

- (a) the average daily attendance of pupils, excluding those from other high- or continuation school districts, and the approved cost, excluding transportation, shall be divided between the city and the remainder of the district in the same proportion as the enrolment of resident pupils on the first school-day in October of the same year was divided, and
- (b) the approved cost of transportation shall be added to the approved cost apportioned to the remainder of the district,

and the grants under this Part, excluding any increased grant under subregulation 2 of regulation 24, shall then be calculated as if a board operating a school existed for each of the 2 portions of the district and the total thereof paid to the board of the district.

(2) For the purpose of applying the provisions of subregulation 2 of regulation 24, the average daily attendance shall not be divided between the city and the remainder of the district as provided in clause a of subregulation 1, but the grant of \$20 for each of the first 200 pupils shall be added to the grants calculated under subregulation 1 and be paid to the board of the district.

NEW BOARDS AND BOARDS COMMENCING OPERATION OF A SCHOOL

27.(1) In the year in which a new high- or continuation-school district is established which includes a municipality not previously in another secondary-school district, the average daily attendance and approved cost shall be for the current year, and shall be used for the purposes of this Part until the year following that in which the board of the former district has operated a school for a year.

(2) In the year in which the board of a high-school district commences operation of a school, and the board or any former board whose district was included in that district has not previously operated a school having an average daily attendance of 75 or more pupils, the average daily attendance and ap-

proved cost shall be for the current year, and shall be used for the purposes of this Part until the year following that in which the board has operated the school for a year.

(3) A disbursement included in approved cost under subregulations 1 and 2 for

- (a) capital charges,
- (b) capital outlays from current funds, or
- (c) tuition fees paid to another board,

shall not be included in approved cost for more than one year.

Boards Appointed Under Subsection 6 of Section 5 of The High Schools Act

28.(1) Where a high-school district is designated and a board appointed under subsection 6 of section 5 of *The High Schools Act*, "approved cost" means the total amount of money paid out of current revenue during the preceding year for the operation of the school or schools under the jurisdiction of the board, inclusive of tuition fees paid to any other board but exclusive of capital expenditures and expenditures for text-books and rent, and less tuition fees received from any other board.

(2) The board so appointed shall be paid a grant of 50 per cent of the approved cost as defined in subregulation 1.

PART 3

Night Schools

APPLICATION

29. This Part applies to general legislative grants in respect of night schools in high schools, continuation schools and vocational schools.

AMOUNT OF GRANTS

30. The board of a continuation school operating a night school shall be paid a grant on the total salaries of the teaching staff of the night school paid in the preceding year at the percentage applicable under regulation 20.

31.(1) Subject to subregulation 2, the board of a high school operating a night school shall be paid a grant on the total salaries of the teaching staff of the night school paid in the preceding year at the percentage applicable under regulation 21.

(2) Where the board also operates a vocational school, the percentage applicable shall be 50.

PART 4

Grants for Text-Books and Reference Books

APPLICATION

32. This Part applies to grants for text-books and reference books bought by a board.

AMOUNT OF GRANTS

33. The board of a public or separate school shall be paid a grant equal to the amount expended in the preceding year for text-books prescribed under clause i of subsection 1 of section 4 of the Act, not exceeding an amount computed by multiplying \$3 by the average daily attendance in grades I to X, both inclusive, during the preceding year.

34. The board of a public or separate school, except a board of an urban municipality with a population of 2,500 or more or of a rural municipality with a population of 25,000 or more, shall be paid a grant equal to the amount expended in the preceding year for books of reference prescribed under clause i of subsection 1 of section 4 of the Act, not exceeding an amount computed by multiplying \$1 by the average daily attendance in grades I to X, both inclusive, during the preceding year.

35. The board of a high, continuation or vocational school shall be paid a grant equal to the amount expended in the preceding year for text-books prescribed under clause i of subsection 1 of section 4 of the Act, not exceeding an amount computed by multiplying \$3 by the average daily attendance of pupils in grades IX and X during the preceding year, but excluding from the computation those pupils attending from other high- or continuation-school districts.

PART 5

Annexation Grants

APPLICATION

36. This Part applies to grants following annexation.

AMOUNT OF GRANTS

37.(1) Where the whole or part of a municipality is annexed to an urban municipality on or after the 1st of January, 1949, and at the date of annexation there are outstanding debentures for one or more school buildings in that part, the public-, separate- or high-school board of the urban municipality shall, except in the year of annexation, be paid a grant on the debenture instalments due and paid in the preceding year to the extent that the payments on the debentures would have been eligible for a grant if the annexation had not taken place.

(2) The amount of the grant under subregulation 1 shall be calculated at the rate applicable to

- (a) the board of the school section, separate school, or high-school district, in the annexed area for the year preceding annexation, or
- (b) the board of the urban municipality for the year preceding annexation, whichever rate is the greater.

38.(1) Where on or after the 1st of January, 1949, an urban municipality having a population in the year preceding annexation of 10,000 or more, annexes an area in which the combined average daily attendance of public-, separate- and secondary-school pupils resident in that area exceeds 20 per cent of the combined average daily attendance of public-, separate- and secondary-school pupils resident in the urban municipality, there shall be paid to each board of the urban municipality an annexation grant per pupil as set forth in sub-regulations 3, 4 and 5.

(2) In the first year following the annexation, the grants shall be calculated and paid as set forth in regulations 11 and 25.

(3) The annexation grant per pupil shall be the amount by which the grant per pupil paid under these regulations to the board or boards of the urban municipality in the year of annexation is exceeded by the grant per pupil paid in the same year in the annexed area, ascertained by dividing the grant paid in each case, exclusive of grants on debentures, on capital outlays from current funds, and for transportation, by the average daily attendance of resident pupils.

(4) In the second, third, fourth and fifth years following the annexation, the annexation grant per pupil shall be paid on the excess of the average daily attendance of resident pupils of the board of the urban municipality subsequent to annexation over the average daily attendance of the resident pupils of the board of the urban municipality in the year preceding annexation

(5) In the sixth year following the annexation, the annexation grant per pupil shall be reduced by 20 per cent, and in each year thereafter by an additional 20 per cent for each additional year.

PART 6

Grants for Instruction in Industrial Arts or Home Economics to Non-resident Pupils

39. Where instruction in industrial arts or home economics was given in the preceding year to pupils admitted free from a school under the jurisdiction of another board, a grant of \$7.50 for each pupil so admitted shall be paid to the board giving the instruction for each term in which the pupil attended.

PART 7

Revocation of Regulations

40. The following are revoked:

- (a) regulations 12 to 15, both inclusive, of Regulations 36,
 - (b) regulations 14 and 15 of Regulations 37,
 - (c) regulations 10 to 13, both inclusive, of Regulations 38,
 - (d) regulations 19 to 28, both inclusive, of Regulations 44,
 - (e) regulations 19 to 21, both inclusive, of Regulations 50,
 - (f) regulations 25 to 28, both inclusive, of Regulations 51,
 - (g) regulations 29 to 32, both inclusive, of Regulations 52,
 - (h) regulations 25 to 28, both inclusive, of Regulations 53,
 - (i) regulations 20 to 22, both inclusive, of Regulations 54,
 - (j) regulations 19 to 21, both inclusive, of Regulations 55,
 - (k) regulations 21 to 23, both inclusive, of Regulations 56,
 - (l) regulations 26 to 29, both inclusive, of Regulations 57, and
 - (m) Regulations 68,
- of Consolidated Regulations of Ontario 1950, and
- (n) Ontario Regulations 34/51,
 - (o) regulation 6 of Ontario Regulations 319/51,
 - (p) regulations 1 and 5 of Ontario Regulations 133/52, and
 - (q) Ontario Regulations 262/52.

Toronto 2,

Minister of Education
W. J. DUNLOP

X—DESTINATION OF PUPILS WHO LEFT ONTARIO ELEMENTARY AND SECONDARY SCHOOLS DURING OR AT THE END OF THE SCHOOL YEAR 1952-53

63,462 Pupils left Elementary and Secondary Schools

9,609 (15%) went on to further training

3,007 (31%) to College or University
1,426 (15%) to School of Nursing
1,403 (15%) to Teachers' Training College
1,384 (14%) to Business College
986 (10%) to Private Academic School
558 (6%) to Provincial Technical Institute
189 (2%) to Private Trade School
656 (7%) Elsewhere (a)

(a) Pre-Teachers' College, Armed Services, and Apprenticeships of various kinds.

10,074 (16%) left Ontario

43,779 (69%) retired from school life

9,288 (21%) to Commerce and Finance
6,759 (15%) to Industry
5,675 (13%) to Services (b)
5,541 (13%) to Agriculture
5,521 (13%) to Unskilled Labour
4,382 (10%) Miscellaneous Occupations
2,863 (7%) To Trades and Crafts
1,898 (4%) To Transportation and Communication
1,852 (4%) Unemployed and Unknown

(b) Services includes personal, public, and home help (Girls).

Of those who retired from school life, 5,521 held Graduation Diplomas, and 1,023 held Honour Graduation Diplomas.

PUPIL RETIREMENT FROM SCHOOL LIFE

Age as of date of leaving.

Grade that in which last registered.

Retrospective Statistics

RETROSPECTIVE TABLES

1. PROVINCIAL POPULATION AND SCHOOL ENROLMENT

Note: Population and Exemptions apply to the calendar year, while Pupil Enrolment is based on the school year.
(For example, day school enrolment of 1940-41 is calculated as a percentage of the population of the calendar year 1940)

Year	Provincial Population	Day Enrolment in Provincial School System	Percentage of Population in Day Schools	Day School Enrolment Classified as between		Compulsory Age Enrolment (8-15 incl.)		Compulsory Adolescent Age Enrolment (14-15 incl.)		Adolescent Age Exemptions			Adolescent Age Exemptions as a Percentage of Compulsory Adolescent Age Enrolment
				Elementary	Secondary	Number	Percentage of Day Enrolment	Number	Percentage of Day Enrolment	By Home Permit	By Employment Certificate	Total	
1940-41...	3,747,000	664,373	17.7	81.8	18.2	482,094	72.6	103,509	15.6	1,885	4,871	6,756	6.5

Source of Population—Canada Year Book.

Commencing with 1945 the enrolment is that of the school year. Previous to that, the figure for the last school day in May.

LORNE PARK PUBLIC LIBRARY, TORONTO

II—IMMIGRATION TO CANADA, OF CHILDREN UNDER 18 YEARS OF AGE, BY PROVINCE OF INTENDED DESTINATION

Over 175,000 immigrants under 18 years of age entered Canada in the past 5 years. Over 50% came to Ontario. 70% of these immigrants are not over 10 years of age. The last 3 years have shown the heaviest influx. The distribution by province follows:

Calendar Year	Totals	Nfld.	N.S.	P.E.I.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.	Yukon and N.W.T.
1953.....	44,174	116	570	68	291	7,368	24,307	2,187	1,052	4,581	3,620	14
1952.....	44,972	131	716	85	251	8,112	24,137	1,946	1,117	4,107	4,356	14
1951.....	45,334	59	447	47	374	8,675	25,088	1,989	1,069	3,876	3,707	3
1950.....	19,040	38	317	43	159	2,780	10,179	1,014	807	1,981	1,715	7
1949.....	23,216	18	332	62	178	3,868	11,900	1,464	932	2,533	1,928	1
Totals.....	176,736	362	2,381	305	1,253	30,803	95,611	8,600	4,977	17,078	15,326	39

The above data was supplied by the Statistics Branch of the Department of Citizenship and Immigration—Courtesy Dominion Bureau of Statistics.

III—NET NUMBER OF CHILDREN TRANSFERRING IN OR OUT OF PROVINCES 1949-1953 ON BASIS OF 2.3 CHILDREN PER FAMILY

These figures are based on the monthly reports of the Family Allowances Division of the Department of National Health and Welfare. These reports give the numbers of families. The number of families has been multiplied by 2.3—the average size of a Canadian family, although the size of families varies among the provinces as follows: Nfld.—2.96; N.S.—2.43; Que.—2.67; Man.—2.18; Alta.—2.20; P.E.I.—2.68; N.B.—2.74; Ont.—2.09; Sask.—2.27; B.C.—2.03. These averages come from Family Allowance Records: Data is compiled for a census year, June to May.

Census Year	Nfld.	N.S.	P.E.I.	N.B.	Que.	Ont.	Man.	Sask.	Alta.	B.C.
1953-54(a).....	-81	-1,596	-405	-1,357	-1,426	+5,131	-1,205	-527	+777	+2,489
1952-53.....	-9	-1,053	-343	-1,139	-1,803	+2,884	-1,481	-2,010	+1,888	+3,236
1951-52.....	-490	-1,382	-400	-1,730	-389	+5,863	-1,658	-3,949	+101	+3,744
1950-51.....	-743	-1,569	-242	-2,703	-626	+7,970	-1,327	-3,271	+1,272	+1,162

1953	8,000	43	10,650	16,895,000.00	13,021,000.00
Totals	35,600	208	48,180	\$ 65,853,000.00	\$ 58,554,000.00

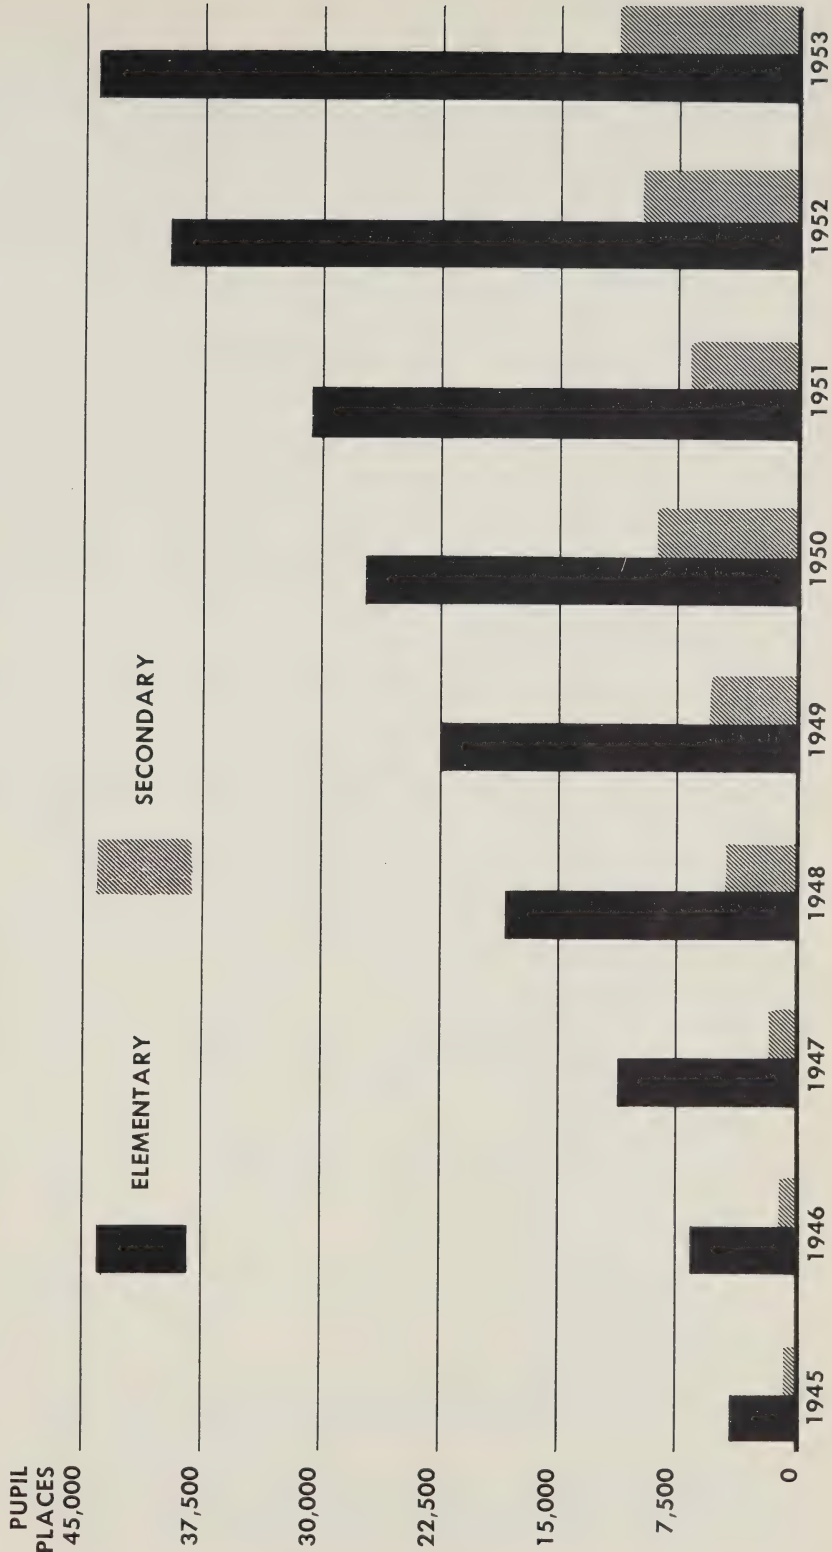

Notes: 1. Enrolment increases are calculated on September enrolments in each year.

2. Building projects are counted in the year of completion.

3. No account is taken in this table of pupil places lost as a result of the following factors: shift from urban to suburban areas, fire losses, replacement of temporary and obsolete accommodation, and abandonment of small buildings to permit centralized facilities.

POST-WAR SCHOOL BUILDING CONSTRUCTION

The effectiveness of the school building programme in Ontario is indicated below in school terms, i.e., new pupil places provided by the construction of new schools and additions for each year from 1945 to 1953. The total for nine years is 206,430 pupil places in elementary and 48,180 in secondary schools. This includes replacements and additional accommodation.

VIII—GRADE ENROLMENTS IN ONTARIO

Because of war conditions, the general programme of Summer Courses was discontinued from 1941 to 1944, inclusive. During that period, the following courses were offered:

- 1942 —Summer Course in Defence Training, Health and Physical Education—925.
1942-43—Winter Course in Manual Training, Type A—40.
1944 —Summer Course in Physical and Health Education and Cadet Training—313.
1944 —Refresher Course in Medieval History given during Christmas vacation—45.
1944-45—Winter Course in Manual Training, Type A—48.
(a)—Formerly Art and Crafts. (b)—Formerly Vocational Guidance.
(c)—Formerly Industrial Arts and Crafts. (d)—Formerly Physical Education.
(e)—Type B.

(a)—A comparatively small sum since 1944, and thereafter included with local levies.

(b)—Includes debenture levy, also township grant.

(c)—Included in current operations previous to year shown as a special disbursement.

(d)—Figure covers transportation to elementary schools only.

(e)—Unmatured debenture principal, and capital loans.

(f)—Data not available.

Cost covers current operations, capital charges, capital outlays from current funds, and transportation.

XVIII—PUPIL TRANSPORTATION

During the school year 1953-54, the apparently large increase in the number of routes to elementary schools, was due to a new regulation requiring all routes from closed schools to have Departmental, rather than inspectoral, approval. The average cost per pupil increased seven cents per day, and the cost per mile increased by two cents.

School Boards continue to employ contractors rather than own and operate buses. Less than 2% of the school buses are owned by School Boards.

An Ontario School Bus Operators' Association has been formed. This is an independent body which is interested in uniform standards for school buses, in safety education and in the protection of contracts.

**TABLE 19—TRANSPORTATION ASSISTANCE FOR PERSONS RESIDING IN THE
TERRITORIAL DISTRICTS**

The Province of Ontario provided transportation assistance to 558 students during the school year 1953-1954. \$11,370.45 was paid to 331 students residing east of Sault Ste. Marie, and 227 students residing west of Sault Ste. Marie. Of those assisted, 172 were in the first year, 148 in the second year, 132 in the third year, 95 in the fourth year, 8 in the fifth year and 3 in the sixth year.

The institutions attended by these students were as follows:

University of Toronto.....	175
Queen's University.....	169
University of Western Ontario.....	85
University of Ottawa.....	42
Carleton College.....	0
Ontario Agricultural College.....	16
Ontario Veterinary College.....	2

(c)—Full-Time Teachers, including Principals

(d)—Pupils attend Toronto Schools

TABLE 30—AGRICULTURE 1952-53

List of Collegiate Institutes, High Schools and Continuation Schools in which Agricultural Science and Departments of Agriculture were taken in 1953.

(1) SCHOOLS TAKING AGRICULTURAL SCIENCE ONLY

COLLEGIATE INSTITUTES

Brackville
Cobourg
Collingwood
Cornwall
East York
Fort William
Kitchener-Waterloo
Lindsay
Owen Sound
Port Arthur
Scarborough (West Hill)
Stratford
Vankleek Hill
Woodstock
York Memorial

HIGH SCHOOLS

Ailsa Craig
Almonte
Bancroft
Bowmanville
Bracebridge
Bradford
Brighton
Burk's Falls
Burlington
Campbellford
Cannington (Brock D.H.S.)
Cayuga
Cochrane
Cobden

HIGH SCHOOLS (Continued)

Delhi
Dryden
Dundalk
Dundas
Durham
Eastview
Elmvale
Fenelon Falls
Fergus
Fort Frances
Grand Valley
Hawkesbury
Iroquois
Lakefield
Lucknow
Markham
Maxville
Merriton
Merlin
Midland
Millbrook
Milverton
Morewood
Nepean (Ottawa)
Newcastle
New Dundee
New Hamburg
New Liskeard
Parkhill
Peterborough (Kenner C.I.)

HIGH SCHOOLS (Continued)

Plattsville
Port Credit
Ripley
Sharbot Lake
Stouffville
Sutton
Thornbury
Trenton
Waterdown
Warton
Williamstown

CONTINUATION SCHOOLS

Agincourt
Brownsville
Denbigh
Eganville
Flinton
Hallville
Lynden
Lyndhurst
Merrickville
Mindemoya
Mount Brydges
Mount Elgin
Port McNicoll
St. George
Stella
Tamworth
Tavistock
Wellington

(2) SCHOOLS TAKING AGRICULTURAL SCIENCE AND WITH DEPARTMENTS OF AGRICULTURE

COLLEGIATE INSTITUTES

Barrie
Belleville
Chatham
Clinton
Goderich
Ingersoll
Napanee
Orillia
Perth
Picton
Renfrew
St. Marys
Smith's Falls
Stamford (Niagara Falls)

HIGH SCHOOLS

Alexandria
Alliston
Amherstburg
Arnprior
Arthur
Athens
Aurora
Aylmer
Beamsville
Belle River (North Essex H.S.)
Blenheim
Brampton
Burford
Caledonia
Chesley
Chesterville

HIGH SCHOOLS (Continued)

Cooksville
Drayton
Dresden
Dunnville
Elmira
Exeter
Essex
Forest
Glencoe
Grimsby
Hagersville
Hanover
Harrow
Kemptville
Kincardine
Kingsville
Leamington
Listowel
Madoc
Markdale
Marmora
Meaford
Medway (Arva)
Milton
Mitchel
Mount Forest
Newmarket
Norwich
Norwood
Oakville
Orangeville

HIGH SCHOOLS (Continued)

Paris
Palmerston
Pelham (Fenwick P.O.)
Petrolia
Pickering
Port Elgin
Port Perry
Preston
Richmond
Richmond Hill
Ridgetown
St. Lawrence (Cornwall)
Saltfleet (Stoney Creek)
Seaforth
Shelbourne
Simcoe
Smithville
Strathroy
Stirling
Sydenham
Tilbury
Tillsonburg
Tweed
Uxbridge
Walkerton
Wallaceburg
Waterford
Watford
West Lorne (West Elgin)
Wingham
Winchester

AGRICULTURE 1952-53

TEACHERS OF AGRICULTURE

Holding Specialist Certificates.....	249
O.A.C. graduates included above.....	156
Holding Intermediate Certificates.....	73
Completed Intermediate Part I.....	14
Granted permission.....	29

59. General Legislative Grants.
60. Grants for Non-Profit Camps.
61. Assistance in the Cost of Educating Retarded Children.
62. Programmes of Recreation.
63. Public Libraries.

Terminology

Assessment—*The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.*

Attendance Efficiency—*The percentage relationship of the actual days attended to the perfect aggregate.*

Auxiliary Classes—*These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.*

Capital Charges—*Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.*

Compulsory School Age—*Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part-time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.*

Consolidated School—*An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyances.*

Correspondence Courses—*Are a substitute for regular school for those who are unable to attend because of age, health or distance. They cover Grades I to XIII in English and Grades I to VIII Bilingual and are based on the new Course of Studies. The maximum enrolment for the school year 1953-54 was 2,053, and the average enrolment was 1,651. Lessons are marked by a Departmental staff. These courses are entirely free.*

Cost per Pupil-Day—*The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.*

County Pupil—*A secondary school pupil living within the County but outside any secondary school district.*

District—*The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing.*

Enrolment (Net)—*The number of pupils who have attended school during the year, excluding all duplications.*

Free School Age—*The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.*

General Maintenance—*Ordinary, current expense, as opposed to capital outlays and debenture charges.*

Improvement District—*Shall be deemed to be for all purposes of every Act a township municipality, a village municipality, or a town municipality, as may be designated from time to time by the Municipal Board.*

Inspectorate—*The area under the supervision of a local Department representative.*

Kindergarten-Primary—*A class combining the work of the kindergarten and Grade I.*

Non-Resident Pupil—*A secondary school pupil who is neither a resident nor a County pupil.*

Public School Section—*A subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.*

Resident Pupil—*A secondary school pupil living within the secondary school district.*

School—*Provincially controlled schools may be classified as:*

I. Elementary—*Those doing the work of the first eight grades. A few have Fifth Classes (see above).*

- (a) **Public**—*The first school established in any school section or urban municipality, and supported by the ratepayers.*
- (b) **R.C. Separate**—*For the children of Roman Catholics.*
- (c) **Protestant Separate**—*For the children of Protestants in centres preponderantly Roman Catholic.*

II. Secondary—*Those doing the work of Grades IX to University Matriculation.*

(a) **Academic:**

- 1. Collegiate Institutes.**
- 2. High Schools.**
- 3. Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic courses are designed to lead to Universities and Teacher-Taaining Schools.

(b) **Vocational:**

- 1. Technical High Schools.**
- 2. Commercial High Schools.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

III. Provincial Technical Institutes

These offer courses designed to train technicians for positions in industry which are supplementary to, but not in the field of, professional engineering. The admission requirement is secondary school graduation, and the courses are of two or three years' duration. The Institutes are owned and administered directly by the Department of Education under the Vocational Education Act, Part II, but close co-operation with industry is maintained through advisory committees, the members of which are appointed by the Minister.

IV. Professional Training Schools

- (a) *Ontario College of Education (University of Toronto)—for the training of secondary school teachers.*
- (b) *Provincial Teachers' Colleges—for the training of elementary school teachers.*

V. Special Schools:

Ontario School for the Blind, Brantford.

Ontario School for the Deaf, Belleville.

School Car—*A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of northern Ontario. There are six of these cars at present, and the length of route ranges from 83 to 221 miles. The route is covered in four to six weeks, and each car is "spotted" for about a week at a time. Problems are solved, work is outlined for the next period, and daily problems of life are discussed. The present enrolment approximates 160, and comprises 10 nationalities. The Department pays all operating costs.*

School Year—*The school year consists of two terms, September 1 to December 22, and January 3 to June 29. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remain on the calendar year basis.*

Secondary School District—*The area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.*

Township School Area—*A unit of school administration comprising two or more contiguous rural school sections in the same township or in adjacent townships, or comprising such rural sections along with one or more adjacent villages or towns. See Cir. Elem. 15, "The Township School Area in Ontario."*
